That Explains. "Everybody at this performance seems to be a deadhead." "Well, you see, this is what pen artists call the passing show."

Making Paper. The manufacture of wood pulp paper involves 23 separate operations from cutting down the trees to selling the product.

Loud and Soft Pedal. Remember to do your grumbling in a whisper. Save your megaphone for praises—it was invented to advertise good things anyhow.

Cicero on Wit.
There are witty sayings which carry a concealed suspicion of ridicule, of which sort is that of the Sicilian who, when a friend of his made lamentation to him saying that his wife had hanged herself upon a fig tree, said, "I beseech you give me some shoots of that tree that I may plant them." Of the same sort is what Crassus said to a certain bad orator who, when he imagined that he had excited compassion at the close of a speech, asked our friend here after he had sat down whether he appeared to have raised pity in the audience. "Very great pity," replied Crassus, "for I believe that there is no one here so hard hearted but that your speech seemed pitiable to him."—Cicero's Oratory.

The Deepest Hole.
The deepest hole in the world up to date is the boring begun ten years ago at Czuchow, Silesia, with the object of attaining a depth of 2,500 metres, and which has now reached a depth of 2,240 metres (7,349 feet). The bore is 44 centimetres (17 inches) in diameter at the top and diminishes progressively to nine centimetres.

An Eulogy.
A newspaper, in speaking of a deceased citizen, said: "We knew him as old Ten Per Cent—the more he had the less he spent—the more he got the less he lent—he's dead—we don't know where he went; but if his soul to heaven is sent—he'll own the haul and charge 'em rent."

To Clean Gold Lace.
Gold lace and embroidery can be cleaned with powdered burnt alum, applied with a soft brush and wiped off with a soft cloth.

A Strange Likeness.
An extraordinary resemblance has recently been discovered at the London Natural History Museum between a specimen of the huge African elephant and the pygmy shrew mouse. Sir E. Ray Lankester suggested comparison of the two, and the result has been that practically every bone, muscle, blood vessel and nerve of the giant beast has been found identically reproduced in the little animal, which is scarcely two inches in length. In the museum a stuffed mouse has been placed between the fore feet of its enormous mounted prototype for the purpose of showing the curious likeness.

His Wish.
"Life is something of a game after all," said the cynical person. "Perhaps," replied Mr. Meekton, "but I wish Henrietta wouldn't regard it as bridge, with me forever playing opposite as dummy."—Washington Star.
