'NEW NIAGARA' IS PROJECT STARTED IN WEST CAROLINA

WILL SPEND \$125,000,000

Through Eight Separate Dams Electrical Power Exceeding in Magnitude the Energy Generated by Niagara Falls Will be Created; Seven of Eight Projects Will be in Western North Carolina and Other in Tennessee.

Charlotte, N. C., Aug. 8.—(UPI)—The Charlotte Observer today says a "New Niagara" is planned in the mountains of North Carolina and Tennessee by the Aluminum Company of America which will spend \$125,000,000 in development of hydroelectric projects.

Through eight separate dams, the paper says in a special dispatch from Asheville, N. C., electrical power exceeding in magnitude the energy now generated by Niagara Falls will be created. Seven of the eight projects named in the newspaper story will be in western North Carolina and the other in Tennessee.

The paper declares the projects in their totality represent some of the largest and most ambitious power developments in the United States and will require years to execute.

Recent formation of the National Power and Light Company with principal offices at Bryan City, N. C., and an authorized capital stock of \$100,000,000 is declared to be a step in the plan of the Aluminum Company.

The newspaper story says the lakes created by damming streams will wipe out the towns of Almond, Bushnell, Judson, Wesser, Potomac Creek, Eppes Springs and several smaller villages. The cost of building railroads and highways is given as \$175,000.

The Aluminum Company of America first selected power sites in western North Carolina in 1925. Two plants are now in operation and a third is under construction.

The Observer today says the next step in development of the "New Niagara" will be construction of a plant at Fontana on the Tennessee river. It declares two others are planned at Bushnell near the junction of the Tennessee and Chickamauga rivers, one at Neelyville and one at Apaloni.

Andrew W. Mellon, Secretary of the Treasury, is one of the principal stockholders of the Aluminum Company of America.

PEACE GARDEN PROPOSED

Toronto, Ont., Aug. 8.—(UPI)—A proposal to create a 100-acre garden on the border line between Canada and the United States to be known as "the International Peace Garden," a memorial to the peaceful relations existing between the two countries for the last 100 years, was discussed yesterday at the annual convention of the International Association of Gardeners.

The question of the site for the garden was put over until future meeting.

A suggestion was made that a fund of \$50,000 be created by a 25 cent contribution from each adult in Canada and United States, and a five cent contribution from every school child.

It is proposed to have 200 acres of the garden on the Canadian side and 200 on the United States side of the border.

Dirigible Starts On First Air Flight Around World

By W. W. CHAPLIN,
Associated Press Staff Writer

Savoy Air Station, Lakehurst, N. J., Aug. 8.—(UPI)—As a hand placed "Pax Longa Viva Taif!" the German dirigible Graf Zeppelin poised its nose into a blinding sky at 12:45 Eastern Daylight time this morning, and set merrily forth on the first air ship flight around the world.

The start was a little later than Dr. Hugo Eckener had planned, but the delay was unavoidably caused by a plumber's apprentice from Trenton, N. J., who had ruptured big ideas about stowaways.

After the aspiring steward, Nels Roth had been safely deposited in the navy bar, and a thorough search had convinced officers that neither such ne'er-again had been sighted, the first cargo part had been flighted.

COUNTY AID SHOWS BIG INCREASE

Raleigh, N. C., Aug. 8.—(UPI)—The highway act passed by the 1929 legislature may afford the counties greater relief than was anticipated.

Receipts for the county aid road in July were \$8,000 more than the estimated average monthly revenue. A total of \$216,758.43 was collected, as compared to an estimated \$208,333.

The 1929 highway act provided for an increase of one cent in the state gasoline tax, but with the provision that the increased revenue be used to relieve the counties or part of the burden of taxes for commercial roads.

SOVIET PLANE IN TRANS-PACIFIC ATTEMPT

SOVIET PLANE OFF FOR NEW YORK VIA SIBERIA AND ALASKA

12,000 MILE FLIGHT

First Stop of Big Two-Motored Airplane Will be Omsk; The Plane Manned by Four Soviet Flyers; Northern Pacific Section of Itinerary Flown but Twice Before.

London, Aug. 8.—(UPI)—Telegraph Company dispatches from Berlin said the Soviet plane, with a crew of six, took off at Moscow today on a flight to New York via the Siberian and Alaskan routes.

The flight will be preceded by a stopover at Omsk.

The first leg Moscow to Omsk is 3,400 miles.

The airplane, of the two-mile altitude aluminum design, with rear and nosepower engines, was built by popular subscription from millions of members of the aviation and electrical unions.

Today's route covers 12,000 miles, mostly across Siberia, the Aleutian Islands, Alaska, Seattle, San Francisco, and Chicago. The northern Pacific section of the itinerary has been flown but twice before, one by English aviators once, and Soviet and again in 1928 by the first United States airmen.

The question of the site for the garden was put over until future meeting.

A suggestion was made that a fund of \$50,000 be created by a 25 cent contribution from each adult in Canada and United States, and a five cent contribution from every school child.

It is proposed to have 200 acres of the garden on the Canadian side and 200 on the United States side of the border.

The question of the site for the garden was a prospective world shortage of wheat this season and described the immediate situation "to hurried and to some extent at least, unscientific marketing of wheat by farmers."

The suggestion can be induced to hold back their shipments past the congressional period, it said, "the success of stabilization will be accomplished and the farmers generally will benefit by the slower marketing of wheat."

The suggestion was made that all local financial institutions will help the farmers to carry out this program.

Doctors listed a slight increase in

local financial institutions and the

receipts of the Young plan, but said that there was little chance of recovery because of internal bleeding from the three wounds. There was little sign of loss of blood before the physician arrived and after he was removed to the hospital.

The shot that struck Mrs. Brinkley in the neck was said to have passed between the jugular vein and the spinal column, probably grazing the spinal column as doctors noted a paralyzed condition in the right arm and shoulder before she was removed to the hospital.

The three shots that penetrated Brinkley's left chest passed through the body, all were in the vicinity of the heart and one, if not all was believed to have penetrated his heart. He was still living late this afternoon.

Doctors listed a slight increase in

local financial institutions and the

receipts of the Young plan, but

SHOOTS WIFE AND THEN SERIOUSLY WOUNDS SELF

FEDERAL BOARD REFUSES ENGAGE IN STABILIZATION

PROSPECTIVE SHORTAGE

Plans for Grain Corporation Projected at Recent Chicago Conference Progressing; If Farmers Can Be Induced to Hold Back Shipments Effect of Stabilization Will be Accomplished.

Washington, Aug. 8.—(UPI)—The federal farm board has voted to engage in wheat stabilization operations in spite of persistent complaints to do so as a means of preventing encroachment of foreign grain.

The chairman of the farmers' grain marketing corporation, which will be engaged with handling and storing grain and distributing seed, grain and fertilizer, and again in 1929 in the first United States arms

will likely turn back before

breaching Japan.

PROHIBITION IS GIVEN SEPARATE PLACE ON PROGRAM

COMMITTEES FORMED

Eleven Different Angles of American Crime to be Investigated; Commission Indicates Importance Attached to Prohibition by Naming its Own Chairman as Head of Committee to Conduct Investigation.

Washington, Aug. 8.—(UPI)—Prohibition has been claimed a place in a program of eleven investigation committees set up in the national law enforcement conference after four months of preliminary study of the crime problem.

No other such body of juries was singled out for such concentrated study, and the committee on prohibition indicated the importance of attaching to prohibition its own chairman as head of the committee which will conduct this investigation.

Each of the seven lines of investigation mapped out will be pursued under the direction of a small committee with Chairman Wickenden as an ex-officio member of all. Besides prohibition there will be with cases of crime, bribery, corruption, graft, gambling, justice, police, and criminal justice.

Eleven different angles of American crime to be investigated, the commission indicates, will be studied by the committee on prohibition, which will be headed by John W. Wickenden, as head of the committee to conduct investigation.

The commission will be headed by

John W. Wickenden, as head of the committee to conduct investigation.

COTTON FUTURES DROPPED TWO DOLLARS PER BALE ON NEW YORK MARKET TODAY

PUBLICATION REPORT

Condition of the Crop Was Placed at 67.9 With a Ten Year Average of 67.3; On This Basis the Government Estimates a Crop of 15,543,000 Bales.

WEEPS ON DETAILING GRUESOME MURDER FORMER PROFESSOR

OF GIRL SWEETHEART

Dr. Snook Testified That He Struck First Blow to Protect Himself From Attack of Coed

Paramour Following Argument as Result of Telling Her He Was Leaving Town to Visit His Mother; Has No Recollection of Slashing the Girl's Throat With Pocket Knife.

Long Island, Aug. 8.—(UPI)—Dr. John W. Snook, who is accused of killing his coed sweetheart, was questioned yesterday by the grand jury in the case of the girl's death.

He was asked if he had been present at the scene of the killing.

"I was there," he said. "I thought I would go to see what was going on."

He said he had been invited to the house of his coed sweetheart.
