## Objects of The Building & Loan Association

### For the Prospective Home Owner:

THE amortized loan offers the prospective home owner the opportunity to get out of debt when he borrows for the purchase of a home, where the straight mortgage loan offers much less definite opportunity. Under a straight loan the borrower must solve this problem of repayment for himself and build up a fund elsewhere. The Retirement Fund Plan of a building and loan mortgage cares for that problem automatically.

### For the Savings Member:

THE outstanding advantage of the building and loan association for the savings member is SAFETY. Thirteen years of operation without sustaining a loss, bears us out in this.

The flexibility which permits a savings member to put his funds away to draw interest at six per cent, or withdraw them without difficulty, is also an added advantage of the association.

### For the Community:

PROBABLY no institutions do more for the development of community spirit than these which aid our people toward better housing. The old French maxim "A man will fight for his home but not for his boarding house" is an eternal truth. If this is true for the nation as a whole, it is equally true for the individual community that desires to have the cooperation of all its people in its community activities.

WE ARE ALWAYS AT YOUR SERVICE TO  
GIVE YOU ANY INFORMATION YOU MAY DE-  
SIRE, PERTAINING TO YOUR PARTICULAR
