Here Is the Tool That Completes the Fordson Farming Cycle

FOR many years the tractor has performed satisfactorily with plow, harrow, drill and belt-driven tools. But, how to utilize Fordson power in cultivating corn has been a problem. That vacancy in the cycle which would otherwise be complete has now been filled by the Amsco Two-row Cultivator.

With this machine, the Fordson cultivates thoroughly from the first cultivation to the last. This new machine has accomplished remarkable results. It marks the end of monotonous cultivating behind slow plodding teams.

The construction of this machine is simplicity itself. No unnecessary parts. No unnecessary friction. The cultivator is light running and easy to handle.

This is the last word in Standard Fordson Equipment, and every farmer in this community should see it.
