FMOCRAT

SCOTLAND NECK, N. C., THURSDAY, MARCH 21, 1895.

FOR THE DEMOCRAT. CHRISTIANITY AND THE WAR.

China is to be Benefitted.

By Rev. N. H. D. Wilson.

Many of your readers, doubtless, wh are hearing day after day the rumors of war from the far East, have asked "What effect will this have on the civ ilization and religion of these nations? Rev. H. Loomis, Agt. American Bible Society, writing from the ground Itself Japan, gives an answer which I beg leave to condense and quote for th benefit of your more thoughtful readers. He says in substance :

"It is too early to foretell what wil be the result. As far as can now be seen, it will give precedence to advanced ideas in civilization and religion like nothing else. The anti-foreign and unprogressive spirit will be buried out of sight, and the life and teaching of Him who is the Light of the world will Norfolk Virginian. be studied and followed as never before. This does not mean, however, that Japan is to become a Christian nation at once. But it does mean that as nation they are facing toward the Sun of Righteousness, and the thoughtful ruling men no longer look with tavor And every purblind passion that had brighter outlook for the future and greater responsibility for the use of the wisest and most effective means of evangelizing the people. This is now an imperative duty, and the religious future of the country depends upon the efficiency of the men and means now being used to spread the knowledge of

But not to Japan alone is this a momentous struggle. It means, as far civilization for Korea. No one who has closely watched the conduct of Japan can doubt but that it is her purpose to make an end of the wretched state of political corruption that has so long cursed and impoverished that unfortunate people. And when the obstacles were found to be too great for Those clearer thoughts that are unto the men engaged in the work of reconstruction, one of the first statesmen of Japan was appointed to take charge of this most difficult and important undertaking. And so Count Inouye with two Christian associates has gone to Korea to fully establish a new and better order of things. No better man could have been found for such a position, and his appointment means that this country is determined that her demand for a better order of things in Korea is not to be thwarted for the want of competent men to carry it out.

Christ and his salvation.

And whatever way the war may end it is likely to be a benefit in the end A specialty of Bracket and Scroll farm and let the old world go its own to China. Nothing but the most crushing defeat, the complete humbling of the native pride, and the enforced conviction that other nations are not only their equals but superiors will ever arouse that people from their lethargy and convince them that their land is not the center of the universe and the most favored spot under heaven. Such a revolution in the public mind will be costly, but it will in time lift the veil of pride, prejudice, and error and open the way for a better day than he Land of Sinim has yet known.

> But the best and most wonderful esults seem to be the help that is likely to be given to Christianity. The sick and wounded Chinese prisoners were filled with astonishment at the kindness which they had received, and so when I brought them copies of the Scriptures they were evidently greatly pleased to receive them. Among those at Hiroshima was a colonel who was a bright fine-looking man. Some one had al ready given him a copy of the New Testament, and he had read nearly onehalf of it. He expressed by his action as well as by his words that he was deeply grateful for the gift, and said that he believed much of it. He wil Christianity from the missionaries in China, but it had never come to him

it he knew the meaning of that emblem he replied that he did, and that Christianity was the origin of the care and

These men came from various provinces, and when they go home will tel that instead of torture and death at the hands of their foes they had experienced such kindness and attention as could not have been received among their own people. The story of such treatment cannot but be helpful in opening the hearts of the people toward all foreigners, and thus preparing them to receive the teachings of Christ. And thus while war is scourge to be dreaded, and the suffering and death of thousands the penalty to be paid, yet God is evidently overruling all for the spread of his kingdom and the glory of his name."

comfort which they received.

"The American Society Young Man."

It is not a belief that the American young man in society is inferior in any respect to the young man of like class in Paris or Rome, and yet a society young man of New York makes the assertion, that because he is inferior is a reason why so few very rich American elevate and purify the hearts and lives in wealthy society seldom or never Spurs us in vain and, weary of the of the people. This means, then, to meet young Americans, except of their and successful young men in that set

are not common." some cases, but as a rule it is not so. The young American reared in polite society is the peer of all others in graciousness of manner, and it is unfair to that class of American young men to

say otherwise. It may be that the society girl meets only society men as a rule, and that they are rarely brought in contact with the men who are great and useful and famous, but it is not true that the society young men of America are lacking in manners and polish, which characterizes their European brethren of the same school to that extent that one of their number declares. It may not be pleasant reading for some of them, but the fact is, there is a lurking suspicion that one of the chief reasons, if indeed not the chief reasons, if indeed not the chief reason, why some American girls in society marry foreigners, is the craze after some sort of title without regard to character or refinement or manner and generally the lamentable result of such alliances is a fit retribution to such matrimonial folly.

Mystery of Seed Germinating.

New York Independent.

It has been long a mystery why seeds vary in their time of germinating. Though sown at one time, all from the same package, all at an equal depth beneath the surface-and indeed with very condition exactly the san many days, and in some cases weeks will elapse between the appearance o some plants and others. Indeed, in the case of some trees one half the seeds may perhaps grow in the spring of the year, while the other half wil lie over in the ground till the following spring before growing.

Some explanation of this has recently did not manufacture it to get even." been made by the Agricultural Science The more near maturity a seed may be before it is gathered or falls from the parent, the longer time it requires for germinating. A German experimenter, M. Holter, used for the purpose barley

barley taken from the same storing. Red Cross Society. When he was asked facts are to be referred.

COULD HAVE A WAVE.

LAKE MICHIGAN COULD RISE UP AND SURPRISE CHICAGO.

All It Neses is an Earthquake to Set It a Going.

"Apropos of the recent Atlantic tidal wave," said an ancient mariner to a Chicago Tribune man the other day, an account of one nearer home might be of interest at this time. It isn't necessary to have an ocean of water to produce one of these waves by long odds. Old Lake Michigan could get up a prime article in that line and unthought of. All that would be neclake and then there would be from six to ten feet of water here in no time. The story that I started to tell you has an earthquake as the prime cause, a tidal waye as the immediate effect, and He turned it over. Beneath it was an a ruined town was the result.

the year 1811. The whole Mississippi this time he became very much inter valley was affected. The center of violence was at Little Prairie, near New Here was a wooden box, decayed Madrid. The vibrations were felt over which crumbled from touch. on the systems that have prevailed so girls marry American young men. He the Ohio valley as high as Pittsburgh. long in the land and have failed to makes the statement that young women New Madrid suffered more than any other town on the Mississippi. At that time Indians were dangerous and the the workers in Japan a larger and own set, and that "stalwart, self-made persons engaged in carrying produce in boats to New Orleans kept in company Now just why this American society December 16 there was a terrible shock young man should suffer in comparison and jarring of the boats so that the with young men of the same class of crews were all awakened and hurried Europe is not altogether clear. The on deck, thinking of an Indian attack. theory advanced by the young Ameri- The noise and commotion were dreadcan, is that the European man has ful, but soon stopped. In the morning made a study of manner all his life and loud roaring and hissing were heard he charms the young woman of dollars and there was a tremendous boiling up by his genumeness and refinement of the waters of the Mississippi in huge which is lacking in the young society swells, tossing the boats about so vioman of America. This may be true in | lently that the men were thrown about on the decks. The water in the river changed to a reddish hue, then became black with mud thrown up from the Bottom, while the surface, lashed by the agitation of the earth beneath, was covered with toam, which, gathering into masses the size of a barrel, floated

along the trembling surface. "The earth opened in wide fissures, and closing again threw the water, sand and mud in huge jets higher than the tops of the trees. The atmosphere was filled with a thick vapor of gas. At New Madrid several boats were carried by the great waves up onto the bank of the river just above the town and were left high and dry a considerable distance from the water. Many boats were wrecked on the snags, while others were sunk or stranded on the sand bars and islands. The scenes for several days during the repeated shocks were horrible. The sulphurated gases discharged tainted the air with noxious effluvia, and so strongly impregnated the water of the river for one hundred and fifty miles below that it could hardly be used for any purpose for

many days. New Madrid, which stood on a bluff twenty feet above the summer floods sunk so low that the next rise covered it to a depth of five feet. The bottoms of several lakes in the vicinity were elevated and have since been planted with corn. People lived along the river in those days more than in the country, so the big water disturbance did probably more damage than the 'shakes' where there was no water. So you can easily see how there can be a tidal wave without an ocean and that we may have one of our own some day. When it comes it should be a good one, so those eastern people will be satisfied we

The Discovery Saved his Life.

Mr. G. Caillouette, Druggist, Beaversville, Ill., says : "To Dr. King's New Discovery I owe my life. Was taken with La Grippe and tried all the phytaken just before fully matured, and sicians for miles about, but of no avail and was given up and told I could not The earlier matured seed sprouted in live. Having Dr. King's New Discovthree days, while it took ten days for ery in my store I sent for a bottle and fully ripe seed, and thirty days for tegan its use and from the first dose plants to appear from seed that had began to get better, and after using matured by storage. It is thought three bottles was up and about again. that more sugar is formed during ma- It is worth its weight in gold. —A St. John Adcock. Happiness on the Farm.

A prosperous farmer was in the office

What stars are to the night.

of an exchange recently, discussing the events of the past year, the financial panic, the unexampled business depression, the industrial unrest and the progress of a rebellion against the gov ernment, which, if not arrested, would end in civil war. "Well, he said, as he arose to go, "I am going back to my gait. I am happy there. Nothing disturbs me. In the worst year that can come I will have plenty to support my tamily. I will have my books and papers and know what is going on outside, but I am safe. Panics and trade revulsions do not affect me at all, and even a revolution would hardly disturb me in my quiet nook." Now, bright people have been cudgeling their brains to make out a picture of the future Utopia. But is there anything, even in the dreams of visionaries, that much nearer to a condition of material happiness than this? Hardship and struggle are there and everywhere. Life without struggle would be worthless
