## Price index records low increase

**The Associated Press**

WASHINGTON — Consumer prices, paced by tumbling mortgage rates, inched ahead at an annual rate of 2.1 percent in September, the smallest increase since spring, the government said Tuesday.

President Reagan hailed the report as a sign his administration was "clearing away the economic wreckage" of the past, but private analysts said the weak economy was responsible.

The report on the Labor Department's Consumer Price Index said inflation was running at an annual rate of 4.8 percent in the first nine months of the year. That matched the level for all of 1976 and raised the possibility that inflation for all of this year would come in at its best pace in a decade.

In a separate report, the department said Americans' inflation-adjusted average weekly earnings declined 0.3 percent in September, the same as in August.

The report said inflation-adjusted average weekly earnings in September were 0.9 percent below the September 1981 level.

Meanwhile, the Treasury Department announced Tuesday that the deficit for the just-ended 1982 fiscal year reached a record of \$110.7 billion. That topped the old red-ink record of \$66.4 billion in 1976.

Reagan, campaigning for GOP congressional candidates, seized on the inflation report as good news for the economy.

He told a rally in Raleigh that inflation is "back to where it was in January of 1977, when Gerald Ford left office."

But House Speaker Thomas P. O'Neill, D-Mass., contended the figures were "nothing to brag about."

He said they resulted from the worst recession since the 1930s and added: "Of course, prices are not rising as fast as they were; no one is buying anything."

Private economists, too, said the weak economy, abundant grain supplies and the

worldwide oil surplus were chiefly responsible for keeping this year's increases in consumer prices well under the 8.9 percent of 1981 and 12.4 percent of 1980.

"We are achieving a major victory on inflation," said Allen Sinai, senior economist at Data Resources Inc. in Lexington, Mass. "The costs of that victory are quite sizable," he added, noting unemployment is at its highest rate, 10.1 percent, since 1940.

Donald Straszheim, economist at Philadelphia's Wharton Econometrics, said, "The essence of the inflation improvement is captured in unemployment going one way and inflation going the other."

In its report, the department said consumer prices rose a seasonally adjusted 0.2 percent in September, matching the gain of April. Those prices climbed 0.3 percent in August.

If prices went up for 12 straight months at last month's pace, the yearly increase would be 2.1 percent after seasonal adjustment.

WASHINGTON — The Palestine Liberation Organization is willing to negotiate with Israel but will not recognize the Jewish state or allow anyone else to represent Palestinians in Middle East peace talks, the PLO's official spokesman in Washington says.

"The question of Palestine is exclusively a matter for the PLO to decide on," said Hasan Abdul Rahman, ruling out any agreement with Jordan to take on that role.

Rahman said in an interview Monday that while Jordan, as a party to the Arab-Israeli conflict, should participate in the now-dormant negotiations, the PLO will not "authorize anyone to negotiate in its behalf."

Rahman said King Hassan of Morocco informed President Reagan at his White House meeting last Friday that "the only party that has the right to speak for the Palestinians is the PLO."

U.S. hopes for an agreement are centered on persuading King Hussein of Jordan to join the stalled talks, and PLO chairman Yasser Arafat has been meeting with Hussein. Under Reagan's Sept. 1 proposals, the 1.4 million Palestinian Arabs living under Israeli-rule on the West Bank of the Jordan River and in Gaza would be granted self-rule "in association with Jordan."

MADRID, SPAIN — Felipe Gonzalez, expected to lead the Socialists to power for the first time since the civil war nearly 50 years ago, told a cheering campaign rally Tuesday night

that Spain needs a government that will "protect us from military coups and terrorists alike."

At the end of a three-week campaign marked by rumors of coup plots and unusual military maneuvers, army units began taking up positions around the country in accordance with security measures planned for the national poll Thursday.

King Juan Carlos met with outgoing Premier Leopoldo Calvo Sotelo earlier Tuesday and scheduled a meeting for today with the leaders of the five major parties. The 44-year-old monarch has met during the past week with bankers, businessmen and military officials in an attempt to allay concern about the predicted Socialist victory in general elections Thursday.

Elections had been scheduled for March 1983, but were moved up when Calvo Sotelo's government fell apart in August because of defections from his Union of the Democratic Center coalition.

DENVER — A second person in the Denver area fell ill Tuesday from taking Excedrin capsules poisoned with mercuric chloride, and company officials ordered all Excedrin capsules removed from Colorado store shelves.

The Colorado Health Department, following Bristol-Myer's example, urged retailers at midday Tuesday to remove Excedrin capsules from sale.

Also on Monday, a Grand Junction woman returned a bottle of Anacin capsules because she thought they looked strange. Authorities later said they found evidence of warfarin, a rat poison, in the capsules.
