The loss is between \$400 and \$500 with no insurance. The origin of the fire is unknown, but must have been incendiary.

Ought to Paint.

I ought to have painted last year, but I hated to pay \$2.25 a gallon. I've got to paint this year; it'll take a little more paint; I suppose 1 gallon in 10; and a little more work, I suppose 1 day in 10.

My job would have cost last year about \$52.50; it's going to cost this year \$55.

\$2.50 gone. I suppose it'll be the same again, if I wait again.

What if paint goes down to \$1.75 a gallon? \$2.50 on the job!
I shan't wait; what a fool I was!
