

CASE NOW READY TO GO TO THE JURY

Galveston, Oct. 28.—The defense rested at 11:17 a. m. today after continuing its sur-rebuttal in the case of John Copeland, charged with the murder of William Black, an anti-Catholic lecturer.

"Old Milyuns says that since he made his pile of money he feels like a neutral nation." "Why is that?" "Because he has so many diplomatic relations."

COAL FAMINE FOR WASHINGTON

Departments of Printing and Engraving May Fore to Close on That Account.

Washington, D. C., Oct. 28.—The approaching winter and steadily increasing reports of the shortage of the coal supply and ascending coal prices are causing but little more apprehension to the unfortunate people forced to live in the slums and buy their fuel by the bucket than to Uncle Sam with the treasury at his command and 40,000-odd employees in the departments here to keep warm this winter.

The government departments here that use about 140,000 tons of coal annually have but a one-week supply on hand and can obtain no assurances as to future delivery.

"Unless this situation is quickly remedied, it may mean serious discomfort for the 40,000 government employees here, and perhaps the shutting down of the Government Printing Office and the Bureau of Engraving and Printing," said James L. Wilmet, chief clerk of the Treasury Department and member of the general supply committee.

The contractors assert the trouble is caused by the shortage of coal cars, preventing the mines from shipping any coal to this city. As a general rule a supply of several weeks is kept on hand, but owing to the car shortage situation the Treasury Department has but one week's supply on hand and the other departments only one or two days supply.

What little coal has come to Washington in the past two weeks has been consigned to dealers with which to fill orders promised last May and June. The situation is causing government officials considerable anxiety.

The weather in Washington has been quite warm and pleasant so far this fall and officials fear to contemplate what will happen if a sudden cold spell comes along and rapidly eats up the small supply on hand.

The strongest sort of pressure is being brought on the contractors to urge them to hasten their deliveries, but so far little has been accomplished in this way.

All the heating and lighting plants of the departments, and the operation of the Government Printing Office, Bureau of Engraving and Printing, Navy Yard and many other activities are dependent on the coal supply.

Several days ago the Superintendent of the Treasury Department building and some other departments served notice that owing to the small supply of coal on hand windows in the departments must be kept closed and ventilation obtained through the regular ventilating system, so as to make it unnecessary to have so much heat at the radiators and thus save the coal pile.

The general supply committee is working on some plan to relieve the situation before the arrival of a cold wave.

Not a Bite of Breakfast Until You Drink Water

Says a glass of hot water and phosphate prevents illness and keeps us fit.

Just as coal, when it burns, leaves behind a certain amount of combustible material in the form of ashes, so the food and drink taken day after day leaves in the alimentary canal a certain amount of indigestible material, which if not completely eliminated from the system each day, becomes food for the millions of bacteria which infest the bowels. From this mass of left over waste, toxins and ptomaine-like poisons are formed and sucked into the blood.

Men and women who can't get feeling right must begin to take inside baths. Before eating breakfast each morning drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash out of the thirty feet of bowels the previous day's accumulation of poisons and toxins and to keep the entire alimentary canal clean, pure and fresh.

Those who are subject to sick headache, colds, biliousness, constipation, others who wake up with bad taste, foul breath, backache, rheumatic stiffness, or have a sour, gassy stomach after meals, are urged to get a quarter pound of limestone phosphate from the drug store, and begin practicing internal sanitation. This will cost very little, but is sufficient to make anyone an enthusiast on the subject.

Remember inside bathing is more important than outside bathing, because the skin pores do not absorb impurities into the blood, causing poor health, while the bowel pores do. Just as soap and hot water cleanses, sweetens and freshens the skin, so hot water and limestone phosphate act on the stomach, liver, kidneys and bowels.

A BIG HIT IN WILMINGTON. EVERY home should try some. It is good for breakfast, dinner or supper—always tastes good—Goose Liver Pudding. Fresh lot of asparagus 15c per can, or 2 for 25c.
