

AN UMBRELLA PARADISE? Hardly. These faithful, spirited souls were weathering Saturday's homecoming game. The rain and the cold, not to mention the score, discouraged

many from staying until the bitter end—to a 41-6 humiliating defeat. Oh well, into every life, some rain must fall.

Pianist To Give Concert Tonight

By PUFF STOUZ
Two contemporary works using the twelvetone technique

and two works in more traditional idioms will be performed tonight in Hill Hall by Clifton Matthews, pianist.

The sixth concert of the Tuesday Evening Series will begin at 8:00. Matthews, who joined the

UNC faculty in 1965, is a native of Kansas and received his early training under Wiktor Lubunski at the Kansas City Conservatory. He earned the degrees of Bachelor of Science and Master of Science at the Julliard School of Music where he studied with Irwin Freundlich. Later he joined the Julliard faculty as teaching assistant.

composer. Unlike most works bearing the name, the Webern variations are in three separate movements.

A Capriccio (1962) by the American composer Lionel Nowak also utilizes the twelve-tone technique. Mr. Nowak is chairman of the Music Department at Bennington College.

A late Schubert sonata in G major (D.894) and the Twelve Preludes, Book II, by Debussy complete the program.

CLIFTON MATTHEWS

Jubilee Poll Indicates Student Dissatisfaction

By KAREN JURGENSEN
DTH Staff Writer

I started out with one card marked pro and one marked con. As I talked to people it soon became evident that the majority of the students polled are dissatisfied with Jubilee. Location and entertainers appear to be the major problems.

One student out of approximately 50 interviewed was in favor of having Jubilee concerts in Fetzer Field. All other students preferred Polk Place, with a few choosing McCorkle Place. Their reasoning, for the most part, is

that Fetzer Field presents the wrong atmosphere while the other alternatives present the right atmosphere.

On the subject of entertainers there is a sharp division between those students favoring hard rock and those favoring soul. Since the students appear to be fairly equally divided in these two groups, one person suggested that the Carolina Union select entertainers from both categories in order to please more people and to provide greater variety.

Only a few people suggested that Jubilee be scrapped completely. The idea that

Jubilee is supposed to be THE BIG BLAST has hung on and now students seem to be saying "give us the groups that create the right mood, and the right place, and let us have our blast."

It would be unfair to imply that no one was satisfied with Jubilee last year, however. Of the twenty per cent or so making positive comments, no one was really gung-ho on the subject. Those who did enjoy the programs cited good bands as the major strong point of Jubilee. It would seem that the entertainers and the mood they create are the single most important requirement for a good Jubilee.

From the interviews, Big Brother and the Holding Company and the Doors came out in the lead for the hard rock enthusiasts. While the Temptations and Smokey Robinson and the Miracles were the choice of soul voters. Other suggestions were the Fifth Dimension, Flatt and Scruggs, Ray Charles, and Dionne Warwick.

On the administration side, the Carolina Union is trying with its own poll to find out which groups students prefer. Suggestions have been coming in and will be compiled within the week.

Of the entertainers suggested, those who are completely out of the Union price range must be eliminated. Once this is done, the board will send offers to groups whom they feel will represent a good cross section of the choices. From there, the question is up to the entertainers and their managers.

One other point of interest is that the question of location will be brought for consideration before definite plans are made for the Big Blast.

Campus Happenings

TICKETS for the Honors Students Association Dinner on Saturday, Nov. 6, in the Carolina Inn ballroom go on sale today. All honors students (freshman, sophomore and departmental) are urged to attend. Tickets may be purchased in Dr. Patterson's office for \$3. For further information contact Sharon Hagle (933-5132) or Linda Stuntz (933-2754).

of the Regional Learning Laboratory."

WRC will meet tonight at 6:45 in 201 Murphey. All housemothers are invited to attend.

A panel discussion on the draft is scheduled for 8 p.m. Wednesday in Gerrard Hall. The panel is sponsored by the SSOAC and NUC draft groups, but will present all sides including ROTC, pro-draft and C.O.'s.

ALL STUDENTS INTERESTED in being on panels to question speakers in the Latin American Colloquium (Nov. 12-Dec. 17) sponsored by the ISC should contact Jane Brookshire (968-9012) or Glenda Alexander (968-9002).

BOARD OF RESIDENCE COLLEGE Academic Lt. Governors will meet Wednesday at 5 p.m. in the Graham Library, first floor Graham Residence Hall.

DR. BARTON HERRASHER will speak at the Graduate Education Symposium today at 12:15 p.m. in 010 Peabody. A luncheon social at 11:45 will precede Dr. Herrasher's speech on "The Two College Program

'Flying Is Indescribably'

"Most kids want to be a doctor or a lawyer. I have always wanted to be a pilot," said UNC senior Milton Ward. The Clarendon native has taken the first big step toward his goal, and he has done it in a big way. Three days after Milt started taking flying lessons at Burlington Airport in Alamance County, he was soloing—flying alone. Seventeen days later, he had his private pilot's license.

"Flying just plain can't be described," he said. "It's an exhilarating experience. To feel

that you own the airplane and you're guiding its course."

The geography major at UNC took flying lessons under the Air Force's flight instruction program. It enables senior AFROTC cadets to take 35 hours of actual flight instruction and to apply for their private licenses. Under normal circumstances, a student has to take 40 hours of in-flight training to apply for a private license. However, all students must pass a basic Federal Aeronautics Administration test covering

navigation techniques and basic aerodynamics.

Milt is one of ten senior in the flight instruction program at UNC. Before he actually started flying, he finished ground school sponsored by Carolina's Air Force ROTC detachment.

"In ground school we studied the basic concepts of flight," he said. "We studied the basic principles of lift, what makes an airplane fly, and how to use and read the instruments. Then we learned how to navigate."

Milt took his lessons in a Cessna 150, a small, one-engine plane with a cruise speed of about 160 miles per hour. His instructor was Ken Marley, chief pilot of Benbow Aviation in Burlington.

Milt boasted that he has had no problems since he started flying. "However, I did scare a lot of cows when I was practicing forced landings," he said.

"Flying is an adventure in precision," he continued. "Everything has to go right all the time. The first time you think you've got it beat, it beats you."

"I love flying," he concluded. "It's what I've always wanted to do. As long as I can remember, I've wanted to fly."

After graduation in June, Milt will be commissioned a second lieutenant in the Air Force. Then he will enter undergraduate pilot training. He hopes to be a jet fighter pilot.

MGM Wants YOU

Do you ever have the feeling that tenny-boppers are taking-over your home town? Well if they are, the news may not be all bad. Because M-G-M is looking for you!

The company's publicity department has just announced a contest in connection with the world premiere of their Christmas release, The Impossible Years.

The film stars David Niven and Lola Albright and deals with the generation gap. M-G-M only thought it fitting that the world premiere be

held in a town which contained largely teenagers.

A gigantic hunt in underway to find the town—large or small—in the U.S. which has the largest ratio of teenagers to adults. No matter where the town may be, the world premiere will be held there.

The deadline is next week, so if your town qualified, write: Director of Special Projects, 26th Floor, Metro-Goldwyn-Mayer Inc., 1350 Sixth Avenue, New York, N.Y. 10019.

You may become a celebrity!

Companies Recruiting At UNC This Week

The Placement Office announces that the following companies will recruit on campus during the week of November 11-15:

Tuesday, November 12—Parke, Davis & Company; Owens-Corning Fiberglass Corporation; Cone Mills Corporation; A.M. Pullen & Company; Mead Johnson & Company; U.S. Central Intelligence Agency.

Wednesday, November 13—Defense Contract Audit Agency; General Electric Company; The United Methodist Board of Education; The Johns Hopkins University, Master of Arts in Teaching Program; North Carolina National Bank; Florida Tile Industries, Incorporated; Allstate

Insurance Companies; U.S. General Accounting Office

Thursday, November 14—S.S. Kresge Company, Sinclair Oil Corporation; University of Virginia, Graduate School of Business Administration; North Carolina National Bank; Ernst & Ernst; Eli Lilly & Company; Riegel Textile Corporation.

Friday, November 15—The Kroger Company; General Foods Corporation; Arthur Young & Company; Fieldcrest Mills, Incorporated; American Oil Company; IIT Rayonier, Incorporated; Del Monte Sales Company; Cameron-Brown Company.

Is it possible to be passed by at 30?

Absolutely. If you're a 30-year-old engineer who's failed to keep up with the latest developments in his field.

Because Western Electric's an acknowledged industrial leader in graduate engineering training, that's one worry our engineers don't have. Our nearly-completed Corporate Education Center near Princeton, N. J., for instance, will have a resident staff of over 100. More than 310 engineering courses will be

offered, and about 2,400 engineers will study there in 1969. It's the most advanced facility of its kind.

Ask around. You'll find that when it comes to anticipating change, Western Electric is way out in front. And we make every effort to keep our engineers there too. See our recruiter or write College Relations, 222 Broadway, New York, N. Y. 10038.

A lot of study, and hard work, never hurt anyone.
