The **Student Consumer Action Union** needs your help now with a variety of interesting projects. Committee members are needed immediately. Please come by Suite B in the Carolina Union in the afternoon for more details.

Get involved with **Orientation!** Applications for **Freshmen and Transfer counselors, Tar**

## Drug study grant awarded

by Jeff Cohen  
Staff Writer

Five UNC School of Medicine faculty members recently received a \$244,000 grant to study the long term effects of drugs being used to help control the disruptive behavior of children with mental disorders.

The grant, from the National Institute of Child Health and Human Development, will be used to cover expenses for the first year of the five-year study. Similar awards are expected for each of the study's succeeding four years.

The researchers, Dr. George R. Breese, Department of Psychiatry and Pharmacology; Drs. Robert Mueller and Stephen Kiser, Department of Pharmacology, and Drs. Paul Mushak and Martin Krigman, Department of Pathology, are members of the Biological Sciences Research Center of the Child Development Institute at UNC.

"We know that drugs are very useful in moderating the behavior of children who are violent or otherwise uncontrollable," Breese said. "What we don't know is whether these drugs may be harmful in the long run."

Breese said that the investigation will focus on psychotropic drugs most commonly used to treat mentally retarded, autistic or hyperkinetic children.

The researchers' experiments with the long term effects of these drugs will be performed on both rats and monkeys.

The second part of the research, for which federal funds are being sought, will include a careful evaluation of children already receiving drug therapy.

"We may find that the drugs have no adverse effects and that we should keep using them," Breese said. "Or we may discover new therapeutic agents or better approaches to behavior modification."

Although symptoms can be treated, there are no cures for developmental disorders such as autism and hyperkinesis.

"What we're after is a happy medium between having children who are disruptive and dangerous to themselves and others, and children, who by overdosage, are kept in a chemical straitjacket," Breese explained.

# Udall, Colby to be featured in foreign policy colloquium

by Jaci Hughes  
Staff Writer

Former CIA Director William Colby and Rep. Morris Udall will speak at UNC this semester as part of the 1977 Colloquium on International Affairs.

The colloquium, entitled "America's Emerging Role in an Uncertain World," is designed to "help students to think critically about those issues which are important to the vitality and identity of our nation," Nick Herman, co-chairperson of the colloquium, said.

Herman and Bert van der Vaart, a Rhodes scholar, began planning the colloquium in the fall of 1975.

Topics are divided into two areas: foreign policy regions and foreign policy issues. Panelists will address the political, economic and military questions in the Middle East, Latin America and Japan in the foreign policy regions segment of the colloquium.

Panelists and speakers will discuss "Conceptual World Order and Moral Issues," "U.S.-Soviet Relations and Detente," "Oil Politics," "Multinationals," "Atomic Control and SALT," "NATO," "International Law," "U.S.-China Relations," and "Carter Foreign Policy."

"Only public awareness of our world situation can lead to a renewed and definitive sense of America's role in global politics," Herman said.

Van der Vaart said that the format of the colloquium this year will allow more students to attend the programs.

"The colloquium will adopt a new approach by spreading out its program activities throughout the spring semester. Major speakers will be scheduled between two or three week intervals, with panels and minor speakers coming in between major events," he said.

"The flexibility of this approach will assure greater ease in scheduling speakers, and most importantly will allow a greater utilization of existing resources and visiting lecturers," Van der Vaart added.

Another important feature of the 1977 Colloquium is the unique way in which it is being financed. "What we're doing is cost sharing," Herman said.

Herman said that in cost-sharing the colloquium puts up half of the money for a speaker and the other half is supplied by a department at the University that has an interest in that speaker.

The program will begin Feb. 17 and will continue through April 21.

Morris Udall William Colby

### 1977 COLLOQUIUM ON INTERNATIONAL AFFAIRS

TOPIC	SPEAKER	DATE & TIME	PLACE
International Law	Panel	2/14, 15, 16 (tentative date)	Union 202-04

# NSA speaks your language

We'd like to think that those of you who have studied Slavic or Asian languages could challenge the accuracy of the above translations. If you can, you may also qualify for a career at the National Security Agency.

Career opportunities now exist for candidates who are skilled in either Slavic, Asian or Near Eastern languages. Those selected will be able to provide a valuable service in the production of national defense intelligence.

The National Security Agency offers a variety of challenging assignments for language majors — translation, transcription, area research projects to name a few. Newly-hired linguists receive advanced training in their primary languages and can anticipate many years of professional growth within the NSA Language Career Development Program.

Intellectual challenge is part of NSA's language too — plus attractive surroundings in our suburban Maryland headquarters — salaries that start at the GS-7 level for BA graduates — and all the usual benefits of Federal employment.

United States citizenship is required.

**Schedule an NSA interview** through your Placement Office.
