Designed in Sizes: 24, 26, 28, 30, 32, 34, 36, 38, 40, 42 and 44. Size 38 requires 3 1/4 yards of 39 inch material, with 1 1/2 yard contrasting.

Pattern 8337—Have you noticed how smart the woman looks who uses strong contrast in the assembling of her costume, either by means of accessories or else by contrasting colors and materials in the frock itself? The becoming and useful frock sketched above is designed with this idea in mind—giving a woman an opportunity to combine two materials or two colors of the same material.

Metallic prints are very popular. Such material may be used here for the light upper part of the dress and upper sleeves, so as to form a flattering and becoming frame for the face to which the slight cowl at the neckline adds its bit. The lower part of the waist and yoke of the skirt are cut in one and fitted by means of darts at the waistline, and the skirt is flared slightly at the lower edge.

Life Is Chain of Processes

Enough is known about life and growth for science to realize that it is the net result of a chain of processes following one another. It might be reasonable to suppose, declares a scientist in the New York Herald Tribune, that some of these processes in the chain are slowed down greatly by the presence of heavy hydrogen. As heavy hydrogen replaces the ordinary kind, growth is practically inhibited. The inhibition of a few essential steps, in the chain of events that cause growth, would stop all the processes that succeed them in the growth sequence.

You, too, in those moments when you feel tired, cross, dispirited, will find that Camels give you a delightful "lift" which quickly dispels fatigue and irritability. It's a "lift" which you can enjoy at will, for Camel's costlier tobaccos never jangle the nerves.
