CHEAP, DURABLE ROUGHAGE RACK. waste material becomes considerable it is forked out into the yard and is worked into the manure.

This rack is six feet wide and is built on posts of the same length. It can be built as long as need be. As will be noted, a considerable roughage stuff has been used in making the rack. This is a good point, inasmuch as many farmers have plenty of material about that is good for little else except for purposes of his kind. Such a rack as this is very simply made. and is worth several times its cost on account of the saving in roughage.

## DAIRY HINTS.

Never tell anyone that your butter is not "quite so good as usual this Don't make any such buttime." yet.

Keep the cream where no bad smells can get at it. A good stone jar, with a close-fitting cover, is about as good as anything for this purpose.

Cream partly ripened and partly fresh will not churn well together. Have it all alike. When new cream is put into the jar, stir the whole, clear to the bottom, to mix it well.

Don't "guess" at things when you are at work at your butter. Don't make a thermometer of your finger. yard. It looks bad. Don't think you washed your churn out well enough last week to last all winter. You can't collection of memorial tablets, many do it. No matter if you washed it of which have been given by the famwhen you last used it, thoroughly illes of deceased naval officers, and scald it out again this time.-Farm Journal.

Handy Water for the Cow. Water should be handy so the cow does not have to suffer unduly from the weather when getting it. When a herd of cows are forced to go a long distance to drink from a hole cut in the ice of a pond or stream, many ing the coldest weather to allow them er, even when they are given a chance to drink they may not, and as a result fall off in milk production as if the feed supply was short.

Milk of Sick Cow.

When the cow is temporarily out of condition her milk should be rejected. The first few messes after the birth of the calf are unfit for consumption, and so she should go dry for a few weeks before the birth of the next calf for the same reason.

### Beans for Feed.

The damaged or cull beans that accumulate at bean houses form a valuable stock food, says Orange Judd

many times before, but on occasions "I see that the metal bed and spring the commission always has been composed largely of men interested in combine has advanced prices 10 per mendaden fishing.
