

# GOOD SEASON IS EXPECTED

(Continued From Page One)

view of the picturesque Little Tennessee and surrounding mountains, has an enviable tradition for hospitality and comfort.

The Franklin Golf and Country club, with lodge and cottages under the management of Major and Mrs. J. Frank Carmack, offers delightful accommodation and recreational facilities. In a rare setting of mountains and wooded grounds, out-door life is offered, with golf, swimming pool, and tennis courts, in close proximity.

Mr. and Mrs. W. H. Sellers, who open their spacious home, River-view, to summer visitors, are widely known for their hospitality and bountiful fare. On a hill overlooking the Little Tennessee river, this location offers a beautiful view of the Cowee mountains.

Sunnyside Farm, the home of Mrs. W. W. Sloan, for a score of years, has been one of the popular places for summer visitors.

A new tea room has been opened on Main street, by Mr. and Mrs. Hugh Leach, which is a charming addition for the convenience of visitors as well as residents.

Munday Hotel, on Main street, furnishes accommodations to transient guests and business men.

Babbling Brook Farm, in the heart of the Nantahala forest, possesses a charm that is unique. Within the sound of rushing waters, and tinkling cow bells, this ancestral home, with Miss Annie Sledge as hostess, offers sumptuous fare.

Moody Farm has for some years catered to visitors from many cities who enjoy the country life and abundant fare offered.

In addition many homes and boarding houses are preparing to care for an increased number of visitors expected this season.

## Four Club Members To Attend National Camp

Four of North Carolina's outstanding 4-H club members have been selected to represent this state at the national 4-H club camp to be held in Washington, June 17-23.

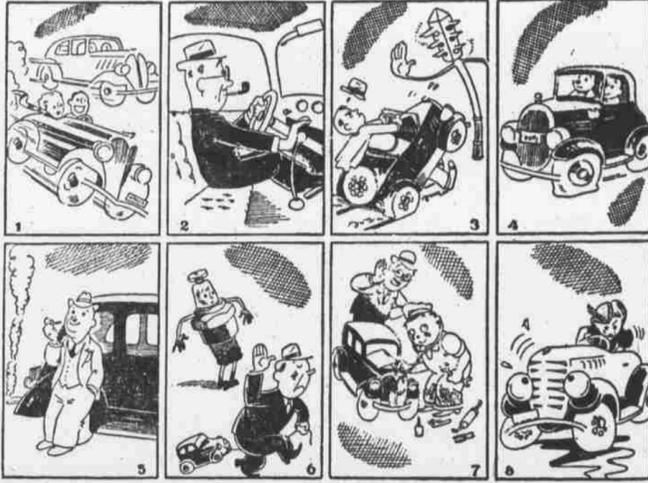

Selected from among 42,000 club members over the state, the two boys and two girls will be guests of the U. S. department of agriculture along with delegates from other states of the union.

While in Washington they will be given special training in leadership and will be taken on tours to various government departments and other places of interest, said L. R. Harrill, 4-H club leader at N. C. State college.

North Carolina's delegates are: Ray Morrison, Iredell county; Graham Penny, Johnston county; Alice Falls, Cleveland county; and Mary Lily Foard, Iredell county.

Morrison has made a record in cotton and corn projects, but is best known for his dairy calves.

## How To Get Maximum Mileage

GETTING the most miles out of a gallon of gasoline is more than a matter of using a good gasoline. Fiso Marketers' engineers pointed out in a recent bulletin on this subject. The illustrations above indicate graphically the outstanding causes of poor mileage. By following these simple rules any motorist can increase the miles per gallon

he obtains from a good motor fuel:  
 1—Don't accelerate needlessly.  
 2—Don't run too long in low or second gear.  
 3—Don't race to stop light and then jam on brakes.  
 4—Don't drive on soft tires.  
 5—Don't let engine idle when not in use.  
 6—Don't use dirty spark plugs.  
 7—Don't fail to have periodic tune-up.  
 8—Don't choke motor excessively.

He has probably won more prizes than any other calf club member of the state. Morrison calves have won the grand championships at the state fair 4-H calf show three successive years. Last year he was awarded the Cameron Morrison four-year college-scholarship for his excellence in calf club work.

Penny has excelled in corn, tobacco, baby beef, and pig projects. He won the grand championship of the state fair 4-H judging contest in 1936. Active in club work, he has shown leadership ability.

Miss Foard, now in her seventh year of club work, has made unusual records in clothing, food conservation, home beautification, gardening, and room improvement projects. Her furniture exhibit won first prize at the state fair.

Miss Falls, completing her fourth year as a club member, was president of the Fallston club in Cleveland county when it was awarded a banner for the best individual club record in the state for 1936.

## Employment Service Applicants to Receive Notice

RALEIGH, June 2.—The 1496 individuals in the state who took the merit examinations for places with the employment service division of North Carolina unemployment compensation commission several weeks ago may expect notices any day now telling them whether or not they passed the tests. Those who passed will be notified of the time and place for the personal interviews to be given by a board composed of a representative of the U. S. employment service, one of another state employment service and one of the state university.

Two boards will conduct the interviews, probably at the eight

points in the state at which the examinations were given, and possibly at other places. One board will interview those of the 76 individuals who took the examination for state director and pass the test, and those of the 245 taking and passing the test for the four field supervisor places, on June 7. On June 14 another board will interview those passing the preliminary examinations for all the other posts, including statistical and fiscal supervisors, district and branch managers, senior and junior interviewers and junior counselor.

All those who passed the examinations and make a passing grade in the interviews will be notified of their grades and their relative positions on the lists of those who passed the final tests, probably early in July.

More than 2,800 applied for admission to the examinations held and of this number 1,496 were admitted to and took the examinations. Based on records of other states, it is estimated that 700, or about half of the number, will pass the tests given and be admitted to interviews by the two boards.

## Army Enlistments Open for Hawaii

The U. S. Army recruiting office at Asheville, receives enlistments for Hawaii, for the following branches: infantry, field artillery, air corps (mechanics), engineers, quartermaster corps, medical department and ordnance department. Men wishing to enlist for these assignments must be enlisted as soon as possible since it is not expected that these assignments will last long.

If you desire service in the Hawaiian Islands you should call at this office at once.

In addition to the above assignments, we have openings for Panama, 1st corps area, Boston, Mass.; 2nd corps area, New York, and Ft. Bragg, N. C. Call at the U. S. Army recruiting office at Asheville. Office hours are from 8 a. m. to 4:30 p. m. daily.

## P. H. Gerrard Talks to Forest Supervisors

Paul H. Gerrard, of Franklin, supervisor of the Nantahala national forest, addressed the national forest supervisors' conference in Atlanta, on the importance of fire towers in the fire prevention program of the U. S. forest service.

"Fire towers are virtually the eyes of the service, and the tower system on any forest should be planned for efficiency in fire control work," supervisor Gerrard said. He further stated that the preservation and wise use of all resources in the national forests are absolutely dependent on adequate fire prevention. Without fire prevention, timber would be destroyed; stream flow would be diminished by the destruction of ground cover which protects valuable watersheds; the productivity of lands would be lessened by erosion of soil; fish would be destroyed by lack of waters; and game animals injured and killed by fires.

United States forest service officials from 11 southern states attended the conference at regional headquarters. In addition to fire control, the discussions covered timber management, recreation, game management, and the general administration of the southern national forests.

## New Barley Varieties Will Increase Yields

New strains of barley developed by experiment station workers will help North Carolina farmers conserve their soil and feed their livestock a better ration.

Barley fits in well with the soil conservation program, makes a good nurse crop for lespedeza or red clover, is an excellent feed for stock, and grows at a convenient time of year, said Dr. Gordon K. Middleton, cereal agronomist of the central experiment station at State college.

The state's barley production dropped from 23,000 acres in 1930 to 9,000 acres in 1935, due to the heavy inroads made by smut disease, he continued.

The new strains developed for

this state have a fairly good resistance to smut and produce comparatively high yields of grain, and Dr. Middleton believes they will revive the barley crop.

As a forage crop, the hooded or smooth varieties are preferred, while bearded barleys produce the heaviest yield of grain.

The new hooded selection known as No. 26, has averaged 27.3 bushels per acre in tests conducted during the past five years, as compared with 22.8 bushels produced by Tennessee No. 6. Although No. 26 is not completely immune to smut, it does show a far greater resistance than any other variety now grown in this state.

The average yield of all hooded barleys in the state for the years 1932-1936 was 33.8 bushels per acre, while the bearded barleys produced an average of 33.8 bushels.

A new hybrid selection of bearded barley known as No. 15 has been the highest producer, yielding 37.4 bushels to the acre.

Seed from hooded No. 26 and bearded No. 15 are being produced, but there will not be enough available for general distribution until 1938, Dr. Middleton stated. Only a few seed are now on hand.

**I'M A NEW WOMAN THANKS TO PURSANG**

Yes, Pursang contains, in properly balanced proportions, such proven elements as organic copper and iron. Quickly stimulates appetite and aids nature in building rich, red blood even in cases of simple anemia. When this happens, energy and strength usually return. You feel like new. Get Pursang from your druggist.

## Horses for Sale or Trade

We have 24 head of good fat mares and horses, weighing from 900 to 1,600 pounds to sell or swap—ages ranging from 2 to 6 years. These horses can be seen at Munday's old barn, in Franklin, N. C.

**Arthur Brown,**  
Walhalla, S. C.

## Notice to Taxpayers

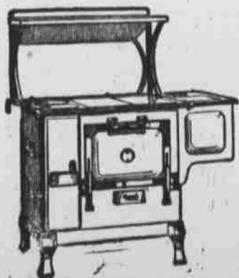

The Macon County Board of Tax Equalization will meet at the Courthouse in Franklin on Thursday, June 10, for the purpose of hearing any and all taxpayers who own or control taxable property assessed for taxation in the county in respect to the valuation of such property or the property of others.

**C. T. Bryson,**  
Tax Supervisor

## CAKE BAKING

Requires Constant, Uniform Oven Heat

... let us tell you about the MONARCH Duplex Draft Control. . . This is just one of the many individual features that have made MONARCHS Famous for fuel economy and perfect baking results for over one-third of a century.

**Bryant Furniture Co.**  
FRANKLIN, N. C.
