> The Moral. Prof. John Spencer Bassett, author of "A Life of Andrew Jackson," is acsuctomed to illustrate his lectures at Smith college with incidents in Amerlean history. On one occasion he repeated a well-known story in regard to Stephen A. Douglas, closing with a

moral which aroused peculiar interest. Douglas, as a narrative runs, was once sitting in a profound sleep in the corridor of the capitol when Adeline whenever his services Betts, a Washington belle, passed by. She did not know the sleeper, but was

MAN AND THE SOIL.

Dr. R. V. Pierce of Bulialo, author of the Common Sense Medical Adviser, says " why does not the farmer treat his own body as he treats the land he cultivates. He puts back in phosphate what he takes out in creps, or the hand would grow poor. The farmer should put back into his body the fital elements exhausted by labor, or by ill-health induced by some chronic discase." Further, he says, "the great value of my Doctor Pierce's Golden Medical Discovery is in its vitalizing power. It gives strength to the stomach and parity to the blood. It is like the phosphates which supply

nature with the substances that build up the crops. The fur-reaching action of Doctor Fierce's Golden Medical Discovery

is due to its effect on the stomach and organs of digestion and nutrition. Discases that begin in the stomech are cured through the stomach. A bilious spell is simply the result of an effort made by the liver to catch up when over-worked nd exhausted. I have found the 'Discovery' to be unsurpassed as a liver regulator and rich blood-maker."
