HISTORIC HOUSE.

Morning Post quoted in Louisburg fimes: Over in Franklin county near Louisburg, stands nouse where the first conference of the M. E. church in America was held. It was April 20, 1785, and the house was then owned by Mr. Green Hill, a pi neer in Methodism.

In the February number of the American Illustrated Methodist Magazine there is a very interesting article written by Rev. Dr. T. N. Ivey, of this city, telling of this house and the first conference held in America. It is written in Dr. Ivey's own fluent and attractive style.

By the way, the Methodist Hand Book and Almanac just issued by Dr Ivey contains a splentid half-tone cuof the Green Hill house.

During the year of 1892 or 1893 the Times published a full history of the 'Green Hill house' including an account of the first Methodist conference held, &c., which was read with much interest by a large number of people of the State.

"Some people claim that the hawk is naturally a coward, but Dal Smith knows better. He has been troubled to a considerable extent by hawks, and has lost about half his chickens in that way. Finally he decided to keep a loaded gun in his barn and lie for them. On this particular day, I think it was last Thursday, he came across a big fellow feasting on a chicken that it had killed back of the barn. Smith sneaked back, got his gun and blazed away. The hawk was only wounded and was full of fight. As Smith approached it the bird flew at him furiously, flapping its wings and fastening its beak in his heavy boots. Smith beat it off, but not without a fierce struggle. He hnally killed it and the bird measured nearly six feet from tip to tip of the wings."

The Wastefulness of Our Peo 1.

There is economy in doing lings on a large scale. The children and sheltered and fed less expensive on these large aggregations than they coald two or three at the time in sorarate families. Five farmers invest money in five reapers when on a chine would have done the reaping for all. In a town like Gastonia there is something like \$15,000 invested in cooking stoves; half the number - ould by giving a healthy blood supply to do the cooking for all, with less tuel, and last just as long. There are tens of thousands of dollars in Gaston ings. Botanic Blood Balm cures all county invested to sewing machines which stand idle over nine hours of every ten.
