Merger of the Highlands Improvement association and the Highlands Community club was completed Tuesday afternoon at a tea held at the Martin house attended by members of both organizations. After some discussion it was decided to name the new organization the Satulah club, for the club owns the top of Satulah mountain. LAKE DRAINED

Mirror Lake was drained the first part of this week. It is understood the drainage was for the purpose of raising the dam. It is hoped also that the drainage will serve to check the growth of water lilies, which in some sections of the lake have grown so thick as to make it almost impassable for row boats.

MAKING FISH SURVEY

Two government officials were in this vicinity this week making a survey of the streams to determine their capacity for restocking with fish.

CORBIN FAMILY HOLDS REUNION

More than 400 at Family Gathering at Home of Dewey Corbin

More than 400 relatives and invited guests attended the Corbin reunion at the home of Dewey Corbin on Rabbit Creek Sunday.

This reunion is held annually in memory of the late John Corbin, who was among the first settlers of this section of the county, where he lived for more than sixty years.

A number of relatives and friends from different sections of this state and from South Carolina and Georgia were present.

There was an interesting program which consisted of music and talk from different members of the family.

A bounteous picnic dinner was served on a long table under the shade of the apple trees.

Jim Raby, president of the family organization, presided at the reunion. The principal speaker on the program was the Rev. A. S. Solesbee. Short talks also were made by Mr. Solesbee, J. M. Corbin, J. F. Corbin, Freeman Corbin and Dewey Corbin.

Jim Raby was reelected president and Miss Villa Corbin secretary.

The next Corbin family reunion is to be held at the same place on the fourth Sunday in September.

Victoria Falls Mile Wide

Victoria falls are situated on the Zambesi river in southern Rhodesia, more than 500 miles from the ocean on all sides except the north. They supply the outstanding scenic attraction on the continent and are more than one mile wide. The waters, which are at their liveliest during April, fall over a precipice 400 feet high into a cleft in the earth surging into a chasm of unknown depth, and narrowing into a seemingly endless zigzag canyon cut through the solid rock.

eyeball on Shifting Pivot

The human eyeball does not pivot exactly on its center as has always been supposed. It rotates on a shifting pivot.
