BROWN'S COUNTER PLATFORM and RAIL-ROAD SCALES.
Have constantly on hand FERTILIZERS of all descriptions.

Correspondence of the Post.
RALEIGH, Jan. 21st, 1868.
Hon. A. H. Laffin, member of Congress from New York, addressed the Republican members of the Constitutional Convention on the evening of the 20th inst.
Mr. L reports the Republican members of Congress as a unit on the reconstruction measures and are awaiting with great interest the action of the Constitutional convention now in session in the Southern States.
Republicans at the South may rest assured that in all that is wise, just and Republican, their brethren in Congress will stand by them. Nothing should be done for revenge on the one hand, neither on the other, should they be hasty or indiscriminate in measures for removing the disabilities imposed by the Constitution and by Congress, on persons implicated in the rebellion.
As to the Chicago Convention, there can be but one result, viz., the nomination of that wise man, brave soldier and sagacious statesman, Gen. U. S. Grant. With the election of Gen. Grant will come the final settlement of all our Southern difficulties upon a permanent and republican basis.
Gov. Holden, also addressed the meeting in a patriotic and eloquent strain. He explained the manner in which the loyal people of North Carolina, although in a majority, became involved in the rebellion. He counseled the members of the Convention to insist upon undoubted loyalty as an essential qualification for citizenship. If properly organized, he believed, the republicans to be largely in the ascendant in the State;—that of the white men of the State, a majority were republicans.
The rule of disloyalty is at an end. The government of North Carolina must be henceforth of the people and for the people.

WASHINGTON ITEMS.
From the Philadelphia Post.
It is stated in official circles here that Mr. Seward will put forth, in a short time, a State paper on the Alabama Claims, which threatens to be the most ponderous volume in weight of argument, as well as weight of paper, ever issued from the State department. The whole subject will be reviewed *ab initio*. The doctrines of international law and the duties of belligerents laid down and defined, the document will then consider the respective positions of England and the United States at the outbreak of the late rebellion; and the next chapter will be devoted to a severe censure of the indecent haste in which the proclamation of neutrality was issued by the British Government. Then will come cables showing the number of ships built by the British ship builders, the histories of their equipments, cruises, and achievements, and the losses sustained by the United States citizens. Part second will present the startling array of figures, representing the property destroyed; the whole to conclude with a strong demand for payment in full. It is also given out that the Secretary will allude to the question of naturalization, and demand that England recede from her position of perpetual allegiance, and acknowledge the American doctrine on that subject.
The Supreme Court, this morning, decided to advance the McCardie test case on docket, and set it for a hearing on the first Monday in March next. This case it will be remembered, arises under the reconstruction acts now in force in the Southern States, the constitutionality of these acts being involved therein to a certain extent. Chief Justice Chase announced the decision of the court.
Gen. Grant thinks that in view of his order providing for a gradual reduction of the army, there is not much need of making many more second lieutenants at present. The Senate Military Committee has therefore agreed to a bill suspending the appointment of any further officers of this grade except graduates of West Point.
The Senate Committee on Foreign Affairs had a long discussion to-day on the nomination of Hon. S. S. Cox, for the Austrian Mission, but came to no conclusion on that point. The subject will be resumed at the next meeting of the committee.
Parties are here in consultation with leading Democratic politicians as to the time and place of the next Democratic Presidential Convention. They urge that Cincinnati is the best point at which to hold it, and say that the Democracy of that city will do the handsome thing if it should be the nominee.
The usual meeting of the Cabinet was held to-day, there being present Secretaries Seward, McCulloch, Browning, Wells, and Postmaster General Randall. The Session continued until after two o'clock.
Recent advices from Alabama received by the Union Republican Executive Committee states that an election will be held on the 6th of next month, for the purpose of voting on the new constitution.
Senator Henderson's bill was reported to-day, but there are no new features to be added to the synopsis given in your columns some time ago.
Gen. Ord left last night, on his way to California, where he has been assigned to duty. He is not expected to sail for some days, however.
This forenoon Senators Buckalew and Hendricks had an interview with the President.

NEWS IN BRIEF.
EUROPE.
Cable telegrams, published *in extenso* elsewhere, give full particulars of the arrest of George Francis Train, while the very latest dispatches received announce his release from custody. Mr. Train has telegraphed to his friends in this City that he has brought suit against the British Government for £100,000 damages.—The accounts received in Dublin of the threatened Fenian disturbances in Waterford County seem to have been greatly exaggerated.—Intelligence from Italy sets forth the fact that the Anti Garibaldian campaign of the Government has added 18,000,000 lives to the expenditures of the past twelve months.—Prime Minister Menabrea has addressed a sharp note to the Spanish Government in reference to the Queen of Spain's declaration of her future policy in the Roman question.—The steamship City of Boston, from Liverpool Jan. 3 and Queenstown Jan. 9 arrived at this port last night.—A Berlin despatch sets forth the fact that minister Caneroff is negotiating for a new commercial treaty between the United States and the North German Confederation.—The latest advices from Paris announce that great uneasiness prevails because of the activity in the arsenals and dockyards and the pressure brought to bear upon the Corps Legislatif for the passage of the "Army recognition bill."—The semi-official journals continue to make assertions as to the amicable relations of France and Prussia, and the *Epoque* announces the speedy issue of a Napoleonic manifesto, given every evidence of the Emperor's desire for peace.—The Fenian excitement in Great Britain has not yet died out, for another attack has been made upon a martello tower at Duncannon, in Waterford County, Ireland.—The Government is about to commence a legal prosecution against the Dublin Nation, for the publication of seditious libels and inflammatory articles.—The Fenian Barratt (not Marratt) has, it is averred, been identified as the man who fired the fuse under the walls of the Clerkenwell prison.—A Copenhagen dispatch announces the reference to a special committee of the Rigsdag of the resolution relative to the transfer of St. Thomas and St. John.—A London telegram advises us that the latest news from Africa confirms all previously received reports of Dr. Livingstone's safety.

It is the summer of 1863, General Grant wrote from his camp on the Mississippi: "I have never been an anti-slavery man; but I try to judge justly of what I see. I made up my mind when this war commenced that the North and South could only live together in peace as one nation, and they could only be one nation by being a free nation. Slavery, the corner-stone of the so-called Confederacy, is knocked out, and it will take more men to keep black men slaves than to put down the rebellion. Much as I desire peace, I am opposed to any peace until this question of slavery is forever settled."
That was a private letter to Mr. E. B. Washburn, and Senator Wilson brings it to light. That would have been called Radical doctrine then.—Events have justified it. The principles which bred such utterances at such a time, are sound principles.

NORTH CAROLINA.
BANK ELECTION.—The following gentlemen have been elected officers of the Newbern National Bank for the ensuing year: President, David Hoole; Vice President, W. F. Moore; Cashier, H. H. Thompson; Teller, J. Howard Eldridge.
VESSEL LOST.—The schooner Jenny Lind, loaded with corn, from some one of the north counties, went ashore on Tuesday, a few miles north of Beaufort Inlet, and will prove, with the cargo, a total loss. She was owned by Messrs. B. & E. Ellis, of Newbern.
LARGE HOE.—Mr. Nelson Blake, of Raleigh, had in Market in that city on Tuesday morning last, a hog, of his own raising, which weighed 478 pounds.
DEATH OF A NORTH CAROLINIAN.—Col. Benson F. Jones died suddenly at his residence in Cheslerfield, Va., on the 14th inst., in the 67th year of his age. Col. Jones, until within a few years past, was a citizen of Raleigh.

A DELEGATION from the Cherokee Nation of North Carolina, consisting of G. W. Bushyhead, principal chief, Johnson G. S. Key, Datus Gasky and Choo-wa-whi-ka, have arrived in Washington. Their object is to arrange for the payment of their annuities, which were unpaid while they were in the Confederate lines.
COTTON AT WELDON.—The Roanoke News of the 22d says: "The passage of cotton within the past three days shows an improvement upon the previous three—some twenty-five or thirty car loads arriving over the Wilmington road daily."
A Canadian paper publishes a letter from a subscriber stating that the ecclesiastical authorities had interdicted it, and that he should run the risk of excommunication by receiving it any longer.
It takes two and a half million cubic feet of air an hour to ventilate the British House of Commons. It was formerly proposed to take the air for this purpose from a great height, but it was found that at that altitude a more impure article was obtained than nearer the ground.

GENERAL NEWS.
Salt Lake city has been purified, so far as water can do it.
Steel billiard balls are the latest novelty, but not an improvement on ivory, we should say.
Mrs. J. H. Riddell is about to assume the editorial management of the St. James Magazine of London.
Porcelain capable of being blown, pressed or rolled like glass is made in a Philadelphia factory.
By the treaty between Belgium and Austria the Empress Carlotta is relieved of her succession and the jointure specified in the marriage contract. It is not stated by what authority this was done.
During the two hundred representations of the "Grand Duchess" in Paris, three ladies took the title role, and there were three Wandas, three Pauls, two Barons, and two Generals Boums, while one person, M. Dupu is, carried the part or Fritz through the whole season.
In Springfield, Missouri, a new national cemetery has been opened, and several hundred bodies of deceased soldiers have been taken there for interment. The graves of about 1800 others have been discovered in Southwest Missouri, and the remains in them will also be sent to Springfield.
Five distilleries and four rectifying establishments were seized in New York on Monday for violation of the revenue laws.
Bierstadt's picture, "The Domes of St. Peter's," was packed for Europe last Saturday.
The income from the excise law of New York has thus far amounted to \$2,555,958; in 1864 under the old system the income was only \$12,450.
A court in Pennsylvania has decided that a combination of dealers in oil to purchase 150,000 barrels of oil in Antwerp and thus control the market was a conspiracy against the public, and the discharge of those arrested for that offence was refused.
With reference to the time of holding convention for the nomination of candidates for the presidency it is stated by a contemporary that Harrison was nominated in December of the year before the election, Jackson Van Buren, Cass and Lincoln (first time) in May; Polk, Clay, Taylor, Pierce, Scott, Fremont, Buchanan, Douglas, Breckinridge and Lincoln (second term) in June, and McClellan in September, the latest nomination ever made.
One district in New York paid \$7,686,155-54 in internal revenue last year. It instead of being the most productive district in the country, it was only an average, the receipts would have paid more than half the national debt, besides defraying current expenses.
A Mrs. Tanks has given a library of Dutch, French and Latin books to the Wisconsin Historical Society, which an interesting newspaper says measures about two cords. There are 4812 volumes in all, many of them of great antiquity and value.
A Memphis paper, which finds in every occurrence a text against the reconstruction laws, chronicled a recent murder by a woman, and added:—"This is one of the people whom the radical fortune hunters would place in domination over the South."
Police stations in New York are made intelligence offices by a recent regulation. Any person needing employment leave his name stating the kind of work desired, and the list is open to inspection by the public. The idea seems good.
During twelve years the Panama Railroad has transported less than 400,000 passengers, the average being only 33,000 a year. But it has carried nearly seven hundred million dollars' worth of treasure and six hundred million tons of merchandise.
Madame Jumel is again dragged before the public. Her will was once set aside by order of court, but parties in Rhode Island claim that they are the legal heirs, and have brought suit to recover the property.
Mr. Fouque succeeded, after great trouble in collecting some of the gas which arose from the sea during the volcanic eruption of the Azores in June last, which he has found to be entirely free from carbonic acid, and rich in oxygen.
Wisconsin is worth fifty-seven millions more than two years ago.
The local legislature of New Brunswick is to meet next month.
An explanation of the despatch recently sent from Ottawa to the newspapers of this country, stating that the guard around the Parliament buildings had been trebled, leaving it to be inferred that it was through fear of Fenians, a Montreal paper says the fact is that a watch has been established during the recess of Parliament, where there was none while it was in session.
Fourteen members of the Quebec legislature are also members of the Dominion House of Commons.
London is profiting by the war between the grocers and the licensed victuallers. The former sell wine and spirits cheaper than their rivals, who in turn put down the price of tea, sugar and other groceries. House-keepers are profiting by this state of things, and show their impartiality by buying groceries of the publicans and liquors of the grocers.

NOTICE.
THE UNDERSIGNED OFFERS FOR SALE in large or small quantities,
CYPRESS and JUNIPER Shingles,
Sawed in a Workmanlike Manner.
These SHINGLES are admitted by all who have used them to be
BETTER AND CHEAPER
than any in the market.
It takes LESS NAILS, and LESS TIME to lay them. They make a BETTER ROOF, and require LESS PER SQUARE than any hand made shingles.
Call, examine and judge for yourselves, at Mill Foot of Castle Street.
J. C. MANN,
Proprietor.

OUR LATEST IMPROVED New Scale Piano-Forte.
NOTICE.—After the most flattering testimonials from the first Pianists in the country, who, at our solicitation, have tested them in the severest manner POSSIBLE, have been pronounced
The Finest Square Piano-Forte Made in the World.
It has always been our policy during the Thirty-six years that we have manufactured Pianos, to make them of the best quality, and to give the finest instrument at the lowest cost. Our superior facilities enable us to offer them from one to three hundred dollars less than any other first-class House.
The tone of these instruments are remarkable for their peculiar sweetness and great brilliancy. Never losing their quality when forced to their utmost capacity. The lower register retaining its position; does not destroy the middle and upper registers by mingling with them in disagreeable confusion. The refined beauty of tone being equally delightful to the unpracticed and to the most cultivated ear.
They are an entirely new style of Piano, finished in the most superb manner, with four full round corners front and back, heavily carved Legs and Lyres, Serpentine Base richly moulded, and each instrument is fully WARRANTED for five years.

NOTICE.
S. T.—1868—X.
The language of nature and experience states, that whoever would enjoy the pleasure of food—the beauties of landscapes—the joys of companionship—the richness of literature—the honors of station and renown—must preserve their health.
The stomach is the receptacle of all nourishment, and the fountain from which all parts of the body, derive sustenance. The effect of foul injurious food entering the stomach, is to derange the digestive organs and produce headache, loss of appetite, unrefreshed sleep, faint breath, low spirits, feverish burnings, constipation, incapacity to perform any mental or physical duty, &c., and are the symptoms of that horrid disease
DYSPEPSIA,
which assumes a thousand shapes, and points towards a miserable life and premature decay. The Medical Faculty has labored for generations to discover reliable appetizers and the proper means of overcoming stomach derangements. Certain ingredients have been long known as partially effective. Among these were
CALISAYA BARK & ST. CROIX RUM.
An invigorating tonic, sojourning in the hospital of St. Croix, observing the habits of the natives, gathered the recipe for the final accomplishment of this most important end. The article was first used as a private medicine, when its salutary effects becoming known, it was brought out under the name of
DRAKE'S PLANTATION BITTERS.
They act with unerring power, and are taken with the pleasure of a beverage. They perform most wonderful cures in stubborn cases of Dyspepsia, Liver Complaint, Nervous Affections, Loss of Appetite, Intermittent Fevers, Diarrhoea, Sour Stomach, Headache, Fever and Ague, Weakness, Mental Despondency, &c. As a morning appetizer and after dinner tonic, they should be in every family. They are a delicate and reliable stimulant, without any subsequent stupefying reaction.
IMPORTANT CERTIFICATE.
ROCHESTER, December 28th, 1861.
Messrs. P. H. Drake.—Gentlemen:—I have suffered terribly with Dyspepsia for three or four years, and tried many remedies without effect. I had to abandon my profession, and suffer greatly from everything I ate. I have now tried the Plantation Bitters—they helped me—I continued their use, and am now nearly well again. I know of several similar cases. Respectfully yours,
REV. J. S. CATRON.

ST. T.—1860—X.
Intelligent persons and physicians can judge on the efficacy of the Plantation Bitters from the following partial formula:
CASCARILLA BARK
Was known and used in Germany for Dyspepsia, Chronic Diarrhoea, Cholera, Dysentery, and Diseases of the Stomach and Bowels, as early as 1600
DANDELION.
For Inflammations of the Lungs and Spleen in Dropsical Affections and Bilious Secretions, or Obstructions of the Abdominal Viscera.
CALISAYA, OR KING'S BARK.
Was unknown to civilization until the middle of the 17th century. Humboldt makes favorable mention of the febrifuge qualities of this article had to antidote Fever and Ague, Intermittent and Malarious Fevers, in his extensive South American travels. The Countess, wife of the Viceroy of Peru, having experienced the beneficial effects of the Bark, sent it to Europe in 1640. It was sold by the Jesuits for the enormous sum of its weight in silver, and was thus called *Jesuit's Powder*. In 1858, Sir John Forbes employed it with great success in France, in the treatment of Fever and Ague, Dyspepsia, Nervous Affections, Loss of Appetite, Weakness and Debility, Faltering of the Heart, Diarrhoea, &c., under the name of English Powder; and in 1859, he sold the secret of its origin to Louis XIV, by whom it was divulged. It is now a standard remedy in all Pharmacies, and is employed in preparing the Plantation Bitters.
Chamomile Flowers, for enfeebled Digestions; *Wintergreen,* valuable for Sciatica, Rheumatism, and Neuralgic Affections; *Lavender Flowers,* aromatic, stimulant and Tonic; highly invigorating in Nervous Debility; *Anise,* an aromatic carminative, creating flesh, muscle and milk. Much used in nursing.

ST. T.—1860—X.
Another ingredient of remarkable and wonderful virtue used in the preparation of these Bitters, is a native of Brazil, and as yet unknown to the commerce of the world. A Spanish writer says:—"I was administered with St. Croix Rum," never fails to relieve nervous tremor, wakefulness, disturbed sleep, &c., and that it is used with great effect by the Brazilians, Spanish and Peruvian ladies to lighten their color and beauty. It imparts cheerfulness to the disposition, vigor to the appetite, and brilliancy to the complexion."
We withhold its name from the public for the present.
To the above are added *Glove Buds, Orange, Caraway, Carduus, Snake Root, &c.,* all preserved in perfectly pure
ST. CROIX RUM
The tonic properties of St. Croix Rum, and its powerful invigorating effects, have been long known to the physicians of the world. Bilious, Intermittent and Chills Fevers, engendered by the change of water and diet of travellers, particularly upon western rivers, are prevented and cured by the Plantation Bitters. They are also reliable to prevent sea sickness.
