## University has enough winter fuel

UNC should have enough fuel resources to get it through the winter satisfactorily and not face the drastic shortages that plagued many schools and industries in the nation last winter, University officials say.

The campus uses coal to meet nearly all of its energy needs, says William Finnegan, director of purchasing and stores, as it is in more abundant supply and is cheaper for the University to use.

UNC also has approximately one million gallons of fuel oil in storage, Finnegan says.

Coal costs, like those of other fuels, have risen

sharply over the last several years. The price UNC pays for a ton of coal has increased from about \$9 in 1972 to as high as \$54. The present cost is around \$30 per ton.

There may be a slight increase in UNC's purchases of coal this year because of some spot purchases.

UNC buys its coal from three different sources in Kentucky.

Only a small amount of natural gas is used on campus, Finnegan says. Some natural gas is used in labs but none is used for heating.

## Claims voters not heard

Mary Riggsbee, a lifelong resident of Carrboro, is running for the Board of Aldermen because she believes the present board is not representing the town's voting residents.

Riggsbee says the board has been listening to the citizens of Carrboro, and then voting against their suggestions.

She was an organizer of the Allied Citizens of Carrboro, which she said was formed after the 1975 election with the purpose of removing the members of the Carrboro Community Coalition from the board.

## Riggsbee seeks board seat

Mary Riggsbee, a lifelong resident of Carrboro, is running for the Board of Aldermen because she believes the present board is not representing the town's voting residents.

Riggsbee says the board has been listening to the citizens of Carrboro, and then voting against their suggestions.

She was an organizer of the Allied Citizens of Carrboro, which she said was formed after the 1975 election with the purpose of removing the members of the Carrboro Community Coalition from the board.

"The citizens of Carrboro have voted against supporting a bus system in referendums in 1971, 1973 and in 1976," Riggsbee says. "But this board ignored the referendum votes when they approved the bus system."

The Allied Citizens of Carrboro opposes students voting in local elections, according to Riggsbee, because students usually live in Carrboro for only a few years. Riggsbee said the opinions of students should be represented on the Board of Aldermen, but students should not control the board's composition.

## Spacey star party to be held

The starry-eyed will have a treat in store for them tonight with the advent of UNC's first Constellation Party.

The Constellation Party is sponsored by the Chapel Hill Recreation Department. Morris Davis of UNC's Department of Astronomy will point out major constellations, primary stars and different nebulae from 7 to 10 p.m. at Finley Golf Course.

"This should be just plain fun for people

wanting to know the names of stars, constellations and how the sky appears to move," Morris said.

Morris also will answer questions concerning the wonders and mysteries of the universe.

"This is the first time it's been done here, but I've been involved with numerous other constellation parties," he said.

Interested persons should bring a blanket and meet in the main parking lot at Finley Golf Course before 7 p.m.

## economy

but what is possible.

He says that the government does not know just what to do, and that the economic policies now emerging do not mesh coherently.

"If the administration argues that natural gas prices should be low so consumers won't be hurt, how can it put taxes on petroleum which will cause higher prices?" Waud asks.

"These are two completely inconsistent policies by the same administration," he says.

"If the excess-profit idea is the rationale for putting price regulations on natural gas and for levying taxes on gasoline and petroleum, that suggests there are monopoly elements in the industry.

"We have antitrust policies to deal with that," he adds, citing Rockefeller's Standard Oil Company which was broken up into 37 different firms in 1911 as an example of what antitrust can do.

If excess profit is what is worrying the administration, Waud says the administration should get out of price-regulation and deal with the crux of the problem — monopoly elements in the petroleum industry and possibly in the natural gas industry.

In a shift from the free-market orientation of the Ford administration, Carter is on the one hand keeping price ceilings on natural gas and on the other he is moving towards higher price supports for agriculture.

"Raise prices in one area, lower them in another and help consumers!" Waud asks. "Ridiculous!"

**TV reported stolen from Ruffin lounge**

A television set was stolen Monday from the Ruffin Dorm lounge sometime between 1:15 and 7:45 a.m., according to University Police reports. The set was a Zenith console with a 22-inch screen. Ruffin resident Susan Foster reported the theft.

Ann Mellen, 227 1/2 Millet St., reported a bicycle valued at \$120 was stolen Monday from a bicycle rack near Saunders Hall. The bike, a men's 10-speed, is white with a tan leather seat. It was discovered missing at 2:15 p.m., police said. Mellen reported the bike's chain lock had been cut.

Police said a purse and its contents, valued at \$66, was stolen this weekend from Elizabeth Ann Taylor of 621 Granville East.

## "get sidetracked tonight!"

Buddy Poe, proprietor, says:

"Now that classes have started and everyone has settled in, I would like to welcome all of my old friends and newcomers, alike, to my place for cold draft on tap for 1/2 price — from 9 to 10 nightly — and to let everyone know that Sidetrack is the same clean place and operating with the same high standards I opened with in April.

## Direct viewing dangerous

# Town in path of partial solar eclipse Wednesday

A partial eclipse of the sun will be visible in North Carolina between 4:30 and 6 p.m. Wednesday.

Jim Manning, assistant director of the Morehead Planetarium, warns anyone seeking a glimpse of the eclipse to avoid looking directly at the sun. Eye damage and blindness might result, he says.

"The sun is always dangerous to look at directly because of its intense brightness," he says. "But during eclipses, people are sometimes tempted to ignore the discomfort and watch it. To do so is to risk one's eyesight, and should be avoided."

Viewing the solar eclipse through sunglasses or layers of developed color film is also unsafe, Manning says, because such methods do not always provide proper filtering of the sun's rays.

Manning suggests the following

method of watching the eclipse: Punch a pinhole in a thin cardboard sheet and, with your back to the sun, view the image projected through the hole on a second sheet held a few feet from the first.

"What you'll see is a round image of the sun with the appropriate part eclipsed," he explains.
