100,000 RADIO OPERATORS MUST PROVE CITIZENSHIP

WASHINGTON, D. C.—The Federal Communications Commission ordered approximately 100,000 radio operators holding United States licenses, including amateurs, to furnish proof of their citizenship before August 1. The action of the commission was one of the first steps taken to ferret out of the communications system any fifth columnists who may have slipped in through flimsy proofs of citizenship.

Fleming, Administrator of the Wage and Hour Division of the Department of Labor, reported that one-fourth of the sawmills and lumber concentration yards inspected in the first three days of the division's nationwide drive for compliance in the lumber industry appear to be violating the Fair Labor Standards Act of 1938.

SOMEWHERE THERE'S A WAY

Walking one day by the side of the road I saw an ant with its tiny load hurrying along, as if he knew the hour was late and so much to do. Turning, twisting and circling about the little worn trail wound in and out. Till it led at last to where there lay a wind-blown branch right across the way. Puzzled a moment, he stopped to see just where an upward path might be. Through the leafy maze, but to fall each time. Still bearing his burden, he turned about. To find the trail that led down and out. Then, under his bough, across the road. He hurried on with his tiny load. And I said to myself as I watched him go, "O here is a truth all men should know. That, wherever the road, this thing is true: We may find a way, under or over or through."

Chain Stores Are Supporting Dairy Month In Carolinas

NORFOLK, Va., May 28.—Efforts to increase dairy product consumption and to help the growing dairy industry of the south during National Dairy Month in June will be supported in Georgia and the Carolinas. T. E. Thompson, managing director, Southeastern Chain Store Council, announced here today. He declared that the acquainting of the public with the healthful qualities of dairy products, as well as the economics to be enjoyed by using more of them on family menus, would undoubtedly be instrumental in developing greater consumption and larger local markets. "An increase of a bottle per day in her family consumption," he pointed out, "would mean a larger percentage increase in fluid milk sales, and would also be productive of improved health conditions." In his opinion, Mr. Thompson said, the consumption of ice cream, butter and cheese could and should be greatly increased during the month-long campaign for promoting dairy products.

Prudential Life Printing Is 100 Per Cent Union

The Prudential Life Insurance Co., with its home office located at Newark, N. J., employs more union printers than any other establishment in that city. In place of the union label the company uses the imprint "Prudential Press" on all its printed matter. Typographical Union No. 103 requests that the printing of this company should not be returned with a sticker attached, as it is annoying to one of the best friends of the organization in that jurisdiction. Remember that all Prudential printing is done under strictly union conditions, in one of the finest and most sanitary plants in the country.

Many motorists feel like Rip Van Winkle these days when he drives back through the towns and villages he knew as a boy. The old familiar roads, homes, stores, and even the people seem to have changed.
