ARMAS HARACI

A Full and Simple Explanation of \$25,000 in town having less than of the Recent Gold Standard Bill

The conference committee gold standard bill passed the House of Representatives on Tuesday and will be in the hands of the President for his signature before the end of the week. When the bill becomes law the silver issues will cease to be of consequence. But the bill does more than established the gold standard. It makes many changes in the present financial system, changes in the interest of stability and of sim plicity. Secretary Gage's summary of it which was sent out by the Associated Press shows just what the new currency law is.

by the sale of bonds or otherwise

The greenbacks wili remains in cir-

from the fund, they will be exchang-

ed for gold in the general fund and

will circulate instead of the coin,

The treasury notes issued under the

Sherman act are, however, to be re-

tired as fast as the silver bullion pur

chased by them is coined. These

J Mardre & take our position in the front rank can be quickly gathered from Great

> Britain's experience. For this year aione Great Britain is spreading over \$150,000,000 on and the cost of the whole navy placed at almost \$600,000,000. Besides that, there are nearly thirty new vessels under construction, and these be included the total would be

increased almost another \$100,000,000 There several interesting problems ships, the main one being the price of armor plate. Congress passed act limiting the price to \$300 the on. For the time the Harvey plate was perferred, but now the Krupp plate has the call. In view of the mous profits made by the big steel Pa. For sale by J Mardre & Bre mills, the progress of this question will be watched with more than ordinary interest. The steel companies assert that they cannot and will not supply the plate for \$300 per ton, and they point to the fact that the latest British battle-ship will be supplied with Krupp plates at \$587 per ton.

Representative Cummings, a mem ber of the Naval Committee, explains the difference between the two plates like the mastodon, and the Buffalo, as follows: "A Krupp plate, no matter of what thickness, will harden to oneonly be known by the researches of third of this thickness. A Harvey the aethnologist and romancer. But plate, no matter how thick, will har.
