NUMBER 31.

GOVERNOR KITCHIN TO CAPTAIN ASHE.

Governor Kitchin Stands by His Statements in His Statesville Speech and Quotes From The Record to Sustain Them.

Captain Ashe's Present Attitude Different From His Record as Editor.

To the Editor of The Landmark:
I had determined not to reply to my article in this campaign unless it should be one from a senatorial candidate. I am making an exception in this instance in order to express the weakness of the letter in your paper of the 13th of Capt. Ashe, who, I understand, holds a position under Senator Simmons in his office.

I desire to congratulate you on the very full report of my speech in your city. I regard it as one of the most accurate pieces of reporting that has come under my observation, especially when it was not taken by a stenographer.

1. The first exception which Capt. Ashe takes and which he regards as inaccurate was as to Senator Simmons' position on cottonseed oil. Capt. Ashe denies he voted for a duty on it. Sen. Simmons made two speeches for a tariff on cotton seed oil—one of them on April 22, 1909, and the other April 21, 1909. He favored this tariff in the interest of the cotton oil manufacturers and said Germany was building mills that would consume 500,000 tons of American cotton seed and that was merely a beginning; that Germany was intending to become a large buyer of our cotton seed and then compete with our oil mills. I charged that this was in the interest of the oil mills for their protection and against the interest of the cotton growers who sell cotton seed, who wanted the buyers possible for their product. I defy Senator Simmons or Capt. Ashe to dispute it.

2. Capt. Ashe denies that Senator Simmons voted for a duty on monazite sand and thorite. I stated he made a speech in favor of a protective tariff on monazite sand and thorite, but failed to vote on it because he was paired with Lorimer. This is clearly shown in the Congressional Record of June 25, 1909.

3. Capt. Ashe says that my statement of Senator Simmons' position for a tariff on tools is inaccurate. On May 24, 1899, the Congressional Record shows that Senator Simmons voted against removing protection on building material, carpenter's tools, etc. The Congressional Record of May 23, 1912, shows that he "accepted" an amendment putting 20 per cent on machine tools. This however, was voted down, only seven Democrats supporting it and 19 against it. The bill to which this amendment was offered had machine tools on the free list.

4. Capt. Ashe says that the statement that the tariff on quebracho, for which Senator Simmons voted, is protective, is unfounded. Senator Simmons himself made a speech in favor of this tariff on May 29, 1899, as shown by the Congressional Record, in which he clearly showed that the tariff was for the benefit and for the protection of the chest-nut oak extract manufacturers.

5. On May 13, 1909, Senator Simmons voted to put a tariff on iron ore when the bill as it passed the House had iron ore free.

6. Capt. Ashe denies that the tariff of 60 cents on coal, for which Senator Simmons voted, is for protection. Senator Simmons in his Charlotte speech, September, 1908, which was printed in pamphlet form, denounced the coal trust and advocated putting coal on the free list. On June 23, 1909, Senator Aldrich appealed to the Republicans who were in favor of protection to vote for the 60 cents rate on coal. The debate shows that it was thoroughly understood that it was to protect

GOVERNOR KITCHIN TO CAPTAIN ASHE.

Governor Kitchin Stands by His Statements in His Statesville Speech and Quotes From The Record to Sustain Them.

Captain Ashe's Present Attitude Different From His Record as Editor.

against his record in my Raleigh speech, in my Greensboro speech or in my Durham speech, in joint discussion with him.

I am glad that Capt. Ashe found no inaccuracies in my remarks upon Lorimer, reciprocity, lumber, pine-apples and the Senator's attitude on the tariff and the farmer. Senator Simmons in his speeches for a tariff on cotton seed oil, for a tariff on monazite sand, for a tariff on quebracho and for a tariff on lumber showed conclusively that he favors a tariff for the benefit of certain industries—and this is all that protective tariff means. In addition to these speeches, he has by various votes shown his protective views. On July 19, 1911, he argues that a protective tariff benefits the farmer. Our State platform declares that protection is a robbery of the many for the enrichment of the few. Our national platform declares that Congress has no constitutional right to levy a tariff for any purpose except for revenue. It endorses the record of the Democratic House and declares that protection does not help the farmer or the wage earner.

Yours truly,
W. W. KITCHIN.
Raleigh, July 17.

More Concerning Good Roads.

North Carolina spent four million dollars on her roads last year with absolutely no State supervision; in some cases competent highway engineers have been employed, but in many cases the money has been expended in a dangerously slipshod way. This is the only State, so far as we know, that is spending that amount in such a careless fashion. In this day of the multiplying motor-car, traffic has grown so far beyond merely local travel that it is to the interest of the entire State to see that the good roads movement does not receive a setback in any locality; where money is spent without adequate return it does receive a decided setback no matter where the fault may lie. But if the State stood ready to furnish expert advice, if not financial aid, the chances of the money being thrown away would be greatly lessened, for it is not graft that is making away with our road funds, but ignorance.

We must have a State Highway Department; sooner or later we must also have State aid, but it is worse than useless to furnish funds without any supervision of their expenditure. With a competent man at head of a department with power to do something, we would have a starting-place from which to prosecute the work; with some system injected into the situation we would know where we are. At present, beyond the incomplete figures that Dr. Pratt has been able to gather in the intervals between his other duties, we have no road statistics—nothing whatever to go on. A highway department could soon give us the information that is so absolutely necessary to any intelligent attempt to improve the roads of the State at large, but without it we are all at sea. We are working in the dark and as often as not striving against each other.—Lexington Dispatch.

A Big Cow Fish.

Beaufort, N. C. July 27.—One of the most curious fish ever caught near Beaufort was captured yesterday morning by Capt. John B. Moore, a boatman from the Inlet Inn. This fish is known as a cow fish and is of the mammal variety something similar to a whale, measured some twenty feet in length and weighed about 2,500 pounds. It was captured right in front of Inlet Inn and was quite a curiosity to the visitors in Beaufort. The Editorial Association from Morehead City, Atlantic Hotel, was brought over in boats to see this curiosity. Captain Moore says that this is quite a curiosity and is a very rare fish. The way it was captured, it came up in shealy water and as the tide fell, it could not get off the shoal and beat itself to death and while in its fury, it would throw water forty or fifty feet high, making a beautiful rainbow effect, to be seen from the Inlet Inn porch, about 7:30 o'clock. Large crowds are visiting this curiosity.

A vast amount of ill health is due to impaired digestion. When the stomach fails to perform its functions properly the whole system becomes deranged. A few doses of Chamberlain's Tablets is all you need. They will strengthen your digestion, invigorate your liver, and regulate your bowels, entirely doing away with that miserable feeling due to indigestion. Try it. Many faulty habits have been permanently cured—why not you? For sale by all dealers.

THE COTTON PROSPECTS.

No Big Surplus of Old Crop and New Crop Will be Late.

Between the arrival of the first bale of cotton in southern Texas on July 2nd and the beginning of the season on September 1st is a period of about sixty days in which the mind of the market begins to be made up on a decreasing proportion of risks and increasing certainties. The time is at hand when definite knowledge of what the old crop will have to spare is available. One thing thus far is certain, that there will be no big surplus anywhere. Another is that because of the late season September-October receipts are apt to be light.

A month or more ago it was held that the South probably had 2,000,000 bales left over. But any one who goes to find it will come out much below his estimate. A trip through the South made late in June and early in July, covering every important cotton State, revealed only a few instances of cotton on railway platforms and then only in small quantities. The fact is that the South has sold out much more fully than most people believe. They have done so because they needed the money for this year's crop, to grow which they borrowed less than usual.

Another factor which brings early new cotton into prominence, beside the general clearing up of the home market, is the early efforts of European buyers to get hold of September and October deliveries. This is the habit of Europe whenever cotton is low. At this time it is paying 12 cents for what cost from 12 down to 9 1/2 last year during these two months. Although their buying may not be so persistent as in 1911, the crop of the current year will move early and liberally if the foreign buyer can get it at what he regards as a fair price. He has already taken 10,283,000 bales of the crop of 1911, and will probably round out 10,500,000 bales by August 31st.

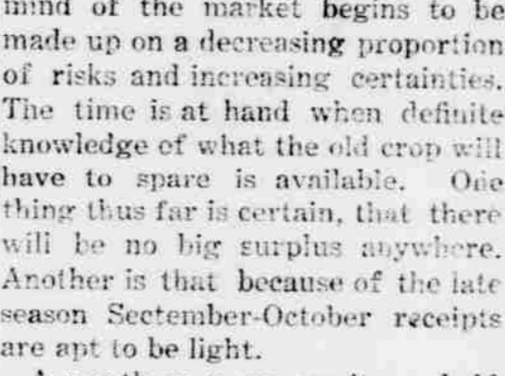

It is the foreign buyer that has helped to clean up the market of spinnable cotton throughout the year. The domestic takings have been less early; but with spinning prices improving early new crop ought to be in general demand. October at 12.20 is only 4 points below January and 6 below December. Last year in September-October 2,430,000 bales were taken at an average export price of 10.4 cents, against 14.2 in 1910 and 13.2 in 1909. This year's price is likely to be nearer the maximum of these than the minimum.—Wall Street Journal.

Sometimes one hears it said that Southern farmers are lazy, but the trouble is that the majority of them are not one-half as lazy as they should be. They will insist on doing twice as much walking as is necessary in cultivating most of their crops. The Yankee farmer gets astride a riding cultivator and cultivates two sides of his corn row at once, and then thinks the Southern farmer lazy, altho the Southern farmer takes just twice as many steps and twice as much of his own time, and twice as necessary if the work were done with improved machinery. Isn't it a case of lazy brains, rather than lazy bodies?—The Progressive Farmer.

The Tries Of A Traveler.
"I am a traveling salesman," writes E. E. Youngs, E. Berkshire, Vt., and was often troubled with constipation and indigestion till I began to use Dr. King's New Life Pills, which I have found an excellent remedy. For all stomach, liver or kidney troubles they are unequalled. Only 25 cents at E. T. Whitehead Co.

Wonderful Cures Reported in Germany.

The use of simple herbs as remedies instead of the more concentrated and usually more dangerous inorganic substances, has been revived very widely of late. In Germany a new school of physicians has arisen which throws out almost a whole of the pharmacopoeia and relies on an adaptation of the method of wild animals in curing themselves. . . . N. Y. World.

J. D. MATTHEWS, ESQ.

T. DONALD MATTHEWS, of Oshing, N. Y., says: "I suffered for over five years with what the doctors told me was a dilated condition of the stomach, associated with a catarrhal condition of some, and nervous heart. I had tried quinine, nux, bismuth, gentian, rhubarb, etc., to float a ship and naturally thought, there was no cure for me, but after reading what eminent doctors said of the curative qualities of the ingredients of 'Golden Medical Discovery' I gave it a fair trial. 'Bless the 'Discovery' and also the 'Pain-Expeller' and can truthfully say I am feeling better now than I have in years. I cheerfully give permission to print this testimonial, and if any 'doubting Thomas' writes me I will 'put him wise' to the best all-around medicine in the country to-day."

What Cholera Costs.

If statistics were prepared showing the loss annually caused by the death of hogs and poultry by cholera, the results would be appalling and in the United States alone would run into millions of dollars. An effective remedy against the ravages of this disease has been found in Cal-Sino powders. It is not only a cure but a sure preventive. Cal-Sino wards off cholera and other bowel ailments and keeps swine or fowl in the pink of condition. The preparation is a prescription of one of the foremost veterinarians of the age, and the results from its use have been amazingly satisfactory. Hundreds of voluntary testimonials bear evidence to this fact. Cal-Sino is put up in two forms, one for poultry and one for hogs. A small portion mixed with the food will keep the swine or fowl strong and healthy. The manufacturer, The Royal Distributing Company, Baltimore, Md., will send to live stock owners free on request a copy of their 60 page illustrated book, "How To Tell," showing how to know and how to cure diseases in horses, cattle, sheep, hogs and poultry. It contains much valuable information.

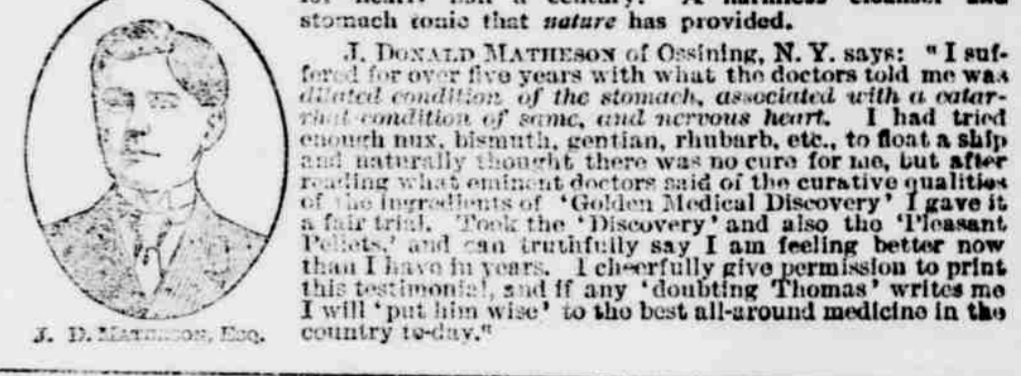

The country school teacher and preacher are the most important and influential men in any community. If they are of force—have ability to do their work—they can command fair salaries, and if the country or rural communities will not pay them living wages, they go to the cities where their efficient services will earn them a decent living. Two reasons why so many people leave the country and go to the cities are because they find better schools and better preachers in the cities. The explanation is, the city teachers are better paid.—The Progressive Farmer.

"I was cured of diphtheria by one dose of Chamberlain's Colic, Cholera and Diarrhea Remedy," writes M. E. Gebhart, Oriole, Pa. There is nothing better. For sale by all dealers.
