

Campus Calendar

Today's Activities

BUNC (Behind the University of North Carolina) will present "Preregistration as a Subversive Activity: A Self-help Session," 7:30 tonight, 215 Union. Particularly helpful to freshmen. For info call 967-5633.

What is Transcendental Meditation really about? Learn from Larry Kuit, specialist, 7:30 tonight, Gerrard Hall.

Physical Chemistry seminar: Professor C.S. Johnson, UNC, "Light Scattering," 4 p.m. today, 306 Venable.

"Exploring Nonviolent Lifestyles and Alternatives," a weekly discussion group, will meet at 7 tonight, 108 Purseroy Rd. (Behind Community Church). Come at 6 for a potluck supper. Call 929-2807 for more information.

With deepest affection the Bahá'ís of Chapel Hill welcome you to informally discuss this new faith, 8 tonight, at the Center, 202 McCauley St.

International Week Activity: German dinner, 7 tonight, Newman Center, \$2.50 per plate.

The UNC chapter of the Society of Professional Journalists will hold its fall job seminar 4:30 p.m. today, 204 Howell. Speakers representing various fields will talk about job opportunities, job applications and job preparation.

Forum: "Black Liberation and Working-Class Revolution," speaker Bernard Vincent, member of the Spartacus Youth League (former member of the Black Student Alliance), 6:30 p.m. today, 205 Union.

All music committee members come to suite A today to pick up posters to be distributed. No meeting.

UNICEF Christmas Cards and calendars will be on sale 2-4 p.m. today, 102 Y building.

The Carolina Readers will meet 3:30 p.m. today, 103 Bingham.

Organizational meeting for all those interested in the 1975 Hike for Humanity, 7:30 tonight, upstairs Y building.

Alpha Epsilon Delta, Pre-Med-Pre-Dental Society, will hold a meeting 7 tonight, 106 Berryhill Hall. Kenneth Pearce of Volunteer Services will give a slide presentation on North Carolina Memorial Hospital. Everyone is invited.

The Full Gospel Student Fellowship invites all to come and

worship the Lord at 7:30 tonight in the Presbyterian Student Center.

Delta Sigma Pi will hold a regular business meeting at 8 tonight, South Lounge meeting room, Union.

The film "Cuba: Art and Revolution" (BBC-TV, color), will be shown 11 a.m. and 3:30 p.m. today, Day Hall faculty lounge. Sponsored by the Institute of Latin American Studies. All interested persons are invited. Free admission.

Items of Interest

The New American Movement, a socialist organization, will meet 8 p.m. Wednesday, 209 Union.

Carolina Gay Association, Management Board meeting, 7 p.m. Wednesday, 209 Union.

Psychology Colloquium Series: Dr. James Olds of California Institute of Technology, will speak on "Recent Advances in Brain Motivational Studies," 4 p.m. Wednesday, 104 Howell.

The Institute of Latin American Studies will hold its weekly informal luncheon meeting from noon to 1:30 p.m. Wednesday, 570 Hamilton. All interested students, faculty members, and friends are urged to bring lunch and come.

The UNC Law Wives Association is sponsoring a series of Charlie Chaplin and W.C. Fields films, Wednesday, 3 Law School. They will run continuously from 7-10 p.m. or according to demand.

The GPSF Senate will meet 7:30 p.m. Wednesday, Frank Porter Graham Lounge, Union.

SHE staff meeting, 5 p.m. Wednesday, AWS office, important meeting.

Registration forms are now available, 211 Gardner, for the National Security Agency's Professional Qualification Test which will be administered Nov. 23. Deadline for receipt of forms is Friday.

GRE (Graduate Record Examination) Dec. 14: Testing applications must be received in Princeton by Nov. 19 for the \$10 fee. An additional fee of \$4 for applications received between Nov. 20 and Nov. 26. This testing date is in the middle of exams here. The next date is Jan. 18. Pick up testing applications in the Guidance and Testing Center, Nash Hall (across from the Inn parking lot).

Jockey's Ridge plots on sale

by Laura Toler
Staff Writer

Now everyone can own part of Jockey's Ridge. The largest twin sand dune on the Eastern coast, located at Nags Head, is being sold in square-foot plots for \$5 each.

People to Preserve Jockey's Ridge, Inc., a non-profit organization based in Nags Head and Chapel Hill, hopes to collect enough \$5 donations to help the state buy Jockey's Ridge from potential developers and then convert it into a state park. The N.C. Board

of Conservation and Development (now called the Board of Economic Resources) has recommended the National Natural Landmark be preserved as a park, but \$1.5 million is needed to supplement state and federal funds designated for its purchase.

Each \$5 donor will receive a map of an acre of the dune, which will be designated by number his square foot in the future park. In addition, each investor will be invited to sit on his square foot during a celebration concert to be given this spring by either John

Denver, Johnny Cash or James Taylor.

People to Preserve Jockey's Ridge, which sports the slogan SOS—Save Our Sand-Dunes!—has also begun other means of fund-raising. "We've already raised a lot by selling bumper stickers, T-shirts, records and balloons," Carolista Baum, president of the group, said Monday.

Jon Schwenzer, full-time organization coordinator, is trying to involve service organizations all over the state. UNC fraternity Kappa Sigma will help sell square

feet, Schwenzer said Monday.

People to Preserve Jockey's Ridge has also launched a publicity campaign to encourage larger donations from foundations and private individuals. As well as distribution literature and being publicized in newspaper articles, the group helped publicize the dunes' plight by budgeting the film "Jockey's Ridge: Of Time and Eternity." The film, made last spring by five Carolina RTVMP majors, will be shown 7:30 p.m. Thursday in Murphey 111.

Scientist predicts Iran-Iraq war

Computer modelling techniques used to forecast war and peace

Unless the big powers act quickly to prevent it, a war will break out between Iraq and Iran which could trigger general holocaust in the Middle East, a prominent UNC political scientist predicts.

The Iraq-Iran war could break out at any time within the next five years, Dr. Edward E. Azar said in a recent interview.

This is but one of the predictions made by Azar, who is using the most advanced techniques of computer modeling to show what lies ahead for the world. With the aid of the computer system he developed, the million dollar Conflict and Peace Data Bank, the Lebanese-born American is also forecasting:

- Unless sparked by an Iran-Iraq war, another Arab-Israeli conflict will not break out for four to eight months, a testing period for negotiations.
- Economic necessity will bring eventual peace to the Mid-East, together with mutually profitable trade among the Arab states, Israel and the West.
- NATO will be weakened in Europe by the Cyprus conflict.
- Europe's faltering economy and the deterioration of NATO will bring a resurgence of communism in the West.
- Europe's economy would be crippled for decades by another oil cutoff arising from a Mid-East war.
- Even without an oil cutoff, the western economy may break down because of resource shortages and trade barriers many nations are erecting.

Azar's computer modeling is much like modern methods of weather prediction. The weatherman takes many atmospheric conditions and predicts how these events will interact with one another to form tomorrow's weather. The predictions are modeled after the way similar events have affected past weather.

Azar takes readings of the politico-economic climate—a trade agreement, a verbal attack against the U.S. by a foreign leader, street demonstrations for peace. He uses these to predict tomorrow's headlines.

The information is gathered from the world press—from Egypt's *Al-Ahram* to the *New York Times*. The computer analyzes the information according to models developed by Azar and other scientists based on how certain events influenced the world climate in the past.

For instance, just as a weatherman's computer forecasts that a warm front will increase chances of rain, the data bank will computer an arms buildup as increasing the chance of war.

The incredible rate of arms buildup in U.S.-backed Iran and Soviet-backed Iraq is one reason for Azar's prediction of war between the two nations.

Ironically, detente between the U.S. and the Soviet Union has further fanned mistrust between Iraqis and Iranians, Azar said. No longer can either side count on intervention by their backers in case of invasion by the other nation. This adds impetus to the buildup of arms.

Dr. Edward E. Azar checks his forecasts against headlines in the 'Daily Tar Heel'

"Both sides perceive these arms will be used against one another," he said. The result could be a triggering of general war in the Middle East and an oil cutoff which would "disrupt the socio-economic fabric of Europe for decades... The failure of Europe is a failure for Western civilization, and the U.S. is as much a part of that as anyone."

Azar emphasized that in these situations such as the Middle East, a war involving any conflict participant can draw in all the others.

Azar does not see Mid-east conflagration as unavoidable. His system helps him foresee not only what will happen, but what would happen if U.S. policy is changed.

The data bank can help decide what must be done to effect a certain outcome.

What we must do to defuse the Middle East, he said, is to convince Israel to return to her pre-1967 borders and to help set up a Palestinian state. Peace must be guaranteed by trade agreements among Israel, the U.S. and the Moslem states which the participants cannot afford to have disrupted by war.

Although the U.S. officially joined Israel in United Nations voting to block admission to the Palestinian Liberation Organization (PLO) to the coming Mid-East peace talks, Azar believes the real intent of U.S. policy is to bring peace by creating a Palestinian state and by taking other steps he advocates.

Azar predicted, the day before it occurred, the nearly unanimous U.S. vote in October to seat the PLO. Whatever propaganda they put out, Azar said, all sides realize "it would be silly to talk without the Palestinians. The plight of the Palestinians is one of the major reasons for the conflict."

He emphasized the U.S. must use all its power to solve the conflict immediately. Buying time, he said, would mean the eventual development of tactical nuclear weapons by both sides, weapons which would surely be used if any nation felt its existence threatened.

As a British company we'd like to explain our 810QX automatic turntable in plain English.

How the 810QX reproduces recorded music accurately.

The BSR 810QX has a sophisticated synchronous motor, spinning a heavy 7-lb. platter for accurate speed (regardless of voltage supply or record load) and all-but-nonexistent wow and flutter. Anti-skating force may be adjusted for optimum pressure with either conical or elliptical styli, so stylus sits perfectly centered in groove for precise stereo separation without audible distortion or uneven groove wear. A strobe disc is integrated into the platter design and a variable speed control is provided should you want to vary from, and later return to, the normal speeds. The tone arm will track as low as 0.25 grams to make use of finest light-weight, high-compliance cartridges for maximum fidelity and dynamic range.

How the 810QX protects records and cartridge stylus assembly.

Tone arm descent is viscous-damped in automatic operation and also when using the manual cue and pause control, for gentle contact with record surface. Platter rubber mat protects records during play and cushions discs during automatic drop. Automatic spindle uses umbrella-type suspension, without outboard balance arm. Stub spindle rotates with record to prevent distortion of center hole. Stylus setdown adjustment prevents stylus damage if dropped outside of entry groove range. Tracking pressure adjustable down to 0.25 grams for newest light-weight cartridges or minimum record wear. Stylus brush whisks dust off stylus between plays. Lock automatically secures tone arm to prevent damage to stylus from accidental movement. Stylus wear meter records accumulated stylus use in hours. Knowing when to replace a worn stylus protects your records.

How the 810QX provides convenient operation in any desired mode.

After touching a single feather-weight button, the 810QX can either: play a stack of records, shutting off after the last one; play a single record and shut off; or play a single record, and repeat it indefinitely until you stop it.

Manual operation uses a single button to start the motor, and the cue control to lower the stylus.

How the 810QX operates quietly, emitting no sound that can intrude on the music.

The 810QX uses a unique sequential cam drive mechanism. It is a rigid precision assembly that replaces the plumber's nightmare of rotating eccentric plates and interlocking gears that other changers use. Unlike other changers, there are no light metal stampings that can go out of alignment and make a lot of noise, from being carried, bumped, or just from use.

The Daily Tar Heel is published by the University of North Carolina Student Publications Board, daily except Sunday, exam periods, vacation, and summer periods. No Sunday issue. The following dates are to be the only Saturday issues: September 14, October 5 & 18, and November 2, 16 & 23.

Offices are at the Student Union building, Univ. of North Carolina, Chapel Hill, N.C. 27514. Telephone numbers: News, Sports — 933-1011, 933-1012; Business, Circulation, Advertising — 933-1163. Subscription rates: \$20.00 per year; \$10.00 per semester.

Second class postage paid at U.S. Post Office in Chapel Hill, N.C.

The Campus Governing Council shall have powers to determine the Student Activities Fee and to appropriate all revenue derived from the Student Activities Fee (1.1.14 of the Student Constitution).

The Daily Tar Heel reserves the right to regulate the typographical tone of all advertisements and to revise or turn away copy if it considers objectionable.

The Daily Tar Heel will not consider adjustments or payments for any typographical errors or erroneous insertion unless notice is given to the Business Manager within (1) one day after the advertisement appears, or within one day of the receiving of last sheets or subscription of the paper. The Daily Tar Heel will not be responsible for more than one incorrect insertion of an advertisement scheduled to run several times. Notice for such correction must be given before the next insertion.
