Extra Safe

COLLECTING LIQUID RUBBER ON FIRESTONE PLANTATIONS IN LIBERIA
An ever-increasing supply of rubber comes from these plantations. Savings made by controlling raw materials and by more efficient manufacturing and distribution make extra values possible at no extra cost.

BECAUSE in Firestone Standard Tires —

YOU GET EXTRA PROTECTION AGAINST BLOWOUTS — eight extra pounds of rubber are added to every 100 pounds of cord by the Firestone patented Gum-Dipping process. By this process every cord in every ply is saturated with liquid rubber. This counteracts internal friction and heat that ordinarily cause blowouts.

YOU GET EXTRA PROTECTION AGAINST PUNCTURES—because under the tread are two extra layers of Gum-Dipped cords.

YOU GET EXTRA PROTECTION AGAINST SKIDDING—because the tread is scientifically designed.

YOU GET LONGER NON-SKID MILEAGE because of the extra tough, long-wearing tread.

Before leaving on your vacation trip, join the Firestone SAVE A LIFE Campaign by equipping your car with a set of new Firestone Standard Tires—today's top tire value.

DON'T RISK YOUR LIFE ON SMOOTH WORN TIRES DO YOU KNOW

THAT last year highway accidents cost the lives of more than 38,000 men, women and children? That a million more were injured? THAT more than 40,000 of these deaths and injuries were caused directly by punctures, blowouts and skidding due to unsafe tires?

At right is a section cut from a smooth, worn tire, with non-skid protection worn off. Tires in this condition are liable to punctures, blowouts and skidding.

At left is section cut from a new Firestone Tire. Note the thick, non-skid protection against skidding, blowouts and punctures. Come in and see a demonstration.
