keep you posted. The above is from a very reliable source, but it is too late for the Democrats to throw the load off their shoulders, they reluctantly took it up, and although the corruption of Uncle Sammy stinks, they have to carry it until the 7th of November, when the Republicans will open a place in the ground rights of full citizenship. But no man in the South can deny that the main struggle of the secession leaders is now to gain power over the negro

Vo- negro in those States-and the extent States. In 1868, they made the issue boldly, and it was answered in unmisthe newspapers in the South. But the result of that election so broke down their hopes, that, in 1872, they accepted Horace Greeley, or pretended to accept him, in the hope that a defeat of the Republican party, no matter how accomplished, would be, at least, an entering wedge to a restoration of States rights, influence and power in the administration of affairs. Their failure in this flank movement was still more decided than was the direct effort of 1868. Now, in 1876, we find them returning to the tactics of 1868 and nominating candidates who were opposed to the presecution of the war in 1864, and whose past records have been against the ideas of national authority e tablished by the results of the late war. The Democratic party now professes to accept the results of the war. They are forced to do so while the Republicans are in power. But have Democrats given those results such a place in their hearts as to be safely trusted with their complete and steady execution? Anything less than this renders gards, but in sober earnest in this openpeace in the country impossible. The risk is too fearful for thoughtful men to take. The distribution of official patronage, the pretence of reforming minor abuses, the ambition of leaders however worthy, and, indeed, all the questions and objects ordinarily involved in the current administration of afgrade movement.

The great war of ideas had been steadily approaching for years. But we of the South were blinded. We deceived ourselves or suffered others to deceive us. We were betrayed by pretended friends. We have paid a penalty which, if it does not make us wiser, it is because our destruction has decreed in the Courts of Heaven. The teen years. They are but the culminaion of purposes traceable through preceding centuries. They will not be set back by human hands. We may make trouble and desolation for ourselves and perhaps for others. But the onward progress of events will not be stayed. The tempest lashes the sea or the earthquake may rock the ground on which we stand. We wonder and tremble and forget, at the moment, the insignificance play of God's purposes and power. The clouds may hide the sun from view, but we know he is still keeping his eternal rounds. The earth does not pause in its orbit for the tempest, and though the earthquake may turn land into sea and sea into land, the seasons do not heed its convulsions. And God's moral ws move loward the current of events as irresistibly as do those which govern the national world. This moral purpose will not be defeated by the esser agencies of human hands. They run steadily on in their due times and agasons. Men may wage their wars in opposition, and nations may clash against nations. The wicked man and the fool may invite destruction and devolve the wise and the good in a common desolation. But the march and unity of events marks the eternal purposes unbroken. We may fight destiny | county : and die : but is it not wiser to consider.

What has the South accomplished by its stolid adherance to the blind tenets of slavery? Who denies that it rather hastened than retarded emancipation!
