

THE NEW SOUTH

DEVOTED TO IMMIGRATION, THE INDUSTRIAL, AGRICULTURAL, MINERAL, COMMERCIAL, EDUCATIONAL AND GENERAL DEVELOPMENT OF NORTH CAROLINA AND THE SOUTH.

VOL. I. NO. 35.

WILMINGTON, N. C., SUNDAY MORNING, DECEMBER 24, 1882.

PRICE 5 CENTS.

THE NEW SOUTH... DEVOTED TO IMMIGRATION, THE INDUSTRIAL, AGRICULTURAL, MINERAL, COMMERCIAL, EDUCATIONAL AND GENERAL DEVELOPMENT OF NORTH CAROLINA AND THE SOUTH.

Italian government will depress the price of the oil here. The answer is that the practical exclusion of cotton seed oil from Italy since last January has not seriously affected the price.

THE LATE JOHN H. WHEELER.

So few are our men of letters, so eminent have been the services of Col. Wheeler, we feel it to be a duty we owe the public to publish a full outline of his life, with an opinion of his life's work, as far as details are accessible at the moment.

amiable of men. His first wife was Miss Mary, the daughter of Rev. O. B. Brown, of Washington; his second, Miss Ellen, daughter of the great artist, Thomas Sully, of Philadelphia. She survives him. He leaves three children and several grand children.

MANUFACTORIES.

The article of last week, in our editorial columns, has attracted a good deal of attention from the point of its suggestions. Embarkation in manufactures is the one thing needful to emphasize the prosperity of this town.

ment. But these resources will prove precarious if relying solely upon the capricious action of fashion, or the irregular demands for services. There must be a steady uniform employment pursued to sustain population, and there must be reliable inducement to invite its increase.

STOKES COUNTY MINERALS.

To Mr. James A. Pepper, who has devoted almost the entire current year to the investigation of the mineral resources of this county, we are indebted for the following information:

On the south side of the river, ore is of the hematite variety, and has long been known to exist in great abundance but owing to its inferiority to the magnetic ores, it has never been developed to any extent.

THE NEW SOUTH.

You have heard much of the New South, but you have not heard the half of what may truthfully be said about it. Materially, it is not new yet—the metamorphosis has just begun; but in sentiment there has already been a complete revolution.

welcome in the South as they would in Kansas; in fact, the desire to impress them favorably, and to have them send back to friends favorable accounts, would be so great that people would vie with one another in showing them polite attentions.

FERTILE LANDS WHICH NEED DEVELOPING.

We have much land in North Carolina, of great fertility, yet undeveloped, but which in the next generation is likely to be subdued to the uses of man. A friend writing from Washington says the South Creek and Bay River lands are the best under our southern sky.

A FORTUNE FOR SOMEBODY.

But we must prepare to make cotton at eight cents a per pound. We cannot produce too much cotton—we may readily glut the market with cotton.

and that is now forming a very lasting chain, specially adapted to binding together the hearts of men, by binding in one their seemingly diversified interests. A New South—a manufacturing kingdom—will be the result, and what is grown here will be placed upon the market as manufactured fabric, and every profit connected therewith will be retained at home.

THE COLORED PEOPLE.

Not boastfully, but truthfully does the Enterprise claim, that the colored race in North Carolina has more colleges, more normal schools more, newspapers, more members of the General Assembly of the State than it has in any other State in the Union.

MINING MATTERS.

The Silver Valley Mining Company have erected a warehouse at Thomasville for the storage of their ore, which is awaiting shipment. They have shipped over five hundred tons.—Dispatch.

DUPLIN'S SORGHUM INDUSTRY.

The sorghum industry in Duplin county is assuming vast proportions, yielding a big revenue to the people. From advanced sheets, furnished by Ed. Pearsall, statistical agent for that county, we notice that 1,500 acres were in cultivation this year against 300 in 1881, yielding 25,000 gals. against 3,000. In addition about 1,500 lbs. of sorghum sugar was made.

THE NEW SOUTH.

The rehabilitation of the South is now being accomplished, and nothing is more gratifying to the mind of the genuine friend of this country than such an assurance. The past season has been most auspicious, and the Southern States are now in a condition of unprecedented prosperity.

STATE INDUSTRIAL ITEMS.

The wagon manufactories of Wauington are turning out about fifteen wagons per week.—Winston-Salem. The Newton Cotton Mills will be ready for work by the last of next week, but the proprietors do not intend starting until the first of January.—Enterprise.
