# **Reducing Fats, Oils and Grease in Our Sewers**

# What Is FOG?

Fats, oils and grease (FOG) are found in food scraps, meat fats, lard, oil, margarine, butter, sauces and dairy products. FOG is commonly associated with fried foods and baked goods prepared at home or in a food establishment. When FOG is not disposed of properly, it can clog your home's plumbing as well

Sewer pipe clogged with grease as municipal sewers.

GREASE

### Why Should FOG Matter To You?

ASTEWATER

When washed down a sink or drain, FOG builds up over time and can cause a blockage in your drains, pipes and in sanitary sewers. Blockages lead to increased costs to maintain private plumbing, our sewers, the wastewater treatment plants and public and private property.

 Neighborhood: Plumbing and sewer backups can result in property damage and various code violations. These backups can also create hazardous and unhealthy conditions.

• Environment: Clogged sewers can cause raw sewage overflows, which release untreated sewage into our rivers and streams. Sewer overflows make waterways unsafe for recreation, and they threaten the fish and other aquatic life that live in our rivers and streams.

• Quality of Life: Sewer backups and clogs attract insects and vermin, resulting in undesirable and unhealthy living conditions.

### How Can You Reduce FOG In Our Sewers?

 Pour cooking fat or grease into a small container. Once it solidifies, place it in the garbage.

 Dispose of food waste in the trash or compost organic waste instead of putting it down the garbage disposal.

 "Dry wipe" pots, pans and dishes before washing to minimize the amount of FOG and solids washed down the drain.

 Do not put used oil, oil-based paints, solvents or other chemicals down sewer lines or storm drain.

Educate others on the damage that FOG can cause.

Pour cooking

fat or grease

container. Once

into a small

change the Regulatory Flood Protection Elevation from one (1) foot of freeboard to five (5) feet of freeboard in flood zones with an established Base Flood Elevation. The amendment will also change the elevation in flood zones where no BFE has been established from two (2) feet above adjacent grade to five (5) feet above adjacent grade.

The public hearing has been set for Monday, January 7, 2019 at 6:00 PM and will be held in the County Administration Building, Commissioners Meeting Room, 106 Dundee Street, Windsor, North Carolina. The Flood Damage Prevention Ordinance may viewed in the Bertie County Planning & Inspections Department or by visiting the Bertie County website at www.co.bertie.nc.us. Questions may be directed to Traci White, Planning Director at (252) 794-6185 or traci.white@bertie.nc.gov
