Carolina Polar Bears Are All Wet

By ART CHANSKY
DTH Asst. Sports Editor

For those of you that are fed up with the normal list of spare time college absurdities, there is yet another answer—join the Carolina Polar Bear Club of Chapel Hill.

An informal organization started by five Beta Theta Pi's, the Polar Bear Club stands open to all comers (or goners may be more appropriate).

The club meets only once a week, but it's likely that the intervening six days are often needed for recuperation. At that weekly meeting, which for the past month or so has been held on Sunday afternoon at 2 o'clock, the members journey

to nearby University Lake and indulge in a little drunken dipping and dripping dunking.

Says club president Bill Deaver, "It all started one Sunday when we were looking for something to do. Regardless of the weather, we go to the lake every week, and sometimes it is quite invigorating."

Deaver claims that the stunt hung on as "sort of a novelty. It clears your mind and any hangovers and serves to get you ready for the week of study."

Regardless of whether the Polar Bears' Sunday chilly dips clear your mind or blow it completely, the novelty part cannot be disputed. Of all the fraternity and dorm pranks ever known at Carolina, the

Polar Bears are sure to rank high on the list.

The highlight of a meeting is the initiation of a new member into the club. The ceremony consists simply of the prospective member submerging himself into the drink first and then waiting for each Polar Bear to take his dip, dry off and dress before coming out.

When the temperature drops to December's freezing point, the whole deal can be, as Deaver attests, "a lot of laughs."

The Polar Bear Club is not without its fringe benefits, however. This Christmas, the members plan a combined Bloody Mary Party and club

meeting all in one fun-filled day.

The five members, Deaver, Jack Ryder, John Boulware, Doug Neal and Randy Merrill, are anxious to expand the organization, and all students are invited to join, regardless of age, sex or athletic ability. The club requires only one prerequisite—guts.

So, what the hell, be a Polar Bear, man, and live.

Deacs To Name Football Coach

WINSTON-SALEM (UPI) — Wake Forest University scheduled a news conference for 1:30 p.m. Friday, presumably to announce a successor to Bill Tate as head coach of the Deacon football team.

In announcing the new conference Thursday, Wake Forest officials refused to comment on a report in the Raleigh News and Observer

that Assistant Coach Cal Stoll of Michigan State would get the job.

"We're not going to announce anything today," said Marvin Francis, Sports information director. "We've got a news conference scheduled tomorrow afternoon."

The News and Observer reported earlier Thursday it had learned that Stoll had been named to succeed Tate, who announced his resignation three weeks ago, and that the announcement "will be made within a day or two."

Stoll, 45, has coached offensive ends at Michigan State for 10 years. He graduated in 1950 from Minnesota, where he played defensive end.

After six years in the Navy, Stoll coached high school ball in Minneapolis and served as an assistant coach at Utah State, Denver and Georgia before joining the Wolverines.

Stoll was interviewed last week for the Wake Forest job.

How to brew the King of Beers.

Ever wonder how Anheuser-Busch takes the choicest hops, rice and best barley malt—and turns it into the King of Beers?

Best way to find out is to visit one of

our breweries for a first-hand look. (The pleasure will be mutual.)

Meanwhile, purely in the interest of science and higher education, here's a quick cram course.

1. At the lautur tanks, we cook malt and rice to produce a clear amber liquid called wort.
2. Then to the copper brew kettles, where choicest imported and domestic hops are added to the wort—which is cooked again.
3. Now, after cooling, the wort flows into our own patented fermenters, where brewers' yeast works to ferment natural sugars into alcohol and CO₂. This is where wort becomes beer.
4. Most beers are finished now. Not Budweiser. We ferment it again, this time in special glass-lined tanks partially filled with a

dense lattice of beechwood strips. (This is where Beechwood Ageing comes in. It's a costly extra step, but we think the difference it makes in the taste and clarity of Budweiser is worth it!) We add a little freshly-yeasted wort to start the second fermentation, and let it "work."

5. The final step. The Budweiser flows through a series of finishing filters just before we package it for you in barrels, cans or bottles.

If that sounds like anybody could brew Budweiser, forget it. It takes a special kind of brewery (we have the only six in the world that will

do), a brewmaster who puts his heart and soul into brewing the King of Beers, the choicest ingredients (the cost of which keeps our treasurer awake at night), and thousands of brewery workers who know Budweiser is the best reason in the world to drink beer.

Next lesson? Well, we were going to tell you how to drink Buds. But you know that.

Like to know more about brewing in general and Bud in particular? Write for our free booklet:

EXPLORE the potential for professional achievement at the Naval Ordnance Station, Indian Head, Maryland.

Few technical fields offer you as many opportunities for an exciting and rewarding career as the rapidly growing field of chemical propulsion. Indian Head is a recognized leader in research, development, production, and evaluation of propellants and rocket propulsion systems and has advanced the state-of-the-art of chemical propulsion through participation with the Department of Defense and NASA. Indian Head has made important contributions to the Polaris, Poseidon, and Sidewinder propulsion systems as well as virtually every missile system in use by the Fleet today.

Located 25 miles south of Washington, D. C., Indian Head is close to the cultural, social, and scientific advantages of the Nation's Capital offering opportunities for pleasant suburban or country life near mountain and shore resorts.

Professional positions available in:

Engineering
Aerospace Electronics Electrical
Chemical Industrial Mechanical Physics

Liberal career Civil Service benefits include graduate study at nearby universities with tuition expenses reimbursed.
