

Lake Emory

By J. R. BERRY

The rainfall for September was 3.27 according to the rain gauge at Lake Emory power plant.

Rev. Avery Peck delivered an interesting sermon at Kiddecrest Sunday. His subject, "Making Life's Choice;" text, "Choose ye this day whom ye will serve."

Misses Pauline and Dorothy Reid have gone to Hot Springs to attend Dorland Bell high school.

Juretta Tippet, daughter of Clyde Tippet, was painfully injured Sunday evening. At present she is improved.

C. D. S. Clarkson, of Florida, was at J. R. Berry's roller mill on business Saturday.

Jesse Thompson, tunnel foreman, from Mt. Mitchell, visited home folks Sunday.

The WPA road project is making some much needed improvement near Berry's roller mill. Looks now as if some time before the Judgment Day we might have some hard surfaced roads in this vicinity.

Lucius Wilson and family, of Asheville, visited relatives in this section Sunday.

Joe Shuler, of Canton, was visiting home folks Sunday.

Bill Thompson had the misfortune of being badly cut on barbed wire Saturday, and was taken to the Angel hospital.

Wilmer Guest, son of James Guest, has returned home from Florida.

Mr. and Mrs. Ray McIntyre announce the birth of a son at their home Saturday, October 2.

Women's Clubs To Meet In Bryson City

Highlights of the day's program at the First district meeting of the North Carolina Federation of Women's clubs, which will be held in Bryson City on Saturday, October 9, beginning at 10 o'clock, in the Presbyterian church, will be addresses by the state president, Mrs. Howard G. Etheridge, of Asheville, Mrs. J. N. Britt, of Lumberton, second vice-president of the federation, and Mrs. H. Bueck, of Murphy, president of the first district, who will preside.

The Bryson City Woman's club will be hostess for the district meeting with Mrs. Max Close, president of the club, as general chairman. The reservations committee are: Mrs. Max Close and Mrs. Leslie Brooks. Pages for the day will be Helen Brooks and Margeret Lee Corpening.

Paper Men To Buy Pulp Wood From Farmers

Most of the pulp and paper companies having mills in North Carolina or which are buying pulp wood here for use in other states, even though they already have large acreage holdings in the state, are planning to buy the pulp wood they need from the landowners and farmers just as long as they can get the necessary supply from them, according to F. H. Claridge, assistant state forester in charge of forest management for the forestry division of the department of conservation and development.

The pulp wood companies are buying up large areas of timber land to hold in reserve for future use if any time the general supply of pulpwood becomes exhausted or so limited that it can no longer be depended upon, Claridge said. They also know that the amount of available timber on these areas will materially increase if no cutting is done for 10 or 20 years.

Protectors Will Prevent Early Quail Shooting

Game protectors in every county in the state have been instructed to stay on the alert throughout the dove shooting season, which opened September 15, to see that dove hunters do not shoot some quail while hunting for doves, according to Commissioner John D. Chalk of the game and inland fisheries division of the department of conservation and development.

Most of the sportsmen of the state are cooperating with the division 100 per cent and are careful to confine their shooting to the birds that are in season, Commissioner Chalk said. But there are some hunters who seem unable to resist the temptation to blast away at quail when they scare up a covey while hunting doves. Accordingly, the game protectors have been instructed to check the bags of dove hunters very carefully.

87 SPEED RECORDS BROKEN TO MAKE TIRES SAFER FOR YOU

Never Before Have Tires Been Put to Such Gruelling Torture

Ab Jenkins, World's Safest Driver, Establishes 87 New Records for Safety, Speed, Mileage and Endurance . . . He Drove 3,774 Miles in 24 Hours on the Sharp Granite-like Surface of the Bonneville Salt Beds at Average Speed of 157.27 Miles an Hour.

AT SPEEDS as high as 180 miles an hour — with the hot, coarse, abrasive salt grinding, tearing, scorching his tires — Ab Jenkins' special racer, weighing nearly three tons, pounded over the Bonneville Salt Beds last week at such terrific speed that it caused the surface to break up. Before the end of the run the track was so pitted and rough that it was almost impossible to hold the car on its course. Yet Jenkins set 87 new World, International and American speed records on Firestone Tires.

Building tires capable of establishing such records is made possible only because of patented Firestone manufacturing processes. These exclusive features enable Firestone to provide car owners with tires that are extra safe.

For the greatest protection of yourself and your family equip your car with Firestone TRIPLE-SAFE Tires. By TRIPLE-SAFE we mean —

- 1 PROTECTION AGAINST SKIDDING**—The scientific tread design gives longer non-skid mileage and stops your car up to 25% quicker.
- 2 PROTECTION AGAINST BLOWOUTS** — Firestone Tires run up to 28 degrees cooler because every fiber of every cord in every ply is saturated with liquid rubber by the Firestone patented Gum-Dipping process. This counteracts the internal friction and heat that ordinarily cause blowouts.
- 3 PROTECTION AGAINST PUNCTURES** — Two extra layers of Gum-Dipped cords under the tread add strength to the tire and give extra protection against punctures.

Now is the time to make your car tire-safe for fall and winter driving. Join the Firestone SAVE A LIFE Campaign today by equipping your car with a set of new FIRESTONE TRIPLE-SAFE Tires — the safest tires that money can buy.

YOU CANNOT AFFORD TO DRIVE WITHOUT FIRESTONE TRIPLE-SAFE TIRES

Last year highway accidents cost the lives of more than 39,000 men, women and children and a million more were injured.

More than 40,000 of these deaths and injuries were caused directly by punctures, blowouts and skidding due to smooth, worn, unsafe tires!

Left is a section cut from a new Firestone Tire. Note the thick, non-skid protection against skidding, blowouts and punctures. Come in and see a demonstration.

Left is a section cut from a smooth, worn tire, with non-skid protection worn off. Tires in this condition are liable to punctures, blowouts and skidding.

JOIN THE FIRESTONE *Save a Life* CAMPAIGN TODAY!
