Great Britain, it therefore requires nine thou half pounds are imported annually into mark is \$8,000,000 in gold. sand millions of insects to supply the raw silk for British manufacture.

> It is a singular fact that steel dipped in the juice of the nettle becomes flexible. A professor who has made the medicinal properties of wild plants his peculiar study, states that lint dipped in nettle juice, and put to the nostril, has been known to stay the bleeding of the nose when all other remedies have failed; and adds that fourteen or fifteen of the seeds ground into powder, and taken daily, will cure the swelling in the neck known by the name of goitre, without in any | races which commenced to-day, Mandrake way injuring the general health.

An ingenious application of electricity has been made by means of which signals are given that indicate the pressure of steam in the boiler of an engine. Tubes, being filled with mercury, are made part of a galvanic circuit, and connected with bells as the mercury rises from increasing pressure of the boiler; the current is thus completed, and the bells respectively rung indicate the amount of pressure. In this way attention is called to the condition of the steam the moment it exceeds its ordinary and safe working condition.

by the aid of electric shocks, is about to be applied to an extensive factory at Springfield, Mass. The battery will be a very powerful one, and will effect the two-fold object of ringing a large alarm bell, and prostrating all who may attempt to enter the premises. The application of such an apparatus is suitable for banking-houses or mansions, and it may be applied to one room or the whole

An Englishman proposes to manufacture a substitute for gold, which he terms "British gold," by mixing one part of a zinc alloy of iron with four parts of copper aud manganese; and a substitute for silver, by mixing six parts of the zinc alloy of iron with two of nickle and ten of copper.

Chloroform has been used with success as steam, and while it exerts power on one side of the piston, is condensed in the other. The alternate vaporation and condensation can be continued with very little waste of the chloroform, and a much less quantity of fuel is necessary than in an ordinary engine.-Marine engines on this principle are now being constructed in Paris, and should it succeed on a large scale, there can be no doubt it can be extended to locomotives, in which case a great saving would result, not only in coke, but in wear and tare, as locomotives on this principle would be less bulky and not be necessary to load the tender to half the extent to take fuel for the same dis-

A water tight cement may be made by mixing equal parts of red and white lead with sufficient boiled linseed oil to make it of the proper consistency.

An analysis of soot shows that of 1,000 parts 671 are combustible matter; in other words, fuel wasted.

By means of a chemical discovery recently made, it is said that the oil of turpentine can be freed from its peculiar smell so completely that not only is it rendered inodorous, but it can be impregnated with any desired perfume, without deteriorating its useful prop-

An Englishmen has lately patented certain improvements in the construction of respirators, so that the vitiated or expired air may be conducted away without mingling with the pure air to be inhaled, through metal channels, and made to impart heat to the

pure air by its passage through them. Twenty parts iron turnings or tin waste, eighty steel, four managanese, and four borax, makes an alloy for hard tools and bells. To increase the tenacity, the proportions may ve varied and two or three parts wolfram may be added. V. H .- Coods Wittyanist its Repre-

bakeries, plundered them, and then set them

Liverpool, Nov. 8.-Evening.-At the won the Liverpool cup. Falmouth, Nov. 8.—Evening.—The steam-

ship Fulton, from New York October 26, arrived this afternoon and sailed for Havre. Southampton, Nov. 9 .- The steamship Borussia, from New York October 26, has arrived here on the way to Hamburg.

Paris, Nov. 8.—General Marmora, the Italian Minister, recently had an audience with the Emperor and asked for the withdrawal of the French troops from Rome.

London, Nov. 8.—Reports have reached here that M. Lavalette is soon to resign the An ingenious mode of protecting premises | French Ministry of State. He will probably be succeeded by M. Rouher. ITALY.

Paris, Nov. 8 .- The friends of Garibaldi state that at the recent battle near Monte Rotondo he had only 4,000 men under his command. The Etendard, a semi-official journal of this city, says that the sons of Garibaldi have not been captured, but are still at large though concealed.

The Moniteur of this morning says that

popular tumults incited by Mazzinians had broken out in Milan and other large cities in Italy, but asserts that by the prompt and decided action of the Italian government all these outbreaks were suppressed.

The French government has asked the Papal authorities to release the insurgents who have been taken prisoners in the late a motive power in several steam engines now working in Paris; the vapor acts exactly like campaign, but the request has been refused.

The Moniteur Des Soir admits that French infantry armed with the Chassepot rifle, and artillery supplied with rifled cannon, took part in the battle of Monte | Rotondo, and their coming to the assistance of the pontifical troops decided the fate of the day against Garibaldi.

Paris, Nov. 9.—General La Marmor a asks the French government to withdraw its stump in favor of the Convention, was the troops from Italian soil, because, he says, Italy has proved her ability as well as her disposition to maintain order. He also declares that there need be no fear of further disturbance, as the leading agitators, Gari consequently of a less weight, while it would | baldi, his sons and his principal lieut enants, will leave Italy and go to the United States.

Florence, Nov. 8 .- The trial of Garibaldi has been postponed, it being considered doubtful whether any of the courts here have jurisdiction in his case.

Gen. La Marmora has not left France, as was reported by some French journals, but still remains in Paris prosecuting the important mission for which he was sent by the King of Ital y.

MILAN, Nov. 8 .- Several persons implicated in the late disturbances here have been arrested.

LONDON, Nov. 8 .- Midnight .- A great change has been made in the Italian situation, but no adjustment effected. Great distrust is felt about the relations between France, Italy and Rome, which are regarded as liable to rupture at any moment.

Toronto, Canada, Nov.-The consecration of Bishop Walsh, yesterday, was one of the most impressive Catholic ceremonies ever witnessed in Canada. All the Canada bishops and a large number of Catholic dignitaries of public highways. posing character.

Wilmington in Health and Disease.

BY J. B. PURCELL, M. D.

This exercise enlivens the whole system,

and keeps it in a rejuvenated condition. If the rule was observed more fully, there would be less ailment, and fewer complaints. Mercury would not be so indiscriminately used. Certainly nothing can be more pernicious than the ad libitem practice of carrying in one's pocket a roll of blue mass, and to cut off and swallow a bolus of it whenever a pain in the head, or a fancied hepatic torpidity gave trouble. It wastes the limbes, dimin-ishes the appetite, impairs digestion, and gives to the skin an earthy paleness. The breath acquires in time "a characteristic fetor." But it will be said: "We have gone to the springs; we have climed the moun-tains; we have risen as early as the morning lark, and like it, have sipped in the pure air were present; also Bishop Conroy of Albany, vices of citizens for the necessary repairing of the heavens, yet the fever we caught in the lowlands still clings to us, making our and a large number of Catholic dignitaries of public lighways.

Instructions are being issued as to the gress elect from one of the California dismanner of conducting the elections.

Quebec, assisted by Bishop Lynch, administered the oath. The services lasted five and a half hours, and were of the most imanner of consulting with Gen.

Canby in relation to a new State tax law and circulation. The benisher of your systemic circulation. circulation. The banisher of your rest will originally sent.

be banished in return, and the language of Shakespere will teach you that,

Weariness
Can snore upon the flint, when resty sloth
Finds the down-pillow hard.

This proper guardianship over one's actions will manifest itself in the end, and will be fraught with blessings untold. Lancisi has cautioned travelers against night marches through the Pontine marshes. We would also caution men of every condition and class against self-prescribed mercurials, and against exposure to the cold dews of night. Miasma is like all evils. It lurks in the day time, generally speaking, and prowls about in the darkness, seeking whom it may de-

Another place of much popularity with all classess, and very justy so, is the Sound. A Sound party to the Wilmingtonians conveys the greedy intelligence of "luxuriant joy in excess." To close our labors, therefore, without paying our respects to this magic ground, would be not only the very height of impropriety and disrespect, but it would also create a void that over sensitive feelings might notice. I can do no better than describe an impersonal true styled southern trip, and a scene of festivity of which we individually partook, and which was given by a gentleman, than whom there is none more venerable, none more talented, none more respectable, and none more worthy of the respect of every citizen of Wilming-
