## ITALY BEGINS THE ATTACK

### Bombardment of Tripoli Started This Morning

All Inhabitants Save the Garrison Have Left the City—Arming the Arabs For Guerrilla Warfare—Italian Embassy Says There Can Be No Mediation Until Turkey Recognizes Italy's Occupation of Tripoli.

Glasgow, Scotland, Oct. 3.—A private message from Jerba, an island off Tunis, says: "A message from Tripoli says the bombardment has begun. The ships are bombarding several places. The inhabitants are leaving."

Attack Started at Ten. Paris, Oct. 3.—A Temps dispatch from Rome this evening says that according to information from an official source the bombardment of Tripoli began at 10 o'clock this forenoon.

The Italian Embassy this evening authorized the following statement: "Mediation by the powers between Italy and Turkey is mentioned by French and foreign newspapers. No declaration regarding this has been made by the Royal government, which is resting upon the logic of events. It cannot speak of mediation or negotiations until Turkey has recognized the occupation of Tripoli by Italy."

Japan Strictly Neutral. Tokio, Oct. 3.—Japan has issued a declaration of strict neutrality in the Italo-Turkish war.

Message Says Bombardment Is On. London, Oct. 3.—A Rome dispatch states that the bombardment of Tripoli by the Italian fleet "has begun."

The message is timed at the Italian capital as 11:30 o'clock this morning. The hour when the bombardment began is not stated. Up to early this afternoon there had been no confirmation, though last night's advices indicated an attack on the Tripolitan forts might begin today. The Turkish Ambassador, Tewfik Pasha, presented a note from his Government to the foreign office today complaining that contrary to all international rules of warfare the declaration of war against Turkey was preceded by hostilities upon the part of the Italian warships. Turkey has postponed certain plans of action while making a fresh appeal to the powers, believing it is yet possible to end the war.

Believes Conflict Will be Brief. Berlin, Oct. 3.—It was announced at the Foreign Office that Germany probably would not proclaim neutrality toward the Turko-Italian war because of the probabilities that the conflict will be of short duration. Steps toward mediation are unlikely before the Tripolitan coast has been occupied by the Italians.

Italians Leaving Constantinople. Constantinople, Oct. 3.—The German Consulate is stormed by anxious Italians asking for passports. Yesterday six hundred left. Today the consulate had six thousand applicants. The Turkish cable to Tripoli was cut and officials are ignorant about what is happening there. An Egyptian noble has offered to organize a force of thirty thousand Egyptians to march against the Italians in Tripoli.

Guerrilla Warfare. Rome, Oct. 3.—A wireless message received from the Italian fleet off Tripoli, states that the city is now practically deserted outside the Turkish garrison. The natives have retired to the interior. The plan adopted evidently is to arm the Arab tribes for guerrilla warfare against the Italians.

## UP FROM THE BEACH.

Big Movement From There Yesterday, But Still a Number of People Remaining.

Yesterday, being October 2nd bringing about the semi-winter schedule of the Tidewater Power Company, on the suburban line, there was a big movement from Wrightsville Beach. Many families also had to move up on account of the start of school. However, there is still a number of people remaining on the beach, and the travel this morning was heavy. Relative to the latter, there was general complaint yesterday when one car had to bring over one hundred people up from the beach. There was bitter criticism this morning when again there was only one car for the first trip up from the beach. The car was not only crowded, but many people had to stand in the aisles and on the front and rear platforms. The travel not only includes the people from the beach, but many from other points along the line.

## TEACHING THEM FAR, FAR AWAY

### Educational Work in the Philippines

Chicago University Professor Just Back Talk Interestingly of American Educational Triumphs in the Philippines—Pays High Tribute to the Tutors.

Washington, Oct. 3.—A noted professor from the University of Chicago who spent several months in the Philippine Islands as lecturer at the Teachers' Vacation Assembly conducted by the Bureau of Education every year at Baguio, the summer capital of the islands, returned recently to the United States and in speaking of the work of the schools there just before he sailed said:

"Other nations one of these days will be coming to the Philippines to see how the educational triumphs have been won."

Without question one of the triumphs of America in the Orient is the wonderful work that has been accomplished there by the public school system during the ten years since its organization.

From a mere handful of pupils and an expenditure of a few thousand dollars in 1901 the system has developed until now it reaches into every town and nearly every village of the island, and last year instructed more than half a million boys and girls, and the Philippine government spent over three and a quarter million dollars of local revenue for education.

The services of over nine thousand American and Filipino teachers are employed in the various schools of the islands as supervisors and classroom teachers of the academic and technical subjects of the courses of study.

The University of Chicago sent Dr. Shepardson and Dr. Godde, two of its ablest and most successful extension lecturers, to Manila during the past vacation to remain in residence at the Academic Assembly of teachers and conduct educational courses during the session.

In referring to the class of men and women engaged in the educational work there they speak in the highest terms:

"I have seen many gatherings of educators but none which average higher than this one. The reason no doubt is that nowhere else could such a company be found of men and women who are doing pioneer work, who have the spirit of the pioneer, and whose earnestness in pursuing ideals is reflected in conversation and conference talk.

"The company in attendance at the Assembly has impressed me with a feeling of pride in the quality of manhood and womanhood in the service of the Bureau. They are clean-cut—straight forward, earnest people, the stuff pioneers are made of. As I came to know them personally and to hear of their work in all parts of the islands, the problems they are meeting and solving and the success with which they are carrying the 'message to Garcia' in the service of education, I felt proud that I am an American, and that the generous American aim of helping these people to help themselves in being realized in the splendid service of the Director and his coworkers in the Bureau of Education."

This is a field which requires the services of young men and women of superior qualifications, excellent character and good preparations, who are able to maintain a position of influence among a rapidly developing people. For the right kind of men there are excellent opportunities to take a large part in the solution of some of the problems now confronting this country and at the same time gain an experience and training which will be of great value.

The government employs men as supervisors, teachers of science, English, mathematics, history, agriculture manual training, and women for domestic science and home economy.

The United States civil service Commission announces an examination for December 27-28, 1911, in various cities of the country for the purpose of securing eligibles to be appointed in the spring of 1912 for work beginning with the opening of the next school year. Detailed information relative to the nature of the service and the examinations may be had by writing to the Bureau of Insular Affairs, Washington, D. C.
