The BROKEN COIN

By EMERSON HOUGH

From the Scenario by GRACE CUNARD

COPYRIGHT, 1915, BY WRIGHT A. PATTERSON

SYNOPSIS.

Kitty Gray, newspaper woman, finds in a curio shop half of a broken coin, the mutilated inscription on which arouses her curiosity and leads her, at the order of her managing editor, to go to the quality of Gretchen to piece out the story suggested by the inscription. She is followed, and on arrival in Gretchen's adventures while chasing the secret of the broken coin begin.

FIFTH INSTALLMENT

CHAPTER XVIII.

A New Intruder.

The keen senses of Roleau, schooled in peril, told him of some hidden danger—the very tenseness of the situation warning him. Turning, he saw the unraised weapon, and in a flash a blow from his own powerful arm had sent it flying through the window. It fell clinking on the floor at the feet of Count Sachio and his friends. Kitty, rescued from the danger which she had not realized, sprang back. An instant later Roleau had grappled with the intruder.

Hearing the sound of this encounter, Count Sachio and his companions sprang at the intervening door, broke it in. They found two strange men engaged in an encounter whose cause they could not guess, but both of whom undoubtedly were intruders in this place, and who, therefore, might be regarded as enemies.

"The American!" exclaimed Sachio, as now he saw also the young girl, who was endeavoring as best she might to give assistance to Roleau in his struggle with the stranger.

"Quick, excellency, run!" exclaimed Roleau.

The strange man was not easily to be disposed of, but gave even the powerful Roleau all he liked to do to handle him. Meantime Sachio flung himself upon Roleau, his comrades did as much as the stranger.

In the melee, which slipped from place to place upon the floor, Sachio let fall the little bag with the king's half coin—in his excitement he had forgotten that he still had it in his hand. The stranger, whose shifty eyes caught everything, saw the bag as it lay upon the floor.

Working gradually towards the place where the little bag lay, now underfoot, now scuffed aside by the struggling men, the stranger managed to trip and throw that one of Sachio's friends who pressed him most closely. They fell directly before the packet. Swiftly, the long hand of the stranger reached out and caught it up.

There remained for him no more wish for the fight. An instant later, his crossed arm against the throat of his assailant, he broke away, flung through the open window and left the others to their fight.

Roleau, still held in the powerful grasp of Count Sachio himself, struggled furiously, all the time calling to Kitty to make her own escape.

"Roleau!" called Kitty. "Quick, he has it—he has stolen it. We must follow him!" And Roleau did his best to shake himself free.

"Not so fast, not so easily," panted Sachio, whose stern grip still held Roleau's collar. "You will not get off just yet. Who are you, to come prowling about my place—thieves and what thieves? You shall tell me what all this means."

"Go, excellency, run!" panted Roleau, still to his mistress. "Leave them to me. I'll come when I can." Kitty turned, knowing that she must act quickly or be taken prisoner herself.

"Follow me, Roleau!" she cried.

"Follow me when you can. I'll leave a trail." And as she caught up a book from the table Roleau guessed what she had meant by this—a paper trail.

She looked this way and that, but could see no trace of the stranger who had thus treacherously intruded upon their own plans. A strange feeling came to her mind that perhaps she had seen him elsewhere before now. Where could that have been? Ransacking her memory she concluded that he must have been some one of the band of banditti who had surprised her and her companions in the desert.

Trusting to fortune to bring her aid, she ran forward in the general direction which she supposed the man had taken. She passed from the floor of the gallery, which held no trace of footprints to the softer ground where she might see the trail, and caught it now. He was running in great leaps towards the edge of the forest, where the road came in. Yonder lay the trail to Gretchen. He seemed bound for that. Yes—she presently heard a sound of horse's hoofs.

"Horses!" thought Kitty to herself, recalling the stables where some of Sachio's mounts were kept—indeed, she doubted not that some might be saddled and waiting in the yard. It was true—an instant later her own flying hoofbeats pursued those now lessening in the distance. And as she fled Kitty left a trail.

As for Roleau, his faithful heart was well-nigh broken when, having seen his mistress follow his advice and make her escape, he found himself in spite of all unable to join her in the pursuit of the escaping thief who had their coin.

The grasp of Sachio upon him did not relax, and now others reinforced their leader. "Ah, well, messieurs," he said grinning, at length, "you have the argument at length."

"Search him!" exclaimed Sachio. "I have lost the coin. It was here. It is gone—he has it about him somewhere."

The companions of the count complied, but could make nothing of the search. Roleau stoutly asserting that he knew nothing of it and had it not in his possession.

"I dropped it on the floor in the scuffle," exclaimed Sachio. "Surely this man must have it, or it has wings! I had it in my hand but now, this very moment. That American—surely she is a witch. Did she take it, fellow? Tell me!" He turned furiously upon Roleau.

"Monsieur, how can I tell?" replied the latter.

At last, however, there came the sound of one driving furiously.

"On guard, gentlemen!" exclaimed Sachio. "We do not know who comes—I hope it may be Rudolph."

It was indeed this missing stranger—the man who had been left bound in Frederick's apartments.

It should be understood now that when Count Frederick had returned to his own apartments and found his private room occupied by a man who evidently had been there for no good purpose—a man left trussed up and bound by yet other intruders—he had had some parley with the helpless intruder in the way of learning what had been the cause of his strange plight.

"I know you, fellow," said he. "You are of Count Sachio's suite. You have been quartered here with him as a guest of this house—and now you would rob me!"

"Your excellency," exclaimed Rudolph, "spare me! I was found here."

The judges of the contest are: Messrs. Stuart Smith, W. M. Bond and Battle Hardison.

The public is invited to hear the argument, which takes place in the graded school auditorium at the hour above mentioned.

WORLD'S LEADING MARKET.

Winston-Salem, N. C., Now Manufactures More Tobacco Products Than Any Other City in the World.

Following are extracts from an address delivered by Col. A. D. Watts, Collector of Internal Revenue for the Fifth District of North Carolina, at a smoker given by the Twin City Club, Winston-Salem, February 4, 1916: "Winston-Salem is supplying one-fourth of all the chewing and smoking tobacco consumed in the United States besides exporting vast quantities to foreign lands. This statement is taken from the report of the Commissioner of Internal Revenue for the first quarter of the present fiscal year and from private advices from Washington, as to the second quarter, which ended December 31st, last.

"Your city is making one-seventh of all tobacco products—chewing and smoking tobacco, cigars, cigarettes and snuff—manufactured in the United States. Your manufacturers are paying on an average about \$37,000 a day revenue taxes to the government and the amount is increasing from month to month. When your government building, much the handsomest in the State, was completed last July at a cost of \$250,000 your newspapers made the statement that the taxes paid in your city to Uncle Sam for the first eight days of its occupancy would pay for it. Since September, it has taken only a fraction over seven average day collections here to equal its cost. So far this week, Mr. Cranford has taken in \$206,428.50. I predict that before 1916 shall have ended your average weekly payments to the government on tobacco will more than pay for this magnificent building, leaving the collections for the other fifty one weeks is clear profit to the government.

"Winston-Salem is shipping on an average each week day to all parts of this country and to foreign lands at least \$150,000 of tobacco products.

"In conclusion, Winston-Salem manufactures more tobacco, all tobacco products are taken into this statement, than any other city on earth, little and big. Industrially, she is easily first in North Carolina, population considered, first in America and I believe, in the world; socially, a never failing delight to her friends."

WOOD FLOUR.

Large Quantities Used by Makers of Dynamite and Linoleum. (Forest Service, U. S. Agr. Dept.) Washington, March 29.—More than twenty thousand tons of wood flour valued at \$300,000, are used annually in the United States in two widely different industries, the manufacture of dynamite and the manufacture of linoleum.

Wood flour is also used in making composition flooring, oatmeal paper, and in several other industries. It forms one of the means by which the huge waste product of our lumber mills is beginning to find some better means of disposal than the burner. Since a total of 30,000,000 cords of saw waste is produced each year at saw-mills in the United States, of which about one-half goes into the furnaces as fuel while the rest is burned as refuse to get rid of it, there is no lack of raw material for industries which can develop ways of turning this waste to account.

All wood flour-using industries require a white or very light cream-colored flour having good absorptive powers. The wood species that may be used are confined to the light, resinous conifers, and the white broad-leaved woods like poplar, spruce, white pine and poplar are the species most used. Mill waste, free from bark, furnishes much of the raw material or making wood flour.

For use in dynamite, the trade demands are said to require a white wood flour, since the freshness of dynamite stock is indicated by a light color. Dynamite flour must also be very absorptive, so there will be no leakage of nitro-glycerine from the finished product. Wheat flour will also be used in dynamite making, but wood flour has practically replaced them in this country.

In the manufacture of linoleum, either wood or cork flour is used. The flour is mixed with a cementing material, spread out on burlap and rolled or pressed to a uniform thickness. The cement is the expensive constituent. Cork linoleum is the cheaper because less cement is necessary. The patterns are printed on, leaving a dark base. For inlaid or straightline linoleum, wood flour is used exclusively. Cork linoleum is always dark, and slightly more elastic than that produced from wood flour. The wearing qualities are about the same.

Two methods of producing wood flour are practiced; one using mill stones, the other steel burr rollers to pulverize the wood. The latter requires only one-fourth as much power to operate as the former and was developed on the Pacific Coast to handle saw-dust as a raw material. The mills of Norway which produce much of the European wood flour are of the stone type.

Wood flour mills are scattered over the country from Maine to California wherever the proper combination of wood and water power is available, and the domestic wood flour complements with the Norwegian product which, before the European war, was delivered at Atlantic ports for \$12.50 to \$15 per ton.

Twenty-Four Cases Pneumonia. According to Doctors Kitchin, Smith and Morgan, there are 24 cases of pneumonia in Scotland Neck and vicinity. As yet no cases have proved fatal, but several patients are seriously sick. The fickle changes in the weather during the last few days, and the lack of plenty of fresh air in the sleeping room, have precipitated such a large number of cases, according to the physicians.

The Commonwealth could not locate Dr. H. I. Clark when this item was gotten up, but it is expected that he also has some cases of pneumonia under his care.

Court Proceedings.

At the criminal term of Halifax Superior Court last week the following minor cases were disposed of, which the Commonwealth clips from this week's Roanoke News:

Fourth Defeat.

For the fourth time this season, the Scotland Neck High School Basketball Team went down in defeat when the Weldon team played them off their feet on Tuesday afternoon on the Weldon court. The score was 38 to 8.

From the time that the whistle blew commencing the game, the visitors never threatened the Weldonites. The first half ended with the visitors white-washed. Half number two, the little end team rallied and succeeded in totalling 8 points. The trip was as follows:

Scotland Neck	Position
Moore	C.
Bradley, W.	L. F.
Bradley, G.	R. F.
Futrell	R. G.
Harrell	L. G.
Weldon	Position
Travis	C.
