DRENKING A FARM.

Germans. The woman and the AND HE DID IT AT THE RATE OF A HUNDRED SQUARE FEET A GULP.

My homeless friend with the chromatic nose, while you are stirring up the sugar in the ten-cent glass of gin, let me give you a fact to wash down with it. You say you have longed for years, for the free, independent life of a farmer, but have never been able to get enough money together to buy a farm. But this is just where you are mistaken. For several years you have been drinking a good improved farm at the rate of one hundred square feet at a gulp. If you doubt this statement figure i out yourself. An acre of land con tains 43 560 square feet. Estimating for convenience the land at \$13.56 per sere, you will see that it brings the land to just one mill per square foot, one cent for ten square teet. Now pour down the fiery dose and imagine you are swallowing a strawberry patch. Call in five of your friends and have them help you gulp down the 500 foot garden. Get on a prolonged sprie some day and see how long a time it requires
