Every number has 16 imperial pages, with fine engravings of Machinery, new inventions, tools for the workshop farm and household, engineering works, dwelling house, Public buildings.

A journal of so much intrinsic value, at the

The Publishers of the Scientific American are the most Exten sive Patent Solicitors in the world, and have unequalled facilities for gathering a complete knowledge of Invention and Discovery through out the world: and with a view to mark the quarter of a century, during which this journal has held the first place in Scientific and Mechanical Literature, the Publishers will issue on January first the large and splendid Steel Engraving by John Sartain of Philadelphia, en-"MEN OF PROGRESS-AMERICAN INVENT-

ORS," the plate costing nearly \$4,000 to engrave, and contains nineteen likenesses of Illustrious American Inventors. It is a superb work of art. STANDARD PERIODICALS FOR 1870 PARALYSIS.

1. The Edinburgh Review, THIS IS THE OLDEST OF THE SERIES. In its main features it still follows in the path marked out by Brougham, Jeffrey, Sydney, Smith and Lord Holland, its original founders and first contributors.

2. The London Quarterly Review, which commences its 128th volume with the January number, was set on foot as a rival to the Edinburgh. It resolutely maintains its opposition in politics, and shows equal vigor in its literary department.

3. The Westminster Review, has just closed its 92d volume. In point of literary ability this Review is fast rising to a level with its competitors. It is the advocate of political and religious liberalism.

4. The North British Review, now in its 51st volume. occupies a very 1 igh position in periodical literature. Passing beyond the narrow formalism of schools and parties, it appeals to a wider range of sympathies and a higher integrity of conviction. wckla5ood's E. Equalling the Quartilies in its literary and scientific departments, it has won a wide reputation for the narratives and sketches which enliven its pages.

of a young lady in 1861. In the years 1862 and I had charge of Hospitals Nos. 2, 3 and 15, Nash-ville, Tenn., and of the many cases which came under my treatment there, NOT ONE RESULTED FATALLY. In 1864 I was Mayor and Health Officer of the City of Natchez, Miss., also Surgeon of the 28th Illinois Infantry, and in prescribing for THIS DISEASE, GOOD HEALTH succeeded in EVE-

RY instance. In 1865 I removed to Milwaukee, Wisconsin, to superintend the general United
