Real Estate is the safest property, the only property that is permanent and that its owner really controls. What are the great fortunes that have lasted, and why have they lasted through 125 years? They are the fortunes of such New York families as the Astors and Gerrys. They have lasted because their ancestors bought Real Estate. Fortunes in Stocks and Bonds may come and go, the value of a business may be in the brain of the owner and may die with him; when you own land, the value is the Real Estate, death cannot destroy. When you own stock, you depend on the intelligence of a board of directors, when you own Real Estate you can control. The first Real Estate investment should be the purchase of a home, enabling the owner to say, this piece of earth is mine; buy and pay for a home first. After that when asked what is the best, safest, long time investment? You may answer Real Estate. It cannot be watered, it cannot be stolen, it cannot be cut into by hard times. Any change in its value is merely passing; the tendency is always upward! If you are a home owner and not interested, help us stop your neighbor or friend from paying rent.
