It took a lot of sole searching to come up with this boat shoe.

We did a lot of soul searching before we decided to make boat shoes. We were already up to our ankles, you might say, making the best boots and hand sewn shoes on land. But after we decided, that's when the real sole searching began.

We tried a lot of soles that missed the boat before we came up with a specially designed Vibram® sole. One that holds fast and really lasts. And after we'd gone overboard making such a fine sole, we made the whole rest of our shoe just as good.

We took fine waterproof leathers that stay soft and supple even after you dunk 'em in salt water. We added nylon stitching to resist rot, mildew and stress. Eyelets that were all solid brass. And a padded leather collar that really snuggles up around your ankles.

New Timberland boat shoes. Now the folks who make the best hand-sewns on earth make the best hand-sewns on water.

The Shoe

Timberland

The Sole

A whole line of fine leather boots and shoes that cost plenty, and should.
