HOW TO CURE RHEUMATISM It Is An Internal Disease And Re-

quires An Internal Remedy. The cause of rheumatism and kindred diseases is an excess of urle acid in the blood. To cure this terrible disease this acid must be expelled and the system so regulated that no more acid will be formed in excessive quantities. Rheumatism is an internal disease and requires an internal remedy. RUBBING with Oils and Liniments WILL NOT CURE, affords only temporary relief at best, causes you to delay the proper treatment, and allows the malady to get a firmer hold on you. Liniments may ease the pain, but they will no more cure Rheumatism than paint will change the

fiber of rotten wood. s at last discovered a pe fect and complete cure, which is called Rheumacide. Tested in hundreds of cases, it has effected the most marvelous cures; we believe it will cure you. Rheumacide gets at the joints from the inside, sweeps the poisons out of the system, tones up the stomach, regulates the liver and kidneys and makes you well all over. Rheumacide strikes the root of the disease and removes its cause. This splendid remedy is sold by druggists and dealers generally at 50c. and \$1 a bottle. In Tablet form at 25c. and 50c. a package. Write to Bobbitt Chemical Co., Baltimore, Md. Booklet free. Tablets sent

ROAD WATER DITCH.

Suggestions By a New York Highway Superintendent.

Fred. C. Evans, superintendent of highways in Tompkins County, New superintendents of his county concerning methods and details which shall

Figure No. 1, illustrates his idea of It should be well below the base line of the road and deep and narrow. If

Figure No. 2 shows a ditch which he considers proper for the treatment of a wet, or swampy place. This ditch is for the upper side of the road, and should be broad and comparatively shallow, so that the water will seep be carried off.

Figure No. 3 represents a cheap number of which have already been when writing to Dr. Kilmer & Co., put in on the earth roads of Tompkins County. It is a culvert made of field stones, built over a collapsible form, at the apex of the arch, and temporarily fastened at the bottom by a strip of board nailed across. Under each side of the form is a blocking which, when knocked or pulled out permits the forms to collapse to an extent that forms are made in sections, all on the to the number of sections used.

-12'-0"

The economy of this culvert, according to Mr. Evans, lies in the fact

TO WASH VEGETABLES.

Placed in a Cylinder and Cleaned as Latter Revolves.

How often people are heard to say that they do not eat this or that in actels and restaurants because they le not know if it has been cleaned properly. In the old days, when the process of properly cleaning, this objection was a fair one, but now it has less ground for existence. With the advent of the numerous time and labor saving devices, the food is just as clean in first-class restaurants and hotels as it is at home, and one of the inventions that have brought about this improvement is the vegetable washer devised by a New Hampshire nan. In appearance the vegetable washer looks very much like the paper stands seen on store counters. It comprises a stand on which a helov cylinder rests upon an axis. The vlinder has an opening on one side ed a screw top for the opening. The thole is water-tight. The vegetables

e placed in the receptacle, which is filled with water, the top screwed on Krupp for the entertainment of the ind the cylinder revolved by means if a handle.
