Williamson challenges channel

By **CHIP WILSON**
DTH Staff Writer

Swimming the English Channel is more than a test of muscular endurance or swimming ability. It is also a test of the mind.

That's the way David Williamson, a writer for the UNC News Bureau, said he felt about his two attempts to swim across the 20.5-mile stretch of water between England and France.

Williamson returned Tuesday from England, where he made his most recent attempt Aug. 9.

"The most difficult thing about it is psychological," Williamson said. "The first time I tried it (three years ago), I stopped because of the frustration. After I had been in the water for seven hours, the men in the boat told me I was five miles from shore. After eight hours, they said I was six miles from shore."

Williamson said seasickness prevented him from completing his second attempt. Still, he said he found himself engaged in mental conflicts while in the 59-degree water.

"After throwing up about 35 times, I asked myself, 'Why the hell am I doing this?' But the moment I got out of the water I was thinking, 'Why the heck did I get out?' It really affects your mind."

Williamson said that 225 people have completed the swim across the channel. "Probably four times that many have attempted it," he said.

In addition to limber muscles and a sound mind, swimming the English Channel requires a large pocketbook, Williamson said.

"The price of hiring a boat ranges between \$1,000 and \$1,300," he said. "I used some of the local fishermen who were familiar with the channel and the currents."

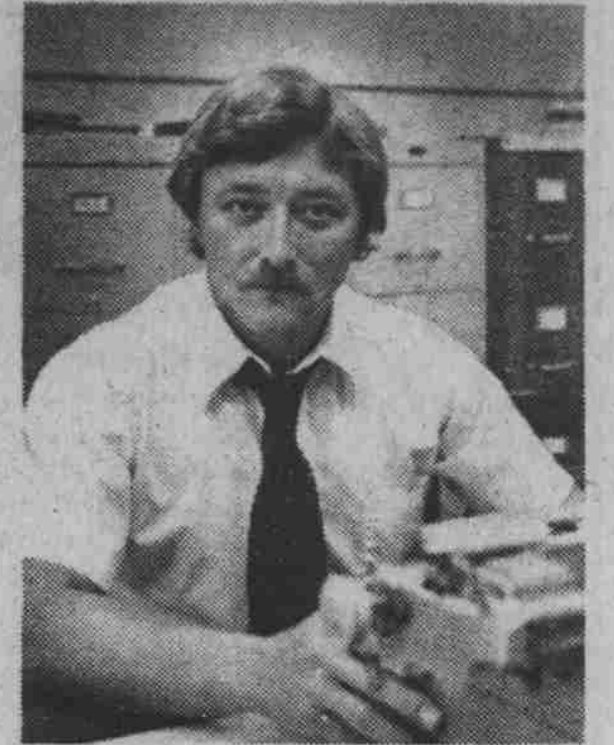

The distance itself wasn't his biggest problem, he said, since he had gone that far during training.

"It's a lot different in the Channel. I had to swim against a current that flowed in an S pattern. In my first attempt, I know I completed the actual distance, but I never made it because I kept moving parallel to the shore."

A few onlookers and British reporters watched while Williamson started his swim from a shore between Dover and Folkestone, England. Most of the publicity that day went to American twins who tried to swim the Channel using the butterfly stroke.

"They were in the water for an hour, and only completed three or four miles," he said.

Williamson plans to try again. "Maybe the year after next. I don't like to start something and not finish it."

David Williamson

Williamson practiced for his swim by working out in pools on the UNC campus and at Duke, where he previously worked.

ONCE YOU PLAY PIONEER VIBRATION-FREE TURNTABLES, YOU'LL SKIP THE REST.

PL-100
Auto-Return Belt Drive Turntable
Wow and flutter (no more than 0.045%), auto-shut-off tone arm system. 6866-929-0.

PL-200
Direct Drive Turntable
Direct drive turntable with ultrathin, "stable hanging rotor" DC/FG servo motor, high-precision automatic tonearm return/shutoff. 6866-054-7.

PL-400
Direct Drive Turntable
Automatic quartz-PLL DC direct drive turntable with fully automatic play, return, stop and repeat. 6866-055-4.

syscom 3000

IT TAKES AN EXPERT TO MATCH UP THE RIGHT HI-FI COMPONENTS. PIONEER IS AN EXPERT.

Amplifier SA-510: Continuous average power output is 30 watts per channel at 8 ohms from 20Hz to 20kHz with no more than 0.03% total harmonic distortion.

Tuner TX-610: FM usable sens. Mono 10.3 dBf (1.8uV).

Turntable PL-250: Semi-Auto Direct Drive. Wow and flutter 0.025%. S/N (DIN B) 75dB. Incl. Pioneer Mag. Cartridge. P.C. 135.

Cassette Tape Deck CT-F615: Wow and flutter (WRMS) 0.06%. Freq. Resp. Metal 20-18kHz S-N Dolby on 68 db.

Speakers CS-510: Bass reflex 10" woofer, 3" mid-range, 2" Tweeter (cones). 30-20kHz Sens. 91dBW (1m). Max input Power 60 watts.

Audio Cabinet CB-510: 20"Wx16-5/16"Dx 37-3/16"H. Walnut grain vinyl cabinet.

PIONEER RECEIVERS HEIGHTEN FIDELITY. NOT COST.

SX-3400
AM/FM Stereo Receiver
15 watts per channel, minimum at 8 ohms. Both channels driven from 20-20,000Hz with no more than 0.08% total harmonic distortion. 6866-057-0. **1199**

SX-3600
AM/FM Stereo Receiver
30 watts per channel, minimum at 8 ohms. Both channels driven from 20-20,000Hz with no more than 0.08% total harmonic distortion. 6866-052-1. **1699**

SX-3700
AM/FM Stereo Receiver
45 watts per channel, DC power amp., 2 tape decks, 4 speaker capability. 6866-051-3. **2199**

CT-F550
Stereo Cassette Deck
4-track, 2-channel, metal tape capability, dolby noise reduction. 6866-056-2. **1199**

NOW, YOU DON'T HAVE TO SPEND LIKE AN AUDIO BUFF TO HEAR MUSIC LIKE ONE.

Promusica 80
2-Way 2-Speaker System
8" woofer, 35-20,000Hz, bass-reflex type enclosure. 20W maximum input power. 6866-927-4. **3990** Each

Promusica 120
3-Way 3-Speaker System
10" woofer, 30-20,000Hz, 60W maximum input power, bass-reflex type enclosure. 6866-050-5. **6990** Each

SE-205
Stereo Headphones
Dynamic type stereo headphones. Adjustable headband. 6866-027-3. **2490**

CD-312
Cadenza Speakers
12" woofer, 30-20,000Hz frequency response. 160W maximum input; 80W nominal input. 6866-919-1. **9990** Each

SE-450
Stereo Headphones
Black and chrome modern design with adjustable headband. High frequency range: 20-20,000Hz. 6866-060-4. **2990**

SE-550
Stereo Headphones
Lightweight, modern black and chrome design with adjustable headband. Long 9-ft. 10" cord. High frequency range: 20-20,000Hz. 6866-061-2. **1697**
