### CAUSE FOR ALARM.

Loss of Appetite or Distress after Eating a Symptom that Should not be Disregarded.

Appetite is just a natural desire for food. Loss of appetite or stomach distress after eating indicates indigestion or dyspepsia. Over-eating is a habit very dangerous to a person's good general health.

It is not what you eat but what you digest and assimilate that does you good. Some of the strongest, heaviest and healthiest persons are moderate eaters.

There is nothing that will cause more trouble than a disordered stomach, and many people daily contract serious maladies simply through disregard or abuse of the stomach.

We urge all in Scotland Neck who suffer from any stomach derangement, indigestion or dyspepsia, whether acute or chronic, to try Rexall Dyspepsia Tablets, with the distinct understanding that we will refund their money without question or formality, if after reasonable use of this medicine, they are not perfectly satisfied with the results. We recommend them to our customers every day, and have yet to hear of any one who has not been benefited by them. We honestly believe them to be without equal. They give very prompt relief, aiding to neutralize the gastric juices, strengthen the digestive organs, to regulate the bowels and thus to promote unhealthy symptoms.

We urge you to try a 25c. box of Rexall Dyspepsia Tablets, which gives 15 days treatment. At the end of that time, your money will be returned to you if you are not satisfied. Of course, in chronic cases length of treatment varies. For such cases we have two larger sizes, which sell for 50c. and \$1.00. Remember, you can obtain Rexall Remedies in this community only at our store—The Rexall Store. E. T. Whitehead Company.

I honestly believe it's the best throat and lung medicine that's made." Easy to prove he's right. Get a trial bottle free, or regular 50c. or \$1.00 bottle. Guaranteed by E. T. Whitehead Company.

Some Oil Spouter. The mammoth gusher of the Pearson oil interests in the Potrero de Llano field, state of Vera Cruz, Mex., was recently allowed to perform for 20 minutes for officials of the Texas company and the Gulf Mining Refining company, according to the Mining and Scientific Press. The gate valve was opened for the first time since the well was brought under control, and a column of oil shot into the air to a height of 420 feet. The flow was estimated at 100,000 barrels daily. With the possible exception of the Dos Bocas gusher, which burned out, the Potrero is the greatest in the history of the oil industry.

Quarantine may temporarily postpone smallpox; vaccination positively prevents it. Which will you have?

Quarantine of smallpox is an uncertain and expensive means of protection; vaccination is a positively certain and inexpensive means of protection.

Quarantine is inequitable. The majority of the people have been vaccinated, and therefore, secure no protection from quarantine. They are already absolutely protected by vaccination.
