We're the Professionals

With everyone claiming that their prices are lowest - prices are going to be about the same everywhere. What we offer you in addition to guaranteed lowest prices is the professional knowledge and experience in helping you select the best components to meet your needs, as well as in-store service by professionally-trained technicians.

Before we select to sell a product our technicians evaluate it for performance and quality. But that's not enough for Stereo Sound. We also evaluate the product on its value as compared with other components on the market.

Onkyo's new TX2500 MK II receiver represents both excellence and value. It's hard to improve one of the best receivers in the business with its Servo-locked tuning and Accutact control, but Onkyo found the way by advanced styling and increased power for added value.

40 watts per channel, minimum RMS, at 8 ohms both channels driven from 20 Hz to 20 kHz, with no more than 20-30,000 Hz (±1 dB) and low S/N Ratio, plus lots more that's new.
