### REFRIGERATOR CARS.

The First One, Running From Ogdensburg, N. Y., to Boston, Was Voted a Great Success.

The refrigerator car was never invented, but just "fixed up." It was the idea of a New England railway man who needed some such thing as far back as 1851.

In June of that year the first refrigerator car is said to have made its trip from Ogdensburg, N. Y., to Boston. The car owed its origin princi-Ogdensburg, who made a great deal of butter, were unable to ship it except in cold weather.

that time in charge of the through freight, thought it would be a good idea to rig up "an icebox on wheels," and he told this to the president of the road, who gave orders that the mas-

At this time farmers were receiving only 12 cents a pound for their butter. The iced car was loaded with eight tons of it, sent through and allowed to stand in Boston till the product was sold. It brought 17 cents a pound after paying all expenses and commissions, and the plan was voted a success. In a short time the road had a regular service on, using a number of cars, and the idea spread rapidly.

Wilder did not patent his idea, but allowed it to be used by whoever so desired.-St. Louis Republic.

## ODD VOLUMES.

### Club In London.

One of the most unique dining clubs in London is that known as the Sette of Odd Volumes, which was founded in 1878 and meets once a month from October to June. It consists of twenty-one volumes, or members, that being the number of the volumes of the Variorium Shakespeare published in 1821. There are also twenty-one supplementary members, who succeed to fall membership as vacancies occur. The twenty-one rules of the club in clude the following

Any Odd Volume sing his temper and failing to recover it shall be fined by the president the sum of 5 shillings. Discussions about anthropology, religion and politics shall be put down by the president.

Any Odd Volume giving to another Odd Volume unasked advice shall be fined by the president. No Odd Volume shall talk unasked

on any subject he understands. No Odd Volume's speech shall last longer than three minutes. If, however, the inspired Odd Volume has any more to say he may proceed until his voice is drowned in the general ap-

Volumes have to address each other as "Your Oddship."-Argonaut.

# The Major's Tip.

When Major Banks was the best known figure around the race tracks of Cincinnati and the middle west he was extremely generous in tipping off his friends to "sure winners." One man who enjoyed his confidence and played the horses according to the major's advice lost all his ready money and finally succeeded in reducing himself to the point where he had to sell out his grocery business.

One afternoon, following the placing of his last ten dollar note as the major advised, he caught Banks by the arm and said tragically:

family are practically starving. I am now about to go down to the river and drown myself. It's all over for me."

the event you change your mind meet me here at 3 o'clock tomorrow afternoon. I think I'll have something good for you."-Exchange.

# New Heroines.

The novelists of the day are taking the "new" women for their heroines; women whom life has struck blow after blow until they have learned the art of laughter; women who know how to jest in the face of disappointment; women who have a comforting sense

Young and old have them. Some abuse them. They get tired, starved. SYMPTOMS:-Loss of sleep and appetite, indigestion, irritability, eventually wrecked con-

stitution. Alcoholic remedies stimulate only.

#### SMALLPOX OR VACCINATION.

and now! What has wrought the change? All the medical world, all the scientific world know but one answer-vaccination. What is vaccination? Vaccination is one of the simplest surgical operations known. It consists essentially of implanting in the body a small amount of immunizing or anti-smallpox fluid. When one has once had measles or scarlet fever the body usually bebecomes immune to a second attack of the same disease. The virtue or value of vaccination is that it gives even better immunity against smallpox than a previous attack of measles

evented their usual execution, the Many women destroy the beauty taking small on the stitute for clothing. # Vaccination is a Preventive.

Smallpox is the most contagious disease in North Carolina. It is 'catching' from the very first sympkinds of diseases. In the reverence toms to the falling off of the last scab. Infected articles or things that have come in contact with a smallpox patient may transmit smallpox long after the patient has died or recovered. A little over a hundred years ago great epidemics of smallpox broke out, almost wiping out whole families and communities. Europe lost 400,000 lives annually from this loathsome disease. There were at least 350 times as many deaths from this wretched, reeking, rotten disease as we now
