**NOTICE OF SALE**

North Carolina,  
Macon County.  
WHEREAS, power of sale was vested in the undersigned Trustee by deed of trust executed by L. F. McCall and wife, Roxie McCall, dated November 21, 1929 and registered in the office of the Register of Deeds for Macon County in Record of Mortgages and Deeds of Trust No. 31, page 260; and default having been made in the payment of the indebtedness secured thereby;  
I will, therefore, by virtue of the power of sale in said deed of trust in me vested, on Wednesday, the 10th day of April, 1935, at 12:00 noon sell at the Court House door at Franklin, N. C., at public auction to the highest bidder for cash the following described property:  
A tract or parcel of land situate in Sugarfork Township, Macon County, State of North Carolina, and being all the land described in a deed from E. G. Houston and wife, to L. F. McCall, dated August 16, 1922 and recorded in the office of the Register of Deeds for Macon County in Book H-4 of Deeds, page 524, to which deed as so recorded reference is hereby made for a more complete and definite description of said lands. Containing 53 acres, more or less.  
This the 11th day of March, 1935.  
GEO. B. PATTON, Trustee.

**MOTORS . . . . . new fuels**  
What may turn out to be the most significant news of recent years is the announcement from Germany that means have been developed for driving motor cars with illuminating gas and wood.  
One type of truck now widely used, it is reported, uses gas distilled from wood. It carries wood in a rear compartment, and is said to cost 30 per cent less to operate than if driven by gasoline. Other cars have been quickly and cheaply adapted to use illuminating gas instead of gasoline, a tank of gas being carried in place of the gasoline tank. Also there have been developed new types of steam-propelled automobiles, using a variety of fuels, while a new stationary motor for farm use can be operated on coal dust, vegetable dust, dried leaves or pulverized corncobs.  
There never has been any question in my mind that the problem of the future supply of petroleum was no real problem at all. The time will come, whenever it is economical to do so, when we will again get our power from vegetable products.  
I hear from other sources that aviators have not abandoned the idea of steam engines instead of internal combustion motors for stratosphere flights.  
I may not live to see it, but some day, I believe, men will fly around the world between sun and sun, with steam-engines propelling their planes at height of ten miles.  
**CODDLING . . . . . all wrong**  
One of the troubles with modern youth, as I have often remarked before, is that they have too much done for them and are not thrown on their own resources early enough or, emphatically enough. They grow up expecting society to provide a soft cradle for them to ease their way through life.  
That is why I applaud the re-

fusal of the New York State Commissioner of Education to order a school bus to make a half-mile detour to pick up one thirteen-year-old boy. Any boy of thirteen who is not a cripple or an invalid ought to be able to walk half a mile to the bus stop, remarked Commissioner Graves.  
The first school I ever attended was more than half a mile from our house. I was under five when I began to walk to and from school. In my grade school days it was a mile walk each way; when I got to high school it was a three-mile walk. Nobody had ever thought of providing free and easy transportation for school children in those days. We didn't get even free schoolbooks. And we grew up with a pretty clear idea that anything we got out of the world had to be paid for, with money or with labor.

**INQUIRY . . . . . to all**  
I would like to hear from anybody who knows of an actual instance of anybody who has received money from the Federal Government for not growing tobacco or cotton or corn or hogs or wheat, who had not previously been in the business of growing those things.  
Every little while somebody tells or prints a story of some man getting a check from Uncle Sam who has never been engaged in the line of agriculture for the control of which the money was paid. Those have always seemed like fairy tales to me. I can believe almost anything about the stupidity or carelessness of Government employees, this or any other government, but these yarns have strained my credulity.  
They have come to the front again by a statement made in all seriousness by an eminent historian, James Truslow Adams, who told of three such instances. Chester Davis, the AAA administrator, came out with a prompt denial. I have no doubt both men believe they are right. It would be a real public service to get at the facts.  
I would like to hear from any reader of this column who can furnish the name, date, place and amount of any such payment to any individual who was not entitled to it under the law.

**TREASURY DEPARTMENT,**  
Procurement Division, Public Works Branch, Washington, D. C., Mar. 20, 1935.—Sealed bids in duplicate will be publicly opened in this office at 1 p. m., Apr. 10, 1935, for furnishing all labor and materials and performing all work for installing one freight elevator in the U. S. P. O. at Franklin, N. C. Attention is directed to the special requirements of bidding, etc., set forth in the specification. The prevailing rate of wage shall be paid all laborers and mechanics employed on the project as provided in the Act of Mar. 3, 1931, (Public No. 798), and Executive Order of Jan. 19, 1932 and Order No. 6646. No bid will be considered unless it includes or is accompanied by a certificate duly executed by the bidder stating that the bidder is complying with and will continue to comply with each approved code of fair competition to which he is subject, and if engaged in any trade or industry for which there is no approved code of fair competition, then stating that as to such trade or industry he has become a party to and is complying with and will continue to comply with an agreement with the President under Section 4 (a) of the National Industry Recovery Act. Drawings and specifications may be obtained from this office in the discretion of the Assistant Director of Procurement, Public Works Branch, W. E. Reynolds, Assistant Director for Public Works.

Va-tro-nol penetrates deep into the nasal passages, reduces swollen membranes, clears away clogging mucus, brings welcome relief. . . .  
Two generous sizes . . . 30¢ and 50¢.  
USED IN TIME HELPS PREVENT MANY COLDS

**FOOD . . . . . sky high**  
Costs to city folk of the principal articles of food have gone up 34 per cent in the year ending last month, the Department of Commerce reports. Eggs are up 80 per cent, meats 41 per cent, dairy products 29 per cent, and so on.  
I don't know how much of this increase has filtered back to the farmers, who produce the food-stuffs, and how much has been absorbed by middlemen on the way from farm to consumer, but I feel certain that city people won't tolerate much higher prices. Salaries and wages for the general run of city dwellers have not increased in anything like that ratio, many not at all.  
If Government would turn its attention to the cost of distribution of food products the cost of living might not rise so fast.  
**ENCOURAGEMENT . . . to capital**  
I think the most encouraging news of the past fortnight has been the announcement that two great corporations, Swift & Company and the Pacific Gas & Electric Company, are about to offer to investors more than \$100,000,000 of new securities, to provide additional capital and retire higher-cost bond issues.  
This is a clear sign that some, at least, of the big industrialists have got over some of their fear of the future. If these new issues are readily sold, it will indicate that capital is beginning to come out of hiding. If that sets in motion a general movement of capital into industry, then it will be safe to say that the backbone of the depression has been broken.  
It takes more money than the Government can raise to set the wheels of industry running and keep them oiled. Once money is assured of a chance of fair profits, it will go to work.

**Rip-Tide**  
The Oxford dictionary defines the rip-tide or tide-rip as a commotion of the sea caused by opposing currents or by rapid currents passing over an uneven bottom. The name is also given a tidal wave or current. When a current setting to the northwest meets a strong sea breeze from the west, there is a criss-cross or tide-rip formed.

**PEP STOCK MEDICINE**

Never fails to give satisfaction. ABSOLUTELY GUARANTEED. Cows failing of milk will be restored to normal; Hogs, made to eat and fatten; Horses, to shed, fatten, and ready for hard work; poultry, wormed, and put in health so they can lay; in fact, is good for all kinds of livestock.  
PEP STOCK MEDICINE is not a tonic; but a pure consecrated medicine (has no filler like the "big" cheap boxes of other kinds you buy). Remember, your money back if you are not fully satisfied. Try a box on our money-back guarantee. Sold only by

**I Am Still Selling FERTILIZER**

With the coming of Spring the demand for OX GUANOS has become so great that, despite a previous announcement to the contrary, I have decided to handle this reliable fertilizer again this year. So come and get it, boys; I've got it in stock.

**REDUCE YOUR CROP COSTS**

You can increase your yields per acre and lower your growing costs per bushel by using

**OX GUANOS**  
It's the bushel cost, not the acre cost, that counts when crops are sold.

**Now Is the Time to Haul Fertilizer**

There's no better time than right now to "get set" for your crop. Let me supply your requirements.
