FOR ECONOMICAL TRANSPORTATION

"Give us a truck with ample pulling power . . . one that is economical . . . one that will give reliable service over a long period for the least money."

That is the demand of all truck operators, and thousands of Chevrolet users will tell you that the best answer is—Chevrolet trucks!

Chevrolet trucks have the greatest pulling power in their price range . . . because they have a New High-Compression Valve-in-Head Engine which wrings the last ounce of power out of every gallon of fuel.

Chevrolet trucks are the most

economical for all-round duty . . . because they give maximum gas and oil mileage; and will keep on serving over a long period with minimum care and attention.

And Chevrolet trucks are safer, more modern, more durable . . . because they're the only low-priced trucks with Perfected Hydraulic Brakes, New Steelstream Styling, Pressure Stream Lubrication, and extra-strong Chevrolet construction throughout.
