The St. Thomas Tornado. The surgeon of the steamer Marmion reports the following additional particulars concerning the tornado which visited the island and town of St. Thomas on the 29th ultimo : -

"We arrived at St. Thomas on the morn ing of the 30th, and found that the island had been visited the day previous by the most terrific hurricane ever known there, the town being partially destroyed and the loss of life very great. The amount of property destroyed it is impossible at present to estimate; the scene of destruction and devasta-tion it is impossible to describe. The wind commenced blowing a pretty stiff breeze about eight o'clock from the north west, The granter wap in Louisians and and about eleven o'clock it changed round to the east and blew a perfect hurricane, carrying everything before it. It lasted about four hours, but during that time raged with such violence that trees were torn up, houses litted from their foundations and dasced to pieces. Ships and steamers of the largest class, as well as smaller vessels, were hurled together, and either dashed to pieces or sunk. Some fifty or sixty vessels are ashore, lost. Thousands are rendered homeless, and the amount of suffering, confusion and excitement it is impossible to describe. There is nothing doing; everybody seems

> paralyzed. On the morning of the 29th, there being indications of a storm, the passengers of the old steamer Conway, Captain Hammack, did not feel safe to go to sea in her, and wished to be transferred to the Rhone, a al " column " Scizzorinktums." new steamer of the line, where they might consider themselves safe in case of a storm. They were accordingly transferred, and both vessels put to sea; but during the storm the Rhone struck on Peter's Island, her boiler explored, and all were lost with the exception of twelve or fifteen. The British steamship Conway, Captain Hammack, was thrown on Tortola Island, and all hands

NO. 90

We have just received the catalogue of Yale College for the current year. The number of under-graduates is 505, divided as follows: Seniors, 107; Juniors, 128; Sopho-mores, 132; Freshmen, 138. The professional students number 194: in Theology, 32; in Law, 16; in Medicine, 24; in Philosophy and the Arts, 122. The whole number of students in the College is thus 699. The whole number of students at Harvard College is considerably larger, owing to the greater size of the law and medical schools.

A gentleman in Geneva, N. Y., informs the Country Centleman that he has kept his currant bushes entirely free of the currant worm, and his quinces of the borer, by the use of coal ashes. The ground under the current bushes was covered in the spring to the depth of five inches, and a mound was made about the stem of the quinces.

definite in regard to the other islands had been heard, with the exception of Tirtola, LIEUT. L. ECHELBERRY, in charge of Sub Dis- of which report says that the town is totally destroyed and a number of lives lost. Harbor Master Steinberg of St. Thomas was drowned while nobly attempting to rescue others. Having succeeded in his first attempt, he was returning the second time, when his boat capsized and he lost his life. The steamer Columbian came in at about eleven o'clock, and at two o'clock was sunk, and six persons lost. Her cargo was valued at from \$1,000,000 to \$2,000, 000. The track of the hurricane seems to have been narrow, as the Marmion, from

Rio, and the North America, from New York, arrived the day after, neither having chine for rilding plants of insects. It is experienced more than a stiff breeze.

Just So in Virginia.

A correspondent of the Raleigh Sentinel

save ;

Hops grow wild in Western North Carolina. What would they do if cultivated? A very enterprising man in Forsyth has the culture of this bloom under consideration. He has learned that it can be made to pay five hundred (500) dollars to the acre. The truth is, North Carolina is suffering from the lack of a greater variety of productions. There ever has been a tireless panting among our farmers and planters, for Cotton and Tobacco. Expensive fertilizer are bought instead of made, to raise them, regardless of all consequences.

This would be just the thing for us, if we had Calico Printing going on among us, and also Tobacco Factories at home. But this is not our good fortune. We spend more in N. C. for cotton fabrics after they are made up than we get for the cotton we raise. Any land that will produce corn will produce hops. It is said to yield one thousand pounds to the acre. At 15 cents this would yield \$150 per acre, even at this average. Hops are now much above this old figure, I think. The New England States have made \$3,000,000 worth of hops in 50 years.

Land that will yield Indian corn will yield broom corn. This is worth 12 to 15 cents a pound.

Is it good policy for a man to plant his whole place in cotton, tobacco, or any one thing, and purchase corn, hay, meat, flour, wool, flax, brooms, leather, and everything he needs for the farm?

Nature has given us soil and climate for seven-tenths of all we need. I have eaten excellent meals and slept of the best of beds, particularly enraptured with that piece, at places where almost every article of food called the 12th Massachusett. It was Moat places where almost every article of food and raiment was made on the premises.

An acre of land will yield four hundred pounds of flax. This, at twenty-five cents a pound, gives one hundred dollars an acre. and ten bushels of flax-seed, at one dollar and a quarter a bushel, will pay nearly for. fowls. the dressing of the flax.

It will not cost fifty dollars to raise five
