

## DEPARTMENT HEADS MUST COOPERATE IN BIG REDUCTION

TO AVOID DEFICIT

**Heads of State Departments Meet With Executive Council N. A. Townsend and Members of Advisory Budget Commission in Regular SemiAnnual Meeting Several Departments Have Reduced Operation Personnel.**

At Walter Hotel

By J. C. BASKERFIELD.

Raleigh, July 31.—Heads of state departments must cooperate in reducing expenses at the rate of approximately \$1,000,000 a year for the next two years in order to keep the state from ending the present biennium with a \$10,000 deficit, as was told by Assistant Director of the budget Pat H. Williams, executive counsel N. A. Townsend and members of the advisory budget commission, in their regular semiannual meeting with the budget committee.

The department heads indicated their willingness to cooperate in every way possible.

In many ways like spending was similar to the new load sheet the commissioners will have to file with the heads of the various state institutions at which time Governor Gardner will then submit his budget to the legislature. And asked their cooperation the Boleman expenditures elsewhere which were reasonable, so as not to interfere excessively with him in making a sufficient saving in all appropriations. The state makes it mandatory upon the governors an effort on the index to make it impossible in an amounting those it at one time already seems likely.

However, it will be somewhat more difficult for the department heads to reveal their expenditures since they have a smaller amount of money which can stand a reduction than the executives and consequently must exercise the greatest economy in operation for the next two years.

It is pointed out by Assistant Director Williams, in the absence of Governor Gardner, that while the total appropriations for the previous biennium totals \$138,748,764, that \$2,012,954 is appropriated for purposes of the various state institutions, with about \$1,000,000 in the hands and similar funds in the state since \$15,931,416 is left and is capable of being controlled. This amount is divided so that the department heads above all know of the sum and the departments above \$1,000,000.

Response on the comparatively small portion of budget appropriations that can be reduced, it will be necessary for the \$10,000 to be made up by a reduction of 12.8 per cent of the amount so it can be played without a deficit. Director Williams pointed out. And this will require an additional amount on the part of the various institution and department heads, according to budget director officials, since they must share approximately \$1,000,000 a year in appropriations amounting to only \$2,000,000 at sums.

The institutional and department heads will be helped in the task of making cuts by expense sheet by the budget bureau; however, through its system of higher supervision of expenditures from appropriations through the quarterly adjustments by the budget bureau.

The various department heads admitted that they are faced with a difficult task but that if they must reduce expenses they must do so and that there was no use in trying to get around realities.

Several departments have anticipated that the budget bureau and have started to estimate their operating personnel and determine how far it goes in reorganizing within the department and other departments which show potential for some economies.

**THE PRINTER IS ALWAYS TO BLAME.**

By R. E. Johnson  
It may be said that all the men, those who print, are not bad men. They are not all bad men.

And the printer is always to blame. He does his work without any help. For all we can stand is good.

Therefore, and blame the printer.

We write our messages in the hope to read it in beyond our ken.

Yet we expect the printer.

To work it out unless it's right. We think not of just time or night. It's wrong—we blame the printer.

We hold our stings until the last, Then try to rush it through so fast.

The printer gets smacked under.

But still we camp upon his trail.

And prod him on with words of fire.

Or rant and roar like thunder.

He shuns it through, the proof we get—

But find the job is not right yet.

We shop that proof to splinters.

It takes two days before he knows

Just what each hydrolyphite shows.

A dad lot are those printers.

The job's delivered. Some relief

To know we're through with rust and grit.

We ought to thank the printer.

But, no! The poor man's luck is out.

He overcharged us without doubt.

Once more we curse the printer.
