Gents:—The sample of WHITE EMERY furnished by you for testing its merits in polishing and cleaning the engines of steamers Fulton and Arago, has proved itself very useful for that purpose, and equal, if not superior, to anything of the kind I have ever seen used. It produces a ready, bright polish, and endures the damp and heat of the engine room to a greater extent than heat of the engine room to a greater extent than when brightened by any other material, and I consider it highly useful for steamships.

Yours, very truly, CAPT. JOS. J. COMSTOCK. New York, Feb. 12, 1867.

28th August, 1866. A. WHITING, Esq., Sir :- For some time I have used in my house, your Eureka Polisher and Burnisher. I find it fully equal to all you say of it. With one fourth the labor and without dirt it gives a superior lustre and more lasting than anything I have ever used. By using a sponge damped with water, with a little of your No. 1 on it, and rubbing the same over any Window. Mirror or Picture Glass, and after it dries, rub it off with a clean cloth, it will clean them in onetwentieth the time, without wet or dirt, and give a most beautiful lustre. New York, June 12, 1866. A. WHITING, Esq., Dear Sir:—I have used your Eureka Powders in my Saw Manufactory, and I find it very good for polishing on a wheel, but as a Polisher I find it makes a lustre 50 per cent. better than Emory, or anything I have ever used, and with much less labor, which preserves all aricles from tarnishing, and from my experience I find that it keeps them so, and that they do not require oiling.
