Paris, Feb. 10.—Check plumes are the latest thing in feminine adornment here. They are ordinarily worn with the hat, but contain devotees of originality in dress have conceived the idea of wearing one or two "check plumes" with evening dress, as earrings.

The check plume is an ostrich tip or bird of paradise spray closely attached to the headband of the hat by a silken cord or chain of platinum. It falls straight down, close to the face, covering ear and cheek and sweeping across the shoulder. ### Yankees Have Large Contracts to June 1920

Buenos Ayres, Feb. 10.—American buyers are reported to be buying Argentine cattle hides on contracts which would include the greater part of what are known as "freezing house skins" up to the middle of June, 1920. The American buyers, according to La Razon, are anticipating German purchases which are expected to be facilitated by the resumption of maritime traffic with German ports.

"At present," says La Razon, "the demand for cattle hides is very active all over the world. The United States bought during the war the greater part of Argentina's production, but now cannot do this for the reason that the tanning industry has progressed very much in several countries such as Spain, Sweden, Norway and Holland, and these countries today are disputing the market. As Germany is commencing to operate on a large scale in the international hide market, the United States will not find the same facilities that she had in 1915-8 to impose her prices on the market."

It is estimated that Argentina next year will be able to dispose of more than 6,000,000 cattle hides.

(By Maxwell Gorman.)

Raleigh, Feb. 10.—All the meetings of whatever description which were planned to be held in Raleigh during this week and next, have been called off till further notice because of the stringer order just issued by the city commissioners closing all places of public assemblage, and placing a man on all public gatherings for at least ten days.
