DETROIT - the nation's motor capital - goes FORD V-8 three to one!

DETROITERS help to build most of the cars made in this country. They know what goes into them... and what their owners can expect to get out of them.

That's why Detroit's preference means something to car buyers in every other city in America.

This year Detroit's choice is three to one for the Ford V-8... powerful evidence of the value these wise buyers know is built into this car. The truth is, that the more

high priced cars you look at today, the more Ford V-8 features you'll see.

The only V-8 engine in a car under \$2500... torque-tube drive... improved clear-vision ventilation... dual down-draft carburetion... safety glass, and steel welded bodies.

Put this new Ford V-8 to your own tests, under your own conditions. Then you'll know why the men who build and know motor cars choose it.
