A QUESTION FOR MATHEMATI- CIANS AND ECONOMISTS. I Stof feet of gas is consumed through eight burners, in 9 nights, at a cost of \$5 per thou- sand feet, how much is consumed by each burner per hour? at what cost, and what would be the cost of an equal amount of light obtained from Kerosene Oil? Answer : There is consumed by each burner, 25 feet per night, or 6 feet per hour, at cost of 6 cents per hour per burner. Four Kerosene Lamps afford as much light as 8 gas burners; 4 gallons of Kerosene Oil will supply 4 lamps one month, which, at \$1,20 per gallon, is \$4,80 per month, or a cost of one cent per hour per lamp; therefore, by burning gas, the expense is only six hundred per centam greater than to burn	lina has seceded !
