

No More Difficult to Grow Than Clover and Gives Double the Yield.

Alfalfa Automobile Trains Important Feature of the Work-Schedules to Be Arranged and Meetings to Be Held at Farm Homes-Prominent Speakers to Accompany Each Alfalfa Train-Alfalfa Organizations Will Be Formed In Each Community to Promote the Work-Field Men Experienced in Alfalfa Growing Will Follow Up Preliminary Work Wherever Possible and Give Ald in Getting a Start-Prof. P. G. Holden, Director Extension Department, International Harvester Company, Chicago, Will Direct the Work.

The campaign will be conducted in co-operation with farmers' institutes. bankers, business men, farmers, commercial clubs, granges, live stock and dairy associations and other organizations in any community where the people are anxious to improve their agricultural conditions and are willing to give time and money to carry on the work.

County and city superintendents of schools, colleges, institute workers, Chautauqua lecturers, and others interested in the work will be assisted in obtaining alfalfa charts and lantern slides. Alfalfa literature and booklets will be given wide distribution throughout the country. Special alfalfa articles will be sent to farm journals and magazines, and plate and matrix pages to newspapers. Alfalfa editions of newspapers will be published where campaigns are conducted. Dates will be arranged for "Alfalfa Day" in the schools.

#### To Begin Campaign Work in East, West and South.

Work to be started immediately in the cotton belt states and in the east and west. Thirty to forty meetings will be held in each county, the number depending on local conditions.

To accomplish the most in agricultural development, we must begin with the man behind the crop. Upon him depends the final working out of the principles of agriculture-the simple and practical things-which our schools, colleges and experiment stations are endeavoring to bring into general use.

Professor Holden proposes to carry these principles further even

the very effective work done on the agricultural trains, by using that most modern vehicle-the automobile-going directly to the people on their own farms where the meetings are to be held.

### Alfalfa Greatest Soll-Enriching Crop.

Agricultural development needs in addition to the work of our public institutions, the individual efforts of every merchant, banker, corporation, or laboring man, and this plan calls for their heartlest co-operation.

This plan for increasing the yields of our crops by the more extensive growing of that wonderful soil improver, ALFALFA, is meeting the approval of all men who have any knowledge of the beneficial results of its introduction as a general crop.

Campaigns are now being conducted in many of the central western states, and Professor Holden is daily answering requests for his assistance in organizing other localities, and invites cordial co-operation with every community interested.

Where campaigns are contemplated it's required, first, that a request be made to the Agricultural Extension Department for assistance in carrying on the campaign.

What the local people will provide:

(1) Expenses (meals and lodging) for the alfalfa speakers and staff

upon their arrival and during the campaign. (2) From ten to twenty automobiles for each day of the campaign to carry the alfalfa crew and invited guests; one auto truck to carry literature, had been improperly influenced by For Weakness and Loss of Appetite baggage, charts, and other equipment.

- (3) Arrange for meeting places and publish schedule of same.
- Local advertising. (4)
- (5) Photographer, if possible.
- The Agricultural Extension Department will provide:
- Advance men to assist in organization work. (1)
- Lecturers.

Literature. (3)

(4) Special educational articles for newspapers and farm journals pertinent to alfalfa culture, object of campaign, etc.

(5) Field men to follow up the preliminary work and aid the people in any community where sufficient interest is shown to warrant it.

ALFALFA FOR HOGS. Kansas Experiment Proves the Great Value of Alfalfa and Corn as a Balanced Ration-Hog Growers Note the Result of This interesting Feed-Ing Experiment.

This experiment was conducted at the Kansas Agricultural college: The pigs shown in the accompanying chart were litter mates. The larger pig was fed on a ration of corn and alfalfa hay; the smaller on corn alone. Several litters of weanling pigs were

equally divided into two lots. The pigs were carefully chosen as to weight and thriftiness, so that each lot represented a fair average of the total number of pigs used in the experiment.

The experiment was carried on for a period of eight months. At the end of this time the pigs fed on corn and alfalfa hay were in excellent condi-

lobbyists.

As the probe went on, however however, clues began to develop. A faint thread of suspicious work was discovered here and a trace of it was pursued there. Then the committee suddenly opened up a wilderness of lobbying. The exposures were so far reaching and startling that the committee itself was at first to bewildered to do more than aspounds, dressed, while the pigs fed sure the country that all the facts on corn alone were thin and scrawny should be known. and averaged but 60 pounds each. In

Every fresh development is further vindicating Senator Overman's assurance that no whitewash would be app hed by his committee.

Mr. Overman has been a Senator for 10 years. Until last March 4th he was a member of the minority, but he was preparing to take his place in the leadership of his party n the Senate.

The Carolina's Senator's mos! important move, after the Democrats reorganized the Senate was to make a demand upon that body that the civil service of the United States be investigated. He made a strong speech on the Senate floor about a month ago, in which he showed by a Republican testimony that the civil service laws had been applied for years to strengthen the Republican party in governmental machinery.

He showed that under the Reputican administration every department had been crowded with officeholders, and produced the report of President Taft's Economy and Efficiency Commission to bear him out.

Down in North Carolina the people like to remark that years ago Although many Guilford county Lee Overman was Senator "Zeb"

We have just made arrangements with one of the largest potteries in the country to furnish us a quantity of their famous Sterling China 31 Piece Dinner Sets.

These Dinner Sets are made from the best of imported China Clays, fired to a high degree of heat in order to make it substantial, and then covered with a soft, velvety, translucent glaze. The ware is first class in every particular. The decoration is French decalcomania roses, connected

the latter case, one pig died of what the veterinarian declared to be starvation, notwithstanding the fact that this lot of pigs had all the corn they could cat. Must Have Protein. The scrawny 60-pound pigs lacked protein, that element required in growing animals, to develop bone

and muscle, blood, nerve and tis-

sue-that which builds the frame-the very thing that the pigs did not get when fed upon corn alone. Corn is deficient in protein and has

an abundance of starch and sugar. Neither alfalfa nor corn when fed alone will give the best results, but a combination of the two make a perfectly balanced ration. A balanced ration is a combination

of feeds containing elements necessary for the proper physical development of the animal. Protein, the most essential element in animal feed, builds the frame of the body while corn is essen-

tially valuable for the production of fat. The bones of the "corn-alfalfa" lot of pigs were double the size of the lot fed on corn alone and stood a breaking strain of 1,370 pounds as against 520 pounds for the lot fed on a single ration of corn.
