We also publish an article on the first page on the possibilities of the South. All these original articles are prepared especially for this paper at our expense. A number of strong writers have been engaged to write for us, and they will be heard from during the year.

Our correspondent from Washing ton City says that, "the new Repub lican officials are very prompt in getting swora in , so as to let their salaries begin. Then they take their own time about beginning to work. I was forcibly reminded e this when Robert P. Porter, editor of the New York Press, turned up here two days after he was appoints ed Superintendent of the Census, was sworn in , rushed down , caught on an afternoon train and returned to his private business in New York city. By the way, Porter, who i one of the most rabid advocates of : protective tariff, is an Englishman. and is said to have written just as rabidly in favor of free trade unit he was bought over by the proteetionists. If Mr. Cleveland had appointed an Englishman to as im portant a position as this all the Re publican papers in the country would have been yelping at him and charging him with all sorts of crimes But then you see it makes a grea difference whose ox is gored."
